Animal Models for the Development of Cancer Immunotherapy Seng-Lai Tan, 2022-08-08 Animal Models for the Development of Cancer Immunotherapy Provides readers with a clear understanding of the value and challenges of using common and emerging preclinical models in cancer immunotherapy research and development Animal models are essential tools for studying a range of issues in preclinical and clinical research on therapies targeting cancerous tumors As clinical trials of advances in cancer immunotherapy are predicted to outpace preclinical research in the near future there remains an urgent need to develop better animal models for preclinical evaluation of novel modulators Animal

Models for the Development of Cancer Immunotherapy provides a detailed overview of different preclinical model systems for development of novel cancer immunotherapies while highlighting how key aspects of individual models translate into clinical findings. Covering the introduction, development and therapeutic applications of animal models for cancer immunotherapy, this comprehensive volume helps pharmacologists identify suitable animal models, design pharmacological or translational studies and advance their mechanistic understanding of therapeutic agents and increase the possibility of success for novel immunotherapies in clinical settings. Chapters written by prominent leaders in the field address specific models that evaluate immuno-oncology drugs, are supported by in-depth case studies and extensive references throughout. Emphasizes the importance of modeling tumor metastasis in preclinical models for efficient translation of findings into the clinic. Explores recently discovered mechanisms of resistance and their preclinical modeling. Highlights the unique characteristics and features of autologous and allogeneic approaches for humanization of mouse models. Reviews development of bone marrow liver thymus (BLT) immune humanized mice and emerging alternative models such as genetically engineered mouse models (GEMM). Discusses alternative animal models for cancer research such as severe combined immunodeficiency (SCID) pigs. Animal Models for the Development of Cancer Immunotherapy is an essential resource for scientists and researchers in the pharmaceutical and biotechnology industries, medicinal chemists and biochemists, cell and molecular biologists, pharmacologists, immunologists and clinicians.

[The Veterinary ICU Book](#) Wayne Wingfield, Marc Raffe, 2020-06-03. This book is dedicated to the fundamental clinical signs of astute observation, careful differential diagnosis and analytical therapeutic decision making in emergency veterinary settings. It clearly defines the physiological and clinical principles fundamental to the management of the critically ill small animal patient. With clear guidelines for organizing an emergency critical care unit, the book also discusses ethical and legal concerns. The 80 expert authors have created a clinically specific resource for the specialist residents in training, veterinary practitioners, technicians and students. Published by Teton New Media in the USA and distributed by CRC Press outside of North America.
