**Democracy in Small States** Jack Corbett, Wouter Veenendaal, 2018-09-19 Populism and the personalization of politics appears to be threatening the existence of democracy as we know it all over the world It is now more important than ever to understand the history of this form of regime why it has thrives and fails But existing studies are limited by their focus on a few large and predominately rich states This book takes the opposite approach it investigates how politics is practiced in the smallest states where hyper personalization has always been a ubiquitous feature of political life It optimistically finds that hyper personalized democracy can actually persist against all odds but also cautions that political practices in small states are often markedly different to larger states Oxford Studies in Democratization is a series for scholars and students of comparative politics and related disciplines Volumes concentrate on the comparative study of the democratization process that accompanied the decline and termination of the cold war The geographical focus of the series is primarily Latin America the Caribbean Southern and Eastern Europe and relevant experiences in Africa and Asia The series editor is Laurence Whitehead Senior Research Fellow Nuffield College University of Oxford *Are Small Firms Important? Their Role and Impact* Stephen Ackermann, 2012-12-06 Are Small Firms Important Their Role and Impact proposes and supports the claim that small firms make two indispensable contributions to the economy First they are an integral part of the renewal process that pervades market economies New and small firms play a crucial role in experimentation and innovation that leads to technological change productivity and economic growth Second small firms are the essential mechanism by which millions enter the economic and social mainstream of American society The public policy implications for sustained economic growth and social well being is the continued high level creation of new and small firms by all segments of society It should be the role of government policy to facilitate that process by eliminating entry barriers lowering transaction costs and minimizing regulation **Using Technology in Foreign Language Teaching** Rahma Al-Mahrooqi, Salah Troudi, 2014-10-17 Language learning is a complex and challenging endeavor For students to achieve the desired proficiency in English as a Foreign Language EFL their institutions need to invest time effort and huge resources in order to cater for different learning styles To be cost effective many language teaching institutions strive to provide intensive foreign language FL instruction to reduce the time period needed to learn the target language This explains the current interest in combining differe **The Individual and Utopia** Clint Jones, Cameron Ellis, 2016-03-09 Central to the idea of a perfect society is the idea that communities must be strong and bound together with shared ideologies However while this may be true rarely are the individuals that comprise a community given primacy of place as central to a strong communal theory This volume moves away from the dominant current macro level theorising on the subject of identity and its relationship to and with globalising trends focusing instead on the individual s relationship with utopia so as to offer new interpretive approaches for engaging with and examining utopian individuality Interdisciplinary in scope and bringing together work from around the world The

Individual and Utopia enquires after the nature of the utopian as citizen demonstrating the inherent value of making the individual central to utopian theorizing and highlighting the methodologies necessary for examining the utopian individual. The various approaches employed reveal what it is to be an individual yoked by the idea of citizenship and challenge the ways that we have traditionally been taught to think of the individual as citizen. As such it will appeal to scholars with interests in social theory philosophy literature cultural studies architecture and feminist thought whose work intersects with political thought utopian theorizing or the study of humanity or human nature. *Beyond Ujamaa in Tanzania* Goran Hyden, 2023-11-10. *Beyond Ujamaa in Tanzania* Underdevelopment and an Uncaptured Peasantry explores the challenges of development and underdevelopment in Africa with a focus on Tanzania's experience during its early socialist years. The book critiques the dominant ideologies of development whether capitalist or socialist as being rooted in Western industrial paradigms that often fail to address the realities of pre capitalist African societies. It argues that the underdevelopment in Africa is not solely due to excessive penetration by global capitalism but also to capitalism's inability to dismantle the resilient pre capitalist structures in many rural societies. The author highlights the role of the Tanzanian peasantry whose economic and social autonomy often resists the centralizing tendencies of modern development presenting them not as mere appendages to the global economy but as key players with their own modes of production and unique societal structures. The book is grounded in over a decade of fieldwork and engagement with rural Tanzanian communities enriched by the author's fluency in Swahili and deep involvement in local life. It argues for a more nuanced approach to studying African societies one that goes beyond Western assumptions and models. By placing the peasant mode of production at the center of analysis the study challenges conventional wisdom and suggests that the primary development challenge in Africa lies not with multinational corporations but with understanding and working within the dynamics of the smallholder peasant economy. The author also reflects on the limitations of conventional social science research and calls for greater involvement in the lived realities of the communities studied emphasizing the need for research methods that are sensitive to local contexts and values. The book combines academic critique field observations and a focus on the epistemological biases of Western scholarship to present a compelling argument for rethinking development in Africa. Failure or Reform? Stewart Lockie, 2019-09-10 Market reform promises more environmental protection and more profitable agriculture at lower financial cost Too good to be true This book examines numerous empirical examples of policy in action to identify principles for the successful application of market based policy instruments Where some market instruments are used to fix market failures by putting a value on environmental protection others use market like mechanisms to allocate financial incentives for environmental work They are promoted as flexible efficient and politically neutral solutions to the competing demands of social economic and ecological sustainability But they also attract criticism for rolling back environmental regulation and privatizing public goods This book argues that while many market based instruments have merit decisions about responsibility cannot be left entirely to the market Whichever instruments we use decision making needs to be embedded in a logic of democratization Using case studies from around the world this book investigates how instruments like eco standards payments for ecosystem services pollution trading and community based natural resource management perform in practice and what can be learned about applying them more effectively While the

approach is primarily sociological it is deliberately written to bridge the gap between sociology economics environmental sciences and the concerns of environmental policy makers      Intertextuality in the Tales of Rabbi Nahman of Bratslav
