The Management of Burns and Fire Disasters: Perspectives 2000 M. Masellis, S. William A. Gunn, 2012-12-06 This volume is published with a triple aim to take a look back over the advances during the ten years of the Mediterranean Burns Club and mark its anniversary to follow up and strengthen the successful twinning of burns as a clinical individual illness problem and fires as a societal disaster management problem and to look ahead at the perspectives of burn care and fire prevention in the fast approaching new century The occasion also marks the tenth annual presentation of the prestigious G Whitaker International Burns Prize to which the Mediterranean Burns Club acts as the scientific fulcrum The award is now established as the most distinguished recognition in burns science worldwide and it is gratifying that the contributions of many of the renowned recipients will be found in this book This is a sequel to The Management of Mass Burn Casualties and Fire Disasters which contained the Proceedings of the First International Conference on Burns and Fire

Disasters The book and the conference have fully justified the authors initial concept that burn specialists constantly combatting burn disease and promoting rehabilitation of the victims especially in mass casualty situations had for too long remained separate from that other essential sector the fire fighting authorities and fire prevention systems whose aim is also the protection of the individual and the promotion of safety This long overdue synergism has now become reality and the present volume strengthens this desirable trend

Fire Effects on Soil Properties Paulo Pereira,Artemi Cerdà,Xavier Úbeda,Jorge Mataix-Solera,Guillermo Rein,2019-02-01 Wildland fires are occurring more frequently and affecting more of Earth's surface than ever before These fires affect the properties of soils and the processes by which they form but the nature of these impacts has not been well understood Given that healthy soil is necessary to sustain biodiversity ecosystems and agriculture the impact of fire on soil is a vital field of research Fire Effects on Soil Properties brings together current research on the effects of fire on the physical biological and chemical properties of soil Written by over 60 international experts in the field it includes examples from fire prone areas across the world dealing with ash meso and macrofauna smouldering fires recurrent fires and management of fire affected soils It also describes current best practice methodologies for research and monitoring of fire effects and new methodologies for future research This is the first time information on this topic has been presented in a single volume and the book will be an important reference for students practitioners managers and academics interested in the effects of fire on ecosystems including soil scientists geologists forestry researchers and environmentalists

Modelling, Monitoring and Management of Forest Fires J. de las Heras,C.A. Brebbia,D. Viegas,V. Leone,2008-08-26 At present there is insufficient knowledge of the behavior of fires and how they propagate This lack of information makes it very hard to control these phenomena and is one of the biggest obstacles to the development of a reliable decision support system Public concern regarding this topic is increasing as uncontrolled fires may lead to major ecological disasters and usually result in negative economic and health implications for the region Containing papers presented at the First International Conference on Modelling Monitoring and Management of Forest Fires this book addresses the latest research and applications of available computational tools to analyse and predict the spread of forest fires in order to prevent or reduce major loss of life and property as well as damage to the environment Such tools must be able to take into consideration a large number of different parameters The book thus deals with all aspects of forest fires from fire propagation in different scenarios to the optimum strategies for fire fighting It also covers issues related to economic ecological social and health effects Featured topics include Computer Models for Fire Propagation Risk and Vulnerability Assessment Fire Combustion Models Computational Methods and Experiments Case Studies Emergency Response Systems Optimization Models for Fire Mitigation Environmental Impact Models Air Pollution and Health Risk Interaction between Meteorological and Forest Fires Models Economic Impact Models Forest Material Characterisation Eco Remediation Models Decision Support Systems Monitoring Systems and Data Acquisition and Analysis
