## **Social Protest And Policy Change Ecology Antinuclear And Peace Movements In Comparative Perspective:**

**Social Protest and Policy Change** Marco Giugni, 2004-06-10 While movement activists spend much of their time and energy trying to change the world and we think that social movements often matter our theoretical and empirical knowledge in this field is still relatively poor Social Protest and Policy Change offers a systematic and empirically grounded analysis of the impact of three major contemporary movements on public policy Following a comparative and historical perspective the author argues that the policy impact of social movements is facilitated by the presence of favorable political opportunity structures and more precisely by the presence of institutional allies among the elites and by a favorable public opinion Furthermore the very content of the movements demands also plays a role insofar as the power holders are more willing to make concessions on certain issues than on others On the basis of a historical overview of the mobilization of ecology antinuclear and peace movements in the United States Italy and Switzerland and using a unique body of original data the book presents the results of time series analyses showing the joint effect of protest political alliances and shifts in public opinion for movements that do not address issues that pose too serious a threat to the power holders **Global Justice**

**Activism and Policy Reform in Europe** Peter Utting, Mario Pianta, Annekathrin Ellersiek, 2012 Civil society activism around issues of global justice has proliferated in Europe during the past two decades Has such contestation and advocacy made a difference This book examines whether and how the organizations networks and campaigns involved have attained their policy objectives in the areas of debt relief international trade international taxation and corporate accountability The analysis also considers the relationship between national and transnational activism By comparing variations in the activism policy nexus in France Italy and the United Kingdom it seeks to understand how such interaction and policy outcomes vary in different institutional and political contexts [Handbook of Social Movements Across Disciplines](#) Bert Klandermans, Conny Roggeband, 2009-12-18 This book aims to revisit the interdisciplinary roots of social movement studies Each discipline raises its own questions and approaches the subject from a different angle or perspective The chapters of this handbook are written by internationally renowned scholars representing the various disciplines involved They each review the approach their sector has developed and discuss their disciplines contributions and insights to the knowledge of social movements Furthermore each chapter addresses the unanswered questions and discusses the overlaps with other fields as well as reviewing the interdisciplinary advances so far

**The Politics of War Memory in Japan** Kamila Szczepanska, 2014-05-09 Since the 1990s questions of Japanese wartime conduct apologies for aggression and compensation to former victims of the country's imperial policies have been brought to the fore of national and regional politics The state is undoubtedly the most important actor in the process of memory production and along with conservative legislators and the grass root revisionist movement there has been a consistent trend towards denying or undermining the existing acknowledgments of responsibility for Japan's wartime past However to fully comprehend war memory in Japan due attention must be paid to competing

discourses that demand an alternative view and only then can the complexity of Japanese war memory and attitudes towards the legacies of the Asia Pacific war be understood The Politics of War Memory in Japan examines the involvement of five civil society actors in the struggle over remembering and addressing the wartime past in Japan today In studying progressive war memory activists it quickly becomes clear that the apologia by conservative politicians cannot be treated as representative of the opinion of the majority of the Japanese public Indeed this book seeks to remedy the disparity between studies devoted to the official level of addressing the history issue and the grass root historical revisionist movement on the one side and progressive activism on the other Furthermore it contributes to scholarly debates on the state of civil society in Japan challenging the characterisation of Japanese civil society as a depoliticised space by demonstrating a more contentious side of civil society activism Drawing important new empirical research this book will be of huge interest to students and scholars of Japanese civil society Japanese politics Japanese history and memory in Japan

Non-conventional Political Participation in Turkey Cristiano Bee, Ayhan Kaya, 2018-12-07 This book focuses on the emergence of different forms of civic and political activism in Turkey. It has taken into account different components of active citizenship specifically looking at the development of civic and political forms of activism that bridge the realms of conventional and non-conventional participation. Focusing on the effects of the 2013 Gezi Park protests which originated in Istanbul but spread throughout the country, this book reflects on how this experience might re-orient current civic and political participation in Turkey. Specifically focusing on the main dynamics of non-conventional forms of civic and political activism, this volume attempts to understand the impact of non-conventional forms of political participation on voting behaviour. The internal domestic conditions of the country as well as its role in the international arena have dramatically changed since 2013 and are constantly evolving due to the domestic societal and political cleavages and the regional problems in the Middle East. Yet the papers in the book reflect upon the significance of Occupy Gezi nowadays demonstrating not only its importance in questioning the link between the patrimonial state and its citizens but also for stimulating participatory behaviours. The chapters originally published as a special issue in Turkish Studies.

**Europeanisation of the Contemporary Far Right** Anita Nissen, 2022-03-03 Europeanisation of the Contemporary Far Right explores the role of transnational European identity in far-right mobilisation strategies. Focusing on the national members of two trans-European far-right coalitions, Generation Identity and Fortress Europe, the author explores the extent to which European far-right extra-parliamentary actors Europeanise their mobilisation. Drawing on social movement literature, the book argues that national extra-parliamentary actors' Europeanisation processes are influenced by their political and discursive opportunities and resources. Focusing on the groups' mobilisation during the refugee crisis (2015-2017), the analysis considers the groups' frames, collective action and coalition building in the period, finding that the depth of the groups' resources particularly affects their capacity to mobilise. This book will be of interest to scholars, students and civil society actors in fields related to the far-right, European studies, social movements and migration.

**Introducing Comparative Politics** Stephen Orvis, Carol Ann Drogus, 2020-01-07 The graphics in the book are extremely reader-friendly. The language is clear and easy for students to follow. Instructor resources are quite helpful and a key part of my decision-making. Overall, this is the best comparative politics text for undergrads that I have found. It covers all the important topics in the field and presents them in a way that is accessible to students. Laura N. Bell, West Texas A.M. University. Organized thematically around important questions in comparative politics: who rules, what explains political behavior, where and why. *Introducing Comparative Politics*, Fifth Edition, integrates a set of extended case studies of 11 countries that vividly illustrate issues in cross-national context. Serving as touchstones, the cases are placed within the chapters where they make the most sense, not separated from the theory or in a separate volume, helping students make connections between the two earlier in the semester. The book's hybrid organization gives students a more holistic view of comparative politics. A Complete Teaching Learning Package (LMS Cartridge) formally known as SAGE Coursepacks Import.

*Contested Water* Joanna L. Robinson, 2013-03-15 An examination of anti water privatization movements in the United States and Canada that explores the interplay of the local and the global Attempts by local governments to privatize water services have met with furious opposition Activists argue that to give private companies control of the water supply is to turn water from a common resource into a marketized commodity Moreover to cede local power to a global corporation puts communities at the center of controversies over economic globalization In *Contested Water* Joanna Robinson examines local social movement organizing against water privatization looking closely at battles for control of local water services in Stockton California and Vancouver British Columbia The movements in these two communities had different trajectories used different tactics and experienced different outcomes Robinson analyzes the factors that shaped these two struggles Drawing on extensive interviews with movement actors political leaders and policymakers and detailed analysis of textual material Robinson shows that the successful campaign in Vancouver drew on tactics opportunities and narratives from the broader antiglobalization movement with activists emphasizing the threats to local democracy and accountability the less successful movement in Stockton centered

on a ballot initiative that was made meaningless by a pre-emptive city council vote Robinson finds that global forces are reshaping local movements particularly those that oppose neoliberal reforms at the municipal level She argues that anti-water privatization movements that link local and international concerns and build wide-ranging coalitions at local and global levels offer an effective way to counter economic globalization Successful challenges to globalization will not necessarily come from transnational movements but rather from movements that are connected globally but rooted in local communities
