Social Tim And Social Change Perspectives On Sociology And History:

Approaches to History Sabyasachi Bhattacharya, 2011 History as a social science is arguably more self reflective than associated disciplines in that family Other social scientists seem to see little reason to look beyond the paradigm they are developing in the present times Historians on the other hand tend to depend on the cumulative process of the development of their craft and the fund of accumulated knowledge Yet while this is acknowledged in the practice of research Historiography in itself as a subject of study has rarely found its place in the syllabi of Indian universities Knowledge of Historiography is taken for granted when a scholar plunges into research In an attempt to address this lacuna the Indian Council of Historical Research ICHR has planned a series of volumes on Historiography comprising articles by subject specialists commissioned by the ICHR The first volume in the series Approaches to History Essays in Indian Historiography brings to the readers the first fruits of that endeavour While the essays encompass areas of research

presently at the frontiers of new research scholars will also find the bibliographies accompanying the essays of significant appeal

Hispanic Muslims in the United States Victor Hugo Cuartas, 2020-03-31 The empirical case in this study is that of the Hispanic Catholic converts to Islam in the Washington DC Metropolitan and New Jersey areas of the United States The central research question is To what extent do Hispanic Muslim converts play a role in making different choices regarding religious commitment and practice The argument is that not only do both the more and less active converts play a central role in making choices during the pre affiliation and post affiliation stages but that these choices can often be strategic in nature as they practice the new religion in the United States These choices are shaped by multiple factors This contributes to a new understanding of the prevailing debates among Muslims in Europe and the United States on the nature of Muslim minorities in the West that Muslims here are not merely transplanted but are active participants of diverse expressions of local Islam The evidence in my research shows that being less active does not mean converts do not play a role or make choices Both more active and less active converts make choices based on multiple factors This is especially significant as the main aim of this thesis is to show that the converts make choices and play a role in the post affiliation stage and that these often have strategic elements

Century of Difference Claude S. Fischer,Michael Hout,2006-11-16 In every generation Americans have worried about the solidarity of the nation Since the days of the Mayflower those already settled here have wondered how newcomers with different cultures values and frequently skin color would influence America Would the new groups create polarization and disharmony Thus far the United States has a remarkable track record of incorporating new people into American society but acceptance and assimilation have never meant equality In Century of Difference Claude Fischer and Michael Hout provide a compelling and often surprising new take on the divisions and commonalities among the American public over the tumultuous course of the twentieth century Using a hundred years worth of census and opinion poll data

Century of Difference shows how the social cultural and economic fault lines in American life shifted in the last century. It demonstrates how distinctions that once loomed large later dissipated only to be replaced by new ones. Fischer and Hout find that differences among groups by education age and income expanded while those by gender region national origin and even in some ways race narrowed. As the twentieth century opened a person's national origin was of paramount importance with hostilities running high against Africans Chinese and southern and eastern Europeans. Today diverse ancestries are celebrated with parades. More important than ancestry for today's Americans is their level of schooling. Americans with advanced degrees are increasingly putting distance between themselves and the rest of society in both a literal and a figurative sense. Differences in educational attainment are tied to expanding inequalities in earnings job quality and neighborhoods. Still there is much that ties all Americans together. Century of Difference knocks down myths about a growing culture war. Using seventy years of survey data Fischer and Hout show that Americans did not become more fragmented over values in the late twentieth century but rather were united over shared ideals of self reliance family and even religion. As public debate has flared up over such matters as immigration restrictions the role of government in redistributing resources to the poor and the role of religion in public life it is important to take stock of the divisions and linkages that have typified the U.S. population over time. Century of Difference lucidly profiles the evolution of American social and cultural differences over the last century examining the shifting importance of education marital status race ancestry gender and other factors on the lives of Americans past and present. A Volume in the Russell Sage Foundation Census Series.
