Social Traps And The Problem Of Trust:

Social Traps and the Problem of Trust Bo Rothstein, 2005-10-06 A social trap is a situation where individuals groups or organisations are unable to cooperate owing to mutual distrust and lack of social capital even where cooperation would benefit all Examples include civil strife pervasive corruption ethnic discrimination depletion of natural resources and misuse of social insurance systems Much has been written attempting to explain the problem but rather less material is available on how to escape it In this book Bo Rothstein explores how social capital and social trust are generated and what governments can do about it He argues that it is the existence of universal and impartial political institutions together with public policies which enhance social and economic equality that creates social capital By introducing the theory of collective memory into the discussion Rothstein makes an empirical and theoretical claim for how universal institutions can be established

Social Traps and Social Trust Michael A. Cowan, 2021-01-07 The articles in this special issue of the New England Journal of Public Policy are unusual in two respects First they reflect the practical wisdom of seasoned actors rather than the theoretical knowledge of academicians The typically unexamined assumption of the academy is that good practice in the world is simply the application of sound theory from the academy It does not take long in the public arena however to discover that leaders there are not applying theory from the academy to the decisions they face Rather they base their interventions on what they have learned about people organizations conflict race and politics in the rough and tumble of living in the world Their working understandings may be valuably leavened by theory but are not guided primarily by it Second the authors were not separate individuals working on isolated issues like children engaged in parallel play but rather partners in a fluid informal collaborative social action network operating in an environment of constantly shifting challenges and possibilities for change The authors are not a collection of Is they are a we They decided pragmatically to connect their power their political and financial and social capital at critical moments to accomplish shared goals The network grew more powerful in the process becoming more than the sum of its organizational parts This volume is ours as was the collective action out of which it emerged Like a choir s songs its articles give voice to a group s experiences Each is a part of a larger whole Whenever I speak about how Hurricane Katrina changed New Orleans an audience member invariably asks Would the changes you described have occurred without a hurricane The simple answer is no but a fuller response is required to do justice to the situation Nature can create temporary vacuums but it cannot fill them The coalition led public meetings action

campaigns election fights and legislative lobbying recounted here and the transformations they caused might not have happened in the wake of the great storm But they did In these pages you will meet some of those whose practical wisdom courage and integrity drove those changes

The Problem of Social Inequality Scott G. McNall, 2015-12-07 Within and among nations rising levels of social inequality threaten our collective future Currently upwards of 80% of people's life chances are determined by factors over which they have absolutely no control Social inequality threatens the democratic project because it destroys the trust on which governments depend and it gives rise to corrupt political and economic institutions How can we get out of the traps we have created for ourselves We need to reboot capitalism Drawing on diverse examples from a range of countries McNall explains the social economic and ecological traps we have set for ourselves and develops a set of rules of resilience that are necessary conditions for the creation and maintenance of democratic societies and a set of rules essential for creating a sustainable future

Lessons from the Northern Ireland Peace Process Timothy J. White, 2013 This book incorporates recent research that emphasizes the need for civil society and a grassroots approach to peacebuilding while taking into account a variety of perspectives including neoconservatism and revolutionary analysis The contributions which include the reflections of those involved in the negotiation and implementation of the Good Friday Agreement also provide policy prescriptions for modern conflicts

The Oxford Handbook of Social and Political Trust Eric M. Uslaner, 2018-01-02 This volume explores the foundations of trust and whether social and political trust have common roots Contributions by noted scholars examine how we measure trust the cultural and social psychological roots of trust the foundations of political trust and how trust concerns the law the economy elections international relations corruption and cooperation among myriad societal factors The rich assortment of essays on these themes addresses questions such as How does national identity shape trust and how does trust form in developing countries and in new democracies Are minority groups less trusting than the dominant group in a society Do immigrants adapt to the trust levels of their host countries Does group interaction build trust Does the welfare state promote trust and in turn does trust lead to greater well being and to better health outcomes The Oxford Handbook of Social and Political Trust considers these and other questions of critical importance for current scholarly investigations of trust

People, Profiles and Trust: on Interpersonal Trust in Web-mediated Social Spaces Alexander Ljung, Eric Wahlforss, 2008-09-17 As web mediated social spaces become more commonplace on the internet a need arises for understanding classical social phenomena in this new context Trust is one of these phenomena The purpose of this book is to study several aspects of interpersonal trust in web mediated social spaces More specifically this book discusses questions on how predominant social orders space design and representations of user identity affect trust on the individual level

Democratic Deficit Pippa Norris, 2011-02-14 Many fear that democracies are

suffering from a legitimacy crisis This book focuses on democratic deficits reflecting how far the perceived democratic performance of any state diverges from public expectations Pippa Norris examines the symptoms by comparing system support in more than fifty societies worldwide challenging the pervasive claim that most established democracies have experienced a steadily rising tide of political disaffection during the third wave era The book diagnoses the reasons behind the democratic deficit including demand rising public aspirations for democracy information negative news about government and supply the performance and structure of democratic regimes Finally Norris examines the consequences for active citizenship for governance and ultimately for democratization This book provides fresh insights into major issues at the heart of comparative politics public opinion political culture political behavior democratic governance political psychology political communications public policymaking comparative sociology cross national survey analysis and the dynamics of the democratization process

Political Trust and Disenchantment with Politics ,2014-12-04 That the publics of Western democracies are becoming increasingly disenchanted with their political institutions is part of the conventional wisdom in Political Science This trend is often equated with the expectation that all forms of political attachment and participation show similar patterns of decline Based on empirical underpinnings derived from a range of original and sophisticated comparative analyses from Europe and beyond this collection shows that no such universal pattern of decline exists Nor should it be expected given the diversity of reasons that citizens have to place or withdraw trust and to engage in conventional political participation or in protest Contributors are Christoph Arndt Wiebke Breustedt Christina Eder Manfred te Grotenhuis Alexia Katsanidou Rik Linssen Michael P McDonald Ingvi C Mochmann Kenneth Newton Maria Oskarson Suzanne L Parker Glenn R Parker Markus Quandt Peer Scheepers Hans Schmeets Thoralf Stark and Terri L Towner

Social Capital and Subjective Well-Being Anna Almakaeva,Alejandro Moreno,Rima Wilkes,2021-10-01 This book presents a cross cultural investigation into the interplay between social capital and subjective well being Based on a quantitative analysis of the latest large N cross cultural data sets including the World Value Survey and the European Social Survey and covering various countries it offers a comparative perspective on and new insights into the determinants of social capital and well being By identifying both universal and culture specific patterns the authors shed new light on the spatial and temporal differentiation of social capital and subjective well being The book is divided into two main parts The first discusses mutual trust religious and cultural tolerance and pro social and human values as essential dimensions of social capital In turn the second part studies social capital as a source of subjective well being and life satisfaction Given its scope the book will appeal to scholars of sociology social psychology political science and economics seeking a deeper understanding of the multi faceted nature of social capital and well being

Whom Can We Trust? Karen S. Cook,Margaret Levi,Russell Hardin,2009-11-25 Conventional wisdom holds that trust is essential for cooperation between individuals and institutions such as community organizations banks and local governments Not necessarily so according to editors Karen Cook Margaret Levi and Russell Hardin Cooperation thrives

under a variety of circumstances Whom Can We Trust examines the conditions that promote or constrain trust and advances our understanding of how cooperation really works From interpersonal and intergroup relations to large scale organizations Whom Can We Trust uses empirical research to show that the need for trust and trustworthiness as prerequisites to cooperation varies widely Part I addresses the sources of group based trust One chapter focuses on the assumption versus the reality of trust among coethnics in Uganda Another examines the effects of social network position on trust and trustworthiness in urban Ghana and rural Kenya And a third demonstrates how cooperation evolves in groups where reciprocity is the social norm Part II asks whether there is a causal relationship between institutions and feelings of trust in individuals What does and doesn't promote trust between doctors and patients in a managed care setting How do poverty and mistrust figure into the relations between inner city residents and their local leaders Part III reveals how institutions and networks create environments for trust and cooperation Chapters in this section look at trust as credit worthiness and the history of borrowing and lending in the Anglo American commercial world the influence of the perceived legitimacy of local courts in the Philippines on the trust relations between citizens and the government and the key role of skepticism not necessarily trust in a well developed democratic society Whom Can We Trust unravels the intertwined functions of trust and cooperation in diverse cultural economic and social settings The book provides a bold new way of thinking about how trust develops the real limitations of trust and when trust may not even be necessary for forging cooperation A Volume in the Russell Sage Foundation Series on Trust

Religion and Civil Society in Europe Joep de Hart, Paul Dekker, Loek Halman, 2013-07-15 Religion is back again in Europe after never having been gone It is manifest in the revival of religious institutions and traditions in former communist countries in political controversies about the relationship between the churches and the state and about the freedom of religion and the freedom to criticize religion and in public unease about religious minorities This book is about religion and civil society in Europe It moves from general theoretical and normative approaches of this relationship via the examination of national patterns of religion state relations to in depth analyses of the impact of religion and secularization on the values pro social attitudes and civic engagement of individuals It covers Europe from the Lutheran North to the Catholic South and from the secularized West to the Orthodox East and Islamic South East with comparative analyses and country studies concluding with an overall Europe USA comparison

Trust and Transparency in an Age of Surveillance Lora Anne Viola, Paweł Laidler, 2021-11-29 Investigating the theoretical and empirical relationships between transparency and trust in the context of surveillance this volume argues that neither transparency nor trust provides a simple and self evident path for mitigating the negative political and social consequences of state surveillance practices Dominant in both the scholarly literature and public debate is the conviction that transparency can promote better informed decisions provide greater oversight and restore trust damaged by the secrecy of surveillance The contributions to this volume challenge this conventional wisdom by considering how relations of trust and policies of transparency are

modulated by underlying power asymmetries sociohistorical legacies economic structures and institutional constraints They study trust and transparency as embedded in specific sociopolitical contexts to show how under certain conditions transparency can become a tool of social control that erodes trust while mistrust rather than trust can sometimes offer the most promising approach to safeguarding rights and freedom in an age of surveillance The first book addressing the interrelationship of trust transparency and surveillance practices this volume will be of interest to scholars and students of surveillance studies as well as appeal to an interdisciplinary audience given the contributions from political science sociology philosophy law and civil society The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Public Relations and Social Theory Øyvind Ihlen, Magnus Fredriksson, 2009-03-30 Public Relations and Social Theory broadens the theoretical scope of public relations through its application of the works of prominent social theorists to the study of public relations The volume focuses on the work of key social theorists including Jürgen Habermas Niklas Luhmann Michel Foucault Ulrich Beck Pierre Bourdieu Anthony Giddens Robert Putnam Erving Goffman Peter L. Berger Gayatri Chakravorty Spivak Bruno Latour Leon Mayhew Dorothy Smith and Max Weber Unique in its approach the collection demonstrates how the theories of these scholars come to bear on the understanding of public relations as a social activity Understanding public relations in its societal context entails a focus on such concepts as trust legitimacy understanding and reflection as well as on issues of power behavior and language Each chapter is devoted to an individual theorist providing an overview of that theorist's key concepts and contributions and exploring how these concepts can be applied to public relations as a practice Each chapter also includes a box giving a short and concise presentation of the theorist along with recommendation of key works and secondary literature Overall this volume will enhance understanding of theories and their applications in public relations expanding the breadth and depth of the theoretic foundations of public relations It will be of great interest to scholars and graduate students in public relations and strategic communication

The Rise and Fall of Social Cohesion Christian Albrekt Larsen, 2013-06-20 The book explores the ways in which social cohesion measured as trust in unknown fellow citizens can be established and undermined It examines the US and UK where social cohesion declined in the latter part of the twentieth century and Sweden and Denmark where social cohesion increased and aims to put forward a social constructivist explanation for this shift Demonstrating the importance of public perceptions about living in a meritocratic middle class society the book argues that trust declined because the Americans and British came to believe that most other citizens belong to an untrustworthy undeserving and even dangerous bottom of society rather than to the trustworthy middle classes In contrast trust increased amongst Swedes and Danes as they believed that most citizens belong to the middle of society rather than to the bottom Furthermore the Swedes and Danes came to view the perceived narrow bottom of their society as trustworthy deserving and peaceful The book argues that social cohesion is primarily a cognitive phenomenon in contrast to

previous research which has emphasized the presence of shared moral norms fair institutions networks engagement in civil society etc The book is based on unique empirical data material where American survey items have been replicated in the British Social Attitude survey and the Danish and Swedish ISSP surveys exclusively for this book It also includes a unique cross national study of media content covering a five year period in UK Sweden and Denmark It demonstrates how the bottom and the middle is differently constructed across countries

Trust Matters Raquel Barradas de Freitas,Sergio Lo Iacono,2021-11-11 This book examines the role of trust in public life It seeks to contribute to a more nuanced understanding of certain fundamental concepts in political and legal theory such as the concepts of authority power social practice the rule of law and justice by furnishing and sharpening our concepts of trust and trustworthiness Bringing together contributors from across the social cognitive historical and political sciences the book opens up inquiries into central concepts in legal theory as well as new approaches and methodologies The interdisciplinary contributions analyse the notions of trust trustworthiness and distrust and apply them to address a variety of problems and questions

The Handbook of Social Capital Dario Castiglione,Jan W. van Deth,Guglielmo Wolleb,2008-04-17 Social capital is a relatively new concept in the social sciences In the last twenty or so years it has come to indicate that networks of social relationships represent a resource for both the individual and society since they provide support for the individual and facilitate collective action Although this is not an entirely new idea the more systematic way in which social capital captures such an intuition has created a new theoretical paradigm and helped to develop a series of innovative research programmes in politics economics and the study of human well being The concept has gained currency beyond academia extending its influence to political and policy making circles at local national and international levels It has also affected the way in which social surveys are conceived and public policies assessed As the idea of social capital has spread the literature about it has increased exponentially After twenty years of rapid expansion it is time for a more considered and critical assessment of how the original concept has been adapted and refined and how successful its application has been The Handbook of Social Capital intends to do precisely that It offers a state of the art view of discussions about the concept of social capital and the way in which it has been applied in empirical research The organization of the Handbook reflects this intention by focusing on conceptual development and analysis in the first part by identifying two main areas of research in which social capital has favoured the development of new and influential research programmes political participation in democratic societies and economic development and by exploring the more normative and policy oriented consequences of social capital All chapters comprising the volume were specifically written for the Handbook by some of the main experts in the fields The book provides authoritative and innovative introduction to the study of social capital

Handbook of Social Capital Gert Tinggaard Svendsen,Gunnar Lind Haase Svendsen,2009 Given the current global economic crisis that has its root causes in the psychology of the marketplace every bit as much as any other factor the Handbook of Social Capital is timely insightful

informed informative thoughtful and thought provoking reading A compilation of impressive and extensive scholarship the Handbook of Social Capital is strongly recommended for academic and professional library reference collections Library Bookwatch Midwest Book Review The Handbook of Social Capital offers an important contribution to the study of bonding and bridging social capital networks balancing the troika of sociology political science and economics Eminent contributors including Nobel Prize winner Elinor Ostrom explore the different scientific approaches required if international research is to embrace both the bright and the more shadowy aspects of social capital The Handbook stresses the importance of trust for economies all over the world and contains a strong advocacy for cross disciplinary work within the social sciences Social capital is becoming one of the most important and hotly discussed topics of today This inter disciplinary Handbook intends to serve as a bridge for students and scholars across the social sciences Reframing Social Citizenship Peter

Taylor-Gooby, 2010-11-04 Throughout the world governments are restructuring social and welfare provision to give a stronger role to opportunity aspiration and individual responsibility and to competition markets and consumer choice This approach centres on a logic of individual rational action people are the best judges of what serves their own interests and government should give them as much freedom of choice as possible The UK has gone further than any other major European country in reform and provides a useful object lesson This book analyses the pressures on social citizenship from changes in work and the family political actors population ageing and the processes within government in the relentless international process of globalization that have shaped the response It examines the various social science approaches to agency and argues that the logic of rational action is able to explain how reciprocity arises and is sustained but offers a weak foundation for social inclusion and social trust It will only sustain part of the welfare state A detailed assessment of empirical evidence shows how the outcomes of the new policy framework correspond to its theoretical strengths and limitations Reforms have achieved considerable success in delivering mass services efficiently They are much less successful in redistributing to more vulnerable low income groups and in maintaining public trust in the structure of provision The risk is that mistrustful and disquieted voters may be unwilling to support high spending on health care pensions and other benefits at a time when they are most needed In short the reform programme was undertaken for excellent reasons in a difficult international context but risks throwing the baby out with the bathwater
