

# SOCIAL VALUES

Social values refer to the values of a society or social group. These are the values that keep the society functioning and cohesive.

## OVERVIEW

Social Values are the principles or standards that a group or society deems important and acceptable. They guide behavior and interactions within a society and often form the basis of social norms and laws. They are necessary to keep the society functioning smoothly and harmoniously. Examples include respect for others, honesty, and cooperation.

## EXAMPLES

- **Honesty:** Honesty means telling the truth, but also avoiding deception and ensuring you are not misrepresenting facts.
- **Respect:** Respect refers to honoring others by treating them with dignity. To be respectful, we would aim to be polite, kind, and honor other people's wishes.

**Values and Development in Southern Africa** Hans-Peter Müller, Pinkie Mekgwe, Marvellous Mynard Mhloyi, 2013  
Development has been on Africa's agenda for a long time but progress has been both varied and limited partly due to the diverse levels of the discussions on the challenges and the interventions for tackling them Africa's greatest challenge is the uneven development within and between its countries and the pressing issues of extreme poverty in southern Africa and the continent as a whole Poverty causes its victims to suffer social exclusion and political repression In addition societies that experience poverty are also mostly under continuous threat of ecological disasters and diseases This book focuses on the social and cultural dimensions of development dynamics and in particular the role of values in shaping development Values are at the core of the hopes and aspirations of individuals communities and societies The book therefore explains the values that motivate and inform African communities and societies with a view to facilitating a dialogue about sustainable development in Africa among academics intellectuals policy and decisionmakers and the communities themselves

**Lonergan, Social Transformation, and Sustainable Human Development** Joseph Ogbonnaya, 2013-01-29  
Secular contemporary development discourse deals with the problems of societal development and transformation by prioritizing the human good in terms of vital and social values with the aim of providing the basic necessities of life through social institutions that work While such an approach is profitable by promoting economic growth it does not take note of other dynamics of social progress and development Also it fails to notice the consequences of development strategies on human flourishing well being and happiness Ogbonnaya argues for an integral approach to development by engaging in a fruitful dialogue between Bernard Lonergan's philosophical anthropology with contemporary development discourse as represented in select theories of development and in select principles of Catholic social teaching It makes a case for social progress and transformation as emanating from human understanding Also it highlights the parts of Lonergan's theory that contribute to an understanding specifically of his treatment of bias and of the shorter and longer cycles of societal decline In view of the reality of moral impotence and limitations it considers the reversal of societal decline as possible through the supernatural solution of God's grace

**Development, Values, and the Meaning of Globalization: A Grassroots Approach** Gasper F. Lo Biondo, S.J., Rita M. Rodriguez, 2012-01-03  
Can one envision economic growth that is also sustainable because it takes into account the cultural moral and religious values of those intended to benefit from economic development To explore this question the Woodstock Theological Center launched a collaborative research effort involving 40 Jesuit centers around the world taking as its raw material the stories of specific mostly poor individuals and their communities as they were touched by economic globalization Focusing on decisions made by the individuals as they encountered the forces of the global economy the authors discern the values and creativity that

guided these decisions and derive implications for development policy The book's methodology draws on the Jesuit approach to discernment that stresses the ethical responsibility of all development actors It envisions communities partnering with other development agents such as government business and NGO's based on a better understanding of the values that drive decisions

*Antidevelopment Debate* Dr Martha Jalali Rabbani,2013-03-28 Reflecting on the philosophical assumptions that sustain the development debate Rabbani analyzes how the modern project of development and the antidevelopment discourse reduce the human condition to a struggle for self preservation and likewise social and international cooperation to a strategic and self

defeating process The book centers on core inconsistencies in the rationale of both discourses as they stand for individual autonomy collective self determination and mutual respect Building these social goals around the requirement of non interference in individual or collective affairs neither discourse can practically enhance nor coherently sustain respect to people s freedom and diversity The author argues that any real alternative to the normative reductions and actual destructions carried on by international development theory and practice would have to recover the non contingent solidarity implied in people s search for self understanding Awareness of this human condition in its turn actively fosters relations of universal inclusion and global friendship Instructors and graduate and undergraduate students in the fields of peace studies development studies political sciences and political philosophy professionals and volunteers working in governmental and non governmental organizations and development agencies will find this volume ideally fit for purpose Global Values Education Joseph Zajda,Holger Daun,2009-08-11 Global Values Education Teaching Democracy and Peace which is the seventh volume in the 12 volume book series Globalisation Comparative Education and Policy Research presents scholarly research on major discourses in values education globally It provides an easily accessible practical yet scholarly source of information about the international concern in the field of globalisation and comparative education Above all the book offers the latest findings to the critical issues concerning major discourses in comparative education in values education in the global culture It is a sourcebook of ideas for researchers practitioners and policy makers in values education multiculturalism and moral education It offers a timely overview of current issues affecting values education comparative education and education policy research in the global culture It provides directions in values education and policy research relevant to transformational educational reforms in the twenty first century see also Zajda Rust 2009 This book critically examines the overall interplay between values education globalisation dominant ideologies and implications for policy research see also Apple 2004 It draws upon recent studies in the areas of globalisation equity social justice and the role of the State Zajda Biraimah Gaudelli 2008 It explores conceptual frameworks and methodological approaches applicable in the research covering values education globalisation equity and multicultural education Various book chapters critique the dominant discourses and debates pertaining to values education multiculturalism and relevant comparative education discourses
