leaders in this field is a must for analysts and research students. It advances the literature by addressing three important issues: measurement error, attrition and tracking. For each of these questions, the volume leads by example showing how they can be handled in specific cases. The results show that escape from poverty is a diverse phenomenon and establish the importance of country and context specificity. The volume provides an analytical platform for careful policy assessment of policy alternatives. Ravi Kanbur, Cornell University, US. At the beginning of the 2000-2010 decade, Bob Baulch, with John Hoddinott, was setting the micro-econometric agenda on poverty dynamics and chronic poverty and producing work that non-economists had to read if they wanted to conduct serious research on these issues. In this volume, though, his analytical excellence, the pursuit and methodological rigour, extraordinary energy and his ability to lead such a distinguished network of colleagues, Bob Baulch has set the research agenda on poverty dynamics and chronic poverty for the next ten years. From the foreword by David Hulme, University of Manchester, UK.

Inequality in Asia and the Pacific Ravi Kanbur, Changyong Rhee, Juzhong Zhuang, 2014-02-24. Asia's rapid economic growth has led to a significant reduction in extreme poverty but accompanied by rising inequality. This book deals with three questions: What have been the trends of inequality in Asia and the Pacific? What are the key drivers of rising inequality in the region? How should Asian countries respond to the rising inequality? Technological change, globalization and market-oriented reform have been the key drivers of Asia's remarkable growth and poverty reduction but they have also had significant distribution consequences. These three drivers of growth cannot be hindered because they are the sources of productivity improvement and betterment of quality of life. This book will be useful to those interested in policy options that could be deployed by Asian countries in confronting rising inequality.

Human Development in South Asia 2007, 2008 World Development Report 2013 World Bank, 2012-10-15. Jobs provide higher earnings and better benefits as countries grow but they are also a driver of development. Poverty falls as people work their way out of hardship and as jobs empowering women lead to greater investments in children. Efficiency increases as workers get better at what they do as more productive jobs appear and less productive ones disappear. Societies flourish as jobs bring together people from different ethnic and social backgrounds and provide alternatives to conflict. Jobs are thus more than a byproduct of economic growth. They are transformational; they are what we earn, what we do and even who we are. High unemployment and unmet job expectations among youth are the most immediate concerns. But in many developing countries where farming and self-employment are prevalent and safety nets are modest, best unemployment rates can be low. In these countries, growth is seldom jobless. Most of their poor work long hours but simply cannot make ends meet. And the violation of basic rights is not uncommon. Therefore, the number of jobs is not all that matters; jobs with high development payoffs are needed. Confronted with these challenges, policy makers ask difficult questions: Should countries build their development strategies around growth or should they focus on jobs? Can entrepreneurship be fostered, especially among the many microenterprises in developing countries or are entrepreneurs born? Are greater investments in education and training

a prerequisite for employability or can skills be built through jobs In times of major crises and structural shifts should jobs not just workers be protected And is there a risk that policies supporting job creation in one country will come at the expense of jobs in other countries The World Development Report 2013 Jobs offers answers to these and other difficult questions by looking at jobs as drivers of development not as derived labor demand and by considering all types of jobs not just formal wage employment The Report provides a framework that cuts across sectors and shows that the best policy responses vary across countries depending on their levels of development endowments demography and institutions Policy fundamentals matter in all cases as they enable a vibrant private sector the source of most jobs in the world Labor policies can help as well even if they are less critical than is often assumed Development policies from making smallholder farming viable to fostering functional cities to engaging in global markets hold the key to success **Trade Policy, Growth and Poverty in Asian**
