Social Movements And Political Reform In Hong Kong:

Social Movements and Political Reform in Hong Kong Linda Butenhoff, 1999-09-30 Hong Kong society is often regarded as politically apathetic Yet throughout its history Hong Kong experienced periodic waves of social movement activity In part the perception of an apathetic populace stems from the colonial government's laissez faire policies the society's concentration on economic development the maintenance of traditional Chinese culture and a consensus that Hong Kong would revert to Chinese sovereignty Since Hong Kong was a colony instead of evolving into a democratic government Great Britain instituted a system of elite consultation and absorption of the masses political problems through indirect participation Butenhoff addresses the question of why social movements emerged and how they influenced the process of political reform Her study presents and analyzes the activities of social movements so that a clearer picture of civil society and political change from below emerges Butenhoff integrates the literature on Hong Kong civil society and social movements into an integrated approach to analyze social movement influence in Hong Kong politics Her three case studies the independent labor movement the nontraditional Christian movement and the democracy movement are analyzed using a social movement framework She evaluates the forces that drive and sustain social movements and argues that while the Chinese and British governments debated the fate of democratic Hong Kong the Hong Kong people have been overlooked throughout the process And as a result Hong Kong social movements play an essential role in raising the awareness of the people and bringing to light the voices from below *The Dynamics of Social Movements in Hong Kong* Stephen Wing Kai Chiu, Tai Lok

Lui, 2000-01-01 Studies of Hong Kong society have long focused one sidedly upon economic prosperity and political stability Contributors to this volume redress this imbalance by taking a critical view of Hong Kong's political development from the perspectives of social conflict and collective action Instead of looking at Hong Kong from the top this volume documents the active role played by local actors from below political groups student activists trade unions women groups environmentalists and community organizers and their impact on social and political development in Hong Kong society in the context of political transition and democratization economic restructuring and an emergent local identity **Interest Groups and the**

Citizenship, Identity and Social Movements in the New Hong Kong Wai-man Lam, Luke Cooper, 2017-09-11 Hong Kong's Umbrella Revolution has been widely regarded as a watershed moment in the polity's post 1997 history. While public protest has long been a routine part of Hong Kong's political culture, the preparedness of large numbers of citizens to participate in civil disobedience represented a new moment for Hong Kong society reflecting both a very high level of politicisation and a deteriorating relationship with Beijing. The transformative processes underpinning the dramatic events of autumn 2014 have a wide relevance to scholarly debates on Hong Kong, China and the changing contours of world politics today. This book provides an accessible entry point into the political and social cleavages that underpinned and were expressed through the Umbrella Movement. A key focus is the societal context and issues that have led to growth in a Hong Kong identity and how this became highly politically charged during the Umbrella Movement. It is widely recognised that political and ethnic identity has become a key cleavage in Hong Kong society. But there is little agreement amongst citizens about what it means to be Hong Konger today or whether this identity is compatible or conflicting with being Chinese. The book locates these identity cleavages within their historical context and uses a range of theories to understand these processes including theories of nationalism, social identity, ethnic conflict, nativism and cosmopolitanism. This theoretical plurality allows the reader to see the new localism in its full diversity and complexity and to reflect on the evolving nature of Hong Kong's relationship with Mainland China.

Social Movements, Political Reform and the Transfer of Sovereignty in Hong Kong Linda Butenhoff, 1996

Rethinking the Occupy Movement in Hong Kong Shen Yang, 2024-07-25 Yang examines the political process of the Occupy Movement spanning from January 2013 when the Occupy Central with Love and Peace (OCLP) campaign was initiated to December 2014 when the Occupy Movement finally ended. This book adopts an actor-centered approach in the study of democratization and places civil society as the focus of the analysis. The OCLP campaign was an attempt to transfer leadership of democratization from political parties to civil society while the incorporation of Deliberation Days further let ordinary participants decide on the electoral proposals. The democratic ideals of civil society activists and the mobilization of radical democrats led the campaign to enter a radical position. The Chinese government interpreted democratization in Hong Kong from a regime security perspective and took a hardliner position. After the Occupy Movement finally occurred, the leadership of civil society and the conception of civil disobedience contained the radical protesters. However, after the movement, civil society organizations were blamed for its failure and contention in Hong Kong became more transgressive and decentralized. This book is a valuable resource for scholars of Hong Kong's Politics and a relevant case study for those studying the dynamics of social movements and the civil society strategy in democratic transition.
