With contributions from leading international researchers, the book reveals what social and cognitive psychology contribute to our understanding of how human judgments and decisions can be distorted and undermined. The chapters discuss the nature and functions of gullibility, the role of cognitive processes in gullibility, the influence of emotion and motivation on gullibility, and social and cultural aspects of gullibility. Underpinned by a wealth of empirical research, contributors explore captivating issues such as the psychology of conspiracy theories, the role of political gullibility, gullibility in science, the role of the internet in fostering gullibility, and the failures of reasoning that contribute to human credulity. Gullibility has become a dominant topic of interest in public discourse. *The Social Psychology of Gullibility* is essential reading for researchers, social science students, professionals, and practitioners, and all those interested in understanding human credulity and the role of gullibility in contemporary public affairs.

This book provides a highly accessible account of the way in which psychological principles and practices are applied to policing, reflecting the increasing attention being given to this area in the light of recent concerns about police training and its effectiveness. For example, the MacPherson report. The book sets out the main areas of applied psychology which have particular relevance for policing, looking at how these impact in practice on police work, retrieving information, interviewing suspects, understanding crime patterns, and profiling offenders, and negotiation and hostage taking. The author concludes with an assessment of the usefulness of psychology in police work and the pitfalls and problems which arise with its use.

Reynolds,Hugh F. Johnston,2013-11-22 Anyone who has ever been close to a seriously depressed child has undoubtedly been affected by the youngster s vulnerability misery and pain Indeed it is much like caring for a child who is in physical pain For the child in the depths of depression no activity is fun nothing can be enjoyed and no one can provide enough consolation or comfort At times the youngster may cry or whimper There may be fits of defiance or rage and sometimes withdrawal into a numb sullen silence A child in this state tries the patience of parents and siblings Remedies of every sort are tried including gifts punishments bribes lectures pleading and a host of others Such efforts occasionally provide temporary relief but more often they seem to make matters worse Commonly there is an emotional wall of anger and frustration between a depressed child and other family members that may inevitably lead to further isolation and withdrawal If too much time passes without their being helped many depressed children and adolescents come to believe that suicide offers the only real relief for their pain Currently there is a Depression Awareness Week that includes free screening at participating health and mental health
