P. Agrawal,1992 *Statistical Sources for Social Research on Western Europe 1945–1995* Franz Rothenbacher,2013-11-11 The intention of this book is to give a picture of the complex material that has been published in the field of social and econornic statistics in Western Europe Although there are many guides bibliographies and reference books on special topics of this broad theme a general overview has been missing With this book I hope to fill this gap The frame of reference is a scientific one enabling and facilitating comparative social research on Western Europe In some respect this book enlarges and updates the bibliography written by Peter Flora Quantitative Historical Sociology pub lished in Current Sociology in 1975 In principle this guide is an annotated bibli ography of the most important printed material in the field of official statistics The legitimacy of such an approach lies in the fact that even today printed statistics are the most important form of dissemination of statistical results although microcom puters CD ROMs and the Internet have changed this situation In any case a spe cial section on statistical databases is included for every country describing the main databases of the statistical offices Furthermore the Internet address of each international or national statistical institute is provided in the introductory para graph This enables the reader to get fast access to online databases and supple mentary online information on statistics via the Internet
