Redefining Diversity and Dynamics of Natural Resources Management in Asia, Volume 1 Ganesh Shivakoti, Ujjwal Pradhan, Helmi Helmi, 2016-09-01. Redefining Diversity and Dynamics of Natural Resources Management in Asia Volumes 1-4 brings together scientific research and policy issues across various topographical areas in Asia to provide a comprehensive overview of the issues facing the region. Sustainable Natural Resources Management in Dynamic Southeast Asia Volume 1 pulls together regional experts in the field to look specifically at sustainability issues across the region to see what has been implemented, what the impacts have been, and what other options are available. In the race to be a developed region, many Southeast Asian countries have foregone natural resources through haphazard use. As a result, the people are faced with numerous environmental challenges, particularly deforestation and forest degradation, biodiversity loss, and ecosystem degradation, reduction in soil quality, and decreases in the quantity of available water. Community-based forest management is the involvement of local communities in the protection, conservation, and management of public forests to prevent degradation through sustainable practices while still responding to the basic social and economic needs of local populations. When the people who depend on forest resources for their livelihoods are jointly responsible for managing and protecting them, they tend to do so in a more sustainable manner by focusing on the long-term benefits rather than the immediate short-term gains. However, when tenure rights are weak, unclear, or insecure, or offer limited benefits, people are incited to extracting more immediate benefits, resulting in suboptimal forest management and the reduction of carbon stocks. Features case studies that cover issues such as rising levels of deforestation, forest degradation, regional food security, ecosystem degradation, biodiversity loss, conflicts over natural resource use, water management issues, and impacts on local communities. Includes contributions from local researchers who are dealing with these issues first-hand and on a daily basis. Includes a comparative review on REDD implementation in different communities. Focuses on sustainability issues across the region.

for social welfare policy and practice **Social Welfare Development in East Asia** K. Tang, 2000-10-03 Comparative social policy has long neglected welfare development in Asia Not much is known about social welfare in the economically successful East Asian tigers Hong Kong Korea Singapore and Taiwan They are late starters in social welfare but each has its own trajectory of welfare development Despite the presence of extensive social welfare they have shied away from western style welfare states The presence of strong developmental states and their development ethos explain in large part the underdevelopment of state welfare **The Political Economy of Divergent Welfare States in the Global South** Elias Phaahla, 2024-02-20 This study traces the welfare regimes of Mauritius and South Africa from the early 20th century focusing on the historical circumstances that gave rise to the dominance of state funded old age pensions within their respective welfare frameworks It highlights intersections between powerful business interests the state and social forces that sowed the seeds of social entitlements Due to different mobilisation efforts of these social actors both countries have spawned welfare regimes of different persuasions Mauritius has maintained its long standing traditions as a social democracy stretching back to the late 1950s while South Africa continues relentlessly in pursuit of a liberal welfare state a journey it has treaded since 1928 when the old age pension laws first came into effect While unravelling the innermost workings of welfare state development in Mauritius and South Africa it also probes the present political and economic circumstances that have kept these two welfare regimes resolutely unchanged Against this backdrop it draws parallels between current welfare outcomes and those of old as they continue to chart their way into the future **The Crisis of Welfare in East Asia** James Lee, Kam-wah Chan, 2010-06-23 The Crisis of Welfare in East Asia adopts a unique and critical perspective on contemporary social welfare policies in East Asia This edited volume reflects on current welfare theories and challenges the dominant productivist ideology that overemphasizes the influence of work and family James Lee and Kam Wah Chan bring together authors from different social policy domains to provide an updated assessment of inadequacies and limitations in current social policies as well as the problematic theories guiding them The authors demystify the so called East Asian Welfare Model and reengage themselves in the identification of an appropriate welfare ideology which includes a selective integration of social policy and economic development The Crisis of Welfare in East Asia is a dynamic and enlightening read that will interest students of public policy and those interested in welfare capitalism **Embedding Global Markets** John G. Ruggie, 2016-12-05 John Ruggie introduced the concept of embedded liberalism in a 1982 article that has become one of the most frequently cited sources in the study of international political economy The concept was intended to convey the manner by which capitalist countries learned to combine the efficiency of markets with the broader values of the community that socially sustainable markets themselves require in order to survive and thrive Examining the concept and the institutionalized practice of embedded liberalism this collection provides a survey of the macro patterns in industrialized countries Leading scholars combine to demonstrate the benefits of embedded liberalism in practice as well as its gradual

erosion at national levels and to analyze public opinion They provide a better understanding of what embedded liberalism means why it matters and how to reconstitute it in the context of the global economy The contributors contextualize the current challenge historically and theoretically so that students scholars and policy makers alike are reminded of what is at stake and what is required
