

SOCIAL SERVICE WORKER

Social work is an academic discipline and practice-based profession concerned with meeting the basic needs of individuals, families, groups, communities, and society as a whole. Social workers help their individual and collective well-being. Social work practice draws from areas such as psychology, sociology, health, political science, community development, law, and economics. Social workers engage with systems and policies, conduct assessments, develop interventions, and enhance social functioning and responsiveness. Social work practice is often divided into three levels. Micro-work involves working directly with individuals and families, such as providing individual counseling, therapy, or assisting a family in accessing services. Mezzo work involves working with groups and communities, such as conducting group therapy or facilitating support groups. Macro work involves working for social change on a larger scale, such as advocacy, social policy, research, development, non-profit and public service administration, or working with government agencies. Starting in the 1980s, a few universities began social work management programmes, or programmes for the management of social work service organizations, in a social work education.

The social work profession developed in the 19th century, with some of its roots in philanthropy and in grassroots organizing.[6] However, responses to social needs had existed long before then, primarily from public almshouses, private charities, religious organizations, and of the Great Depression of the 1930s, increased pressure on social work to become a more defined discipline as social workers responded to the child welfare concerns related to widespread poverty and absence of child labour in industrial settings.

Social work is a broad profession that intersects with several disciplines. Social work organiza-

tions offer the following definitions: Social work is a practice-based profession and an academic discipline that promotes social change and development, social cohesion, and the empowerment and liberation of people. Principles of social justice, human rights, collective responsibility and respect for diversities are central to social work. Underpinned by theories of social work, social sciences, humanities, and indigenous knowledge, social work engages people and communities to address life challenges and en-

hance their well-being. The profession is concerned with helping individuals, families, groups, and communities to enhance their individual and collective well-being and help people develop their skills and resources to solve their problems. Social workers engage with individual and communities to address social issues such as unemployment, and do-

social work involves aspects of the professional social work, social principles, and techniques to achieve the following ends: helping people access social services, counselling and working with individual families, and working with groups provide social and health services, and participating in legislative processes. The practice of social work requires knowledge of human development and behavior, social and economic, and cultural contexts, and the interaction of all these factors.

Social workers help individuals and families to meet their needs in their lives. This may be to protect vulnerable people from harm, such as supporting people to live independently. Social workers support people, act as advocates and direct people to the services they may require. Social workers often work in multi-disciplinary teams alongside

stress of life has created in most of the sick and in many who call themselves well Without recognizing and treating these ills of the mind it is impossible to control the bodily sufferings for which people consult the doctor The doctor must be a psychologist an educator a physician to the whole man body and soul alike But can he Again team work is the need The doctor must work with the educator the psychologist and the minister as well as with the philanthropist Only in this way can he become himself an educator a teacher putting the truth into his patients minds and letting it do its own work there 3 The problem of truth speaking vs deception and concealment in medical practice springs naturally out of the newer educational and preventive work which is being recognized to day as the core of medical helpfulness to the public as a whole To fool a patient is tyranny not guidance He must understand what is being done for him if he is to do his part properly This means team work of doctor and patient

Social Service and the Art of Healing Dr Richard C Cabot, 2020-09-07 Dr Richard Cabot describes how successful treatment of patients in the modern world requires teamwork between doctor social workers and educators Writing in 1909 much of what the author describes is a forerunner to treatments and medical services seen in the modern day the connection between medical conditions and outpatient care in

the community is well established Ideas regarding physical rehabilitation and reintegration into the community are vital for the health of the society Notions of public health whereby preventative medicine and care in the community is promoted and delivered were at a far simpler stage when Dr Cabot published his assessments For medical practitioners and social workers in the modern day this book acts as both a historical record and as an impression of how injury and disease were handled in the period At the time social work was associated more with charities than with government agencies funded for the public good The past ravages of fearful illnesses such as typhoid and tuberculosis are clear it is certain that containment and treatment of these ailments is a matter of educating the population As such Cabot s writings are a prospectus of care a list of ideas and concepts that could contribute to a healthier happier populace
