This second edition of a widely respected textbook is one of the few resources available to provide an overview of human need as a key concept in the social sciences. Taking an approach encompassing both global North and South, this accessible and engaging book models existing practical and theoretical approaches to human need while also proposing a radical alternative. Incorporating crucial current debates and illustrations, the author explores distinctions between different types and levels of need, how different approaches are reflected in different sorts of policy goals, debates about the relationship between needs, rights and welfare, contested thinking about needs in relation to caring, disadvantage and humanity. Fully revised and updated.

Families in Distress Malcolm Bush,2024-03-29 *Families in Distress* Public Private and Civic Responses explores the complex and often contentious interplay between public and private sectors in addressing the needs of children from troubled families The book critiques the conventional debate over the roles of governmental versus private welfare services arguing that this dialogue is too simplistic The author emphasizes the importance of considering individuals as citizens who have rights and responsibilities rather than just as clients in need of help By introducing the concept of civic responsibility the book suggests that helping troubled families should not only be a matter of matching needs to services but also about engaging citizens in a democratic process of addressing social issues This broadens the debate by proposing that civic participation in the form of community involvement and oversight is essential to improving the outcomes of welfare services and ensuring that citizens play a meaningful role in the welfare system The author further examines how various organizations both public and private have responded to the challenges faced by families particularly those suffering from poverty neglect and abuse While the expansion of welfare systems and professional services has provided more formalized help the book argues that these organizations often fail to address the deeper issues of family distress and may even inadvertently reinforce dependency The analysis includes a critical review of the impact of professional social work welfare policies and public services on families urging a shift towards a more citizen driven approach The book calls for a rethinking of how social welfare should operate advocating for policies that not only address immediate needs but also encourage independence and long term stability for families in distress Through this approach the book provides a thought provoking examination of the ways in which society can better balance the roles of public institutions private organizations and civic participation in responding to family crises This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1988 **Understanding the Roots of Voluntary**

Social Policy in Post-Apartheid South Africa Ndangwa Noyoo, 2019-11-01. This book critically examines the current social policy in post apartheid South Africa and proposes an alternative social policy agenda to create a new development pathway for the country. Taking social policy as a vehicle that will facilitate the creation of a new society altogether, namely the Good Society, the author argues for the adoption of policy that will socially re engineer South Africa. The author shows how the policy tools and development interventions which were undertaken by the post apartheid state in driving South Africa's transformation agenda failed to emancipate many individuals, families and communities from the cycle of intergenerational poverty and underdevelopment. He contends that social policy interventions that foster the social re engineering of South African society must take place to untangle the inherited colonial apartheid social order. This book includes comparative analyses on the Global South and Global North to present the ways in which countries such as post Second World War Great Britain and Sweden and post independence Zambia of the 1960s and 1970s were able to use social policy to create new societies altogether or places similar to the Good Society. The conceptual and methodological issues that form the basis for this book reside in public policy making and the public good and will be of interest to scholars of social policy, social development and South African society.

Public Policy and the Two States of Kansas H. George Frederickson, 1994. The author's survey general revenue and demographic issues and then analyzes the five policy areas: education, corrections, transportation, welfare and health that consume 84.3% of the state budget and that in terms of both cost and controversy rank highest on the state's policy agenda. Emerging from this analysis is the disturbing consensus that Kansas is an increasingly divided state: one urban, younger and wealthier; the other rural, older and poorer.
