Socialism And Survival Articles Essays And Talks 1979-1982:

Socialism and Survival Rudolf Bahro, 1982 When the threats of nuclear war and eco catastrophe put human existence in question there is no time for traditional dogmas Rudolf Bahro writes as a socialist who finds his humanist values embodied today in the ecology and peace movements These have the potential to grow together into an overall movement for conversion in the metropolises in which all forces of emancipation will find a place In today's extreme situation Bahro looks to a mobilisation of human energies of the kind generally associated with religion more than politics Socialism and Survival will raise many socialist hackles but it offers help and encouragement to the growing number who share Bahro's own priorities

The Dialectics of Ecology John Bellamy Foster, 2024-04-01 Explores ecological socialism's potential against capitalist environmental degradation Today the fate of the earth as a home for humanity is in question and yet contends John Bellamy Foster the reunification of humanity and the earth remains possible if we are prepared to make revolutionary changes As with his prior books *The Dialectics of Ecology* is grounded in the contention that we are now faced with a concrete choice between ecological socialism and capitalist exterminism and rooted in insights drawn from the classical historical materialist tradition In this latest work Foster explores the complex theoretical debates that have arisen historically with respect to the dialectics of nature and society He then goes on to examine the current contradictions associated with the confrontation between capitalist extractivism and the financialization of nature on the one hand and the radical challenges to these represented by emergent visions of ecological civilization and planned degrowth on the other The product of contemporary ecosocialist debates *The Dialectics of Ecology* builds on earlier works by Foster including Marx's *Ecology and The Return of Nature* aimed at the development of a dialectical naturalism and the formation of a path to sustainable human development

After the Anthropocene Anne Fremaux, 2019-03-25 The environmental crisis is the most prominent challenge humanity has ever had to battle with and humanity is currently failing The Anthropocene or so called age of humans is indeed a period when the survival of humanity has never been so much at risk This book locates itself in the field of critical green political theory Fremaux's analysis of the current environmental crisis calls for us to embrace radical shifts in our modes of being or in other words socially progressive innovations that will be described within the unique framework of Green Republicanism In offering a constructive and emancipatory delineation of what could be considered an ecological civilization that is respectful of its natural environment and social differences this book describes how to shift from an arrogant speciesism and materialistic lifestyle to a post anthropocentric ecological humanism focusing on the good life within ecological limits This new political regime calls for a radical reinvention of our societies a decentering of the humans within our metaphysical worldview and a withdrawal of the capitalist technosphere at the benefit of the biosphere It will require a new economic paradigm that replaces the unsustainable capitalist logic of growth by sustainable degrowth and steady economics Rooted in ethical thinking and political philosophy this book seeks to offer a concrete roadmap of how sustainable

societies can be fostered *Post-Marxism* Stuart Sim,2013-04-15 This book traces the crystallisation of post Marxism as a specific theoretical position in its own right and considers the role played in its development by post structuralism postmodernism and second wave feminism It examines the history of dissenting tendencies within the Marxist tradition and considers what the future prospects of post Marxism are likely to be **Necroculture** Charles Thorpe,2016-06-24 In this book the author draws on Karl Marx s writings on alienation and Erich Fromm s conception of necrophilia in order to understand these aspects of contemporary culture as expressions of the domination of the living by the dead under capitalism Necroculture is the ideological reflection and material manifestation of this basic feature of capitalism the rule of dead capital over living labor The author argues that necroculture represents the subsumption of the world by vampire capital

Political Action and Social Identity Gareth Rees,1985-05-16 Visual Culture of Post-Industrial Europe Frances Guerin,Magda Szczesniak,2025-10-01 Visual Culture of Post Industrial Europe investigates visual cultural projects in Europe from the 1970s onwards in response to industrial closures resultant unemployment diminished social services and shattered identities Typically art and visual cultural creations at one time thriving European heartlands strive to make the industrial past visible negotiable and re imaginable Authors discuss varied and multiple types of art and visual culture that remember the sometimes invisible past create community in the face of social disintegration and navigate the dissonance between past and present material reality They also examine art and visual objects at post industrial European sites for their aesthetic historical and sociological role within official and unofficial government and community regeneration and re vitalisation efforts Sites range from former coal and steel plants in Duisburg through shipyards and harbours of Gdansk and Hamburg a Moscow paper factory and textile factories in Albania to still functioning Croatian metalworks **Paper Revolutions** Sarah E. James,2022-03-29 The experimental practices of a group of artists in the former East Germany upends assumptions underpinning Western art s postwar histories In Paper Revolutions Sarah James offers a radical rethinking of experimental art in the former East Germany the GDR Countering conventional accounts that claim artistic practices in the GDR were isolated and conservative James introduces a new narrative of neo avantgarde practice in the Eastern Bloc that subverts many of the assumptions underpinning Western art s postwar histories She grounds her argument in the practice of four artists who uniquely positioned outside academies museums and the art market as these functioned in the West created art in the blind spots of state censorship They championed ephemeral practices often marginalized by art history postcards and letters maquettes and models portfolios and artists books Through their lived modernism they produced bodies of work animated by the radical legacies of the interwar avant garde James examines the work and daily practices of the constructivist graphic artist painter and sculptor Hermann Gl ckner the experimental graphic artist and concrete and sound poet Carlfriedrich Claus the mail artist concrete poet and conceptual artist Ruth Wolf Rehfeldt and the mail artist visual poet and installation artist Karla Sachse She shows that all of these artists rejected the idea of art as a commodity or a rarefied

object and instead believed in the potential of art to create collectivized experiences and change the world James argues that these artists entirely neglected by Western art history produced some of the most significant experimental art to emerge from Germany during the Cold War

Socialism and Survival Rudolf Bahro, 1982 *After Capitalism* Seymour Melman, 2001 *After Capitalism* is the apex of the life's work of one of the most respected scholars of the American workplace For nearly half a century Seymour Melman has been an influential commentator on capitalism militarism and their discontents In *After Capitalism* he explores a growing trend in capitalist systems worldwide workplace democracy The end of the Cold War in 1991 inspired an unprecedented outburst of triumphalist rhetoric among proponents of unfettered capitalism Free marketeers believed that we were witnessing the end of history and proclaimed that the market economy was here to stay that all alternatives had been proven inferior Melman in dissent tracks the increasing social and economic inequities and the resulting cries for workplace reform He points out the ominous parallels between the Soviet Union's planned economy and the relentless onward march of American capitalism Just as the Soviet planned economy venerated the State above all else American capitalism views the health and eternal expansion of the free market as the ultimate goal both propagate vast and harmful income gaps both rely on and promote militarism and neither leaves much room for consideration of workers well being Melman analyzes the adverse economic impact of these flaws and oversights which have led to grave production weaknesses in the U S economy and he suggests an alternative to current economic organization that holds out the promise of both greater fairness and equity and more soundly balanced production Workplace democracy in which workers actively participate in the management of their workplace is gaining ground in venues as diverse as Israeli kibbutzim and Basque factories Melman explains how workplace democracy can and why it should be implemented in America *After Capitalism* is the new century's first essential book about labor thoughtful humane at once commonsensical and revolutionary Melman's prescriptions can inspire changes in the way the world works

Economy and Society P. J. Devine, Fikret Adaman, 2002 Reinterprets the history of economic thought and re-examines the idea of money as a medium of exchange

The Sociology of the Environment M. R. Redclift, Graham Woodgate, 1995 In *The Sociology of the Environment* Michael Redclift and Graham Woodgate have brought together a diverse collection of writings from within the human sciences These papers chart the progress which sociology has made in addressing the environment Although they are not all written by sociologists they do illuminate a number of largely unresolved issues for sociology which mark important departures for the discipline and which necessitate a radical rethink of inherited assumptions The readings are organized under a number of different themes ranging from the theoretical foundations of the discipline to post industrial Utopianism Other areas covered include Marxism and the environment neo Malthusianism and environmental determination biocentric theories radical ecology scientific enquiry and the environment international perspective and social movement and the environment The editors conclude that sociology still has much to do in rising to the challenge of interpreting environmental change indicating that

this must be done by forging relationships with other disciplines in which the contribution that sociology can make is underlined rather than lost **Bridging the East-West Divide** ,1984 **Age of Democracy** John Alwyn Mathews,1989

Contemporary Political Ideologies Lyman Tower Sargent,1996 Presents broad coverage of ideologies in an objective manner Public Administration Series--Bibliography ,1987 *Social Ecology* Mary A. Vance,1987 **La naturaleza ante la tríada divina: Marx, Durkheim, Weber** José Luis Lezama,2019-08-12 Este libro somete a revisi n la idea ampliamente difundida por la sociolog a ambiental contempor nea de que los padres fundadores del pensamiento social los que aqu han sido agrupados bajo el nombre de la tr ada divina Marx Durkheim y Weber no concibieron a la naturaleza como un factor influyente en el curso de la acci n social ni tampoco la incluyeron en sus planteamientos ticos y morales de tal manera que el sometimiento y la devastaci n que sobre ella ejerce el despliegue de la sociedad moderna industrial no provocaron en ellos la condena moral ni generaron una verdadera conciencia ambiental una en la cual la naturaleza apareciera como un fin en s misma y no como simple medio del capital o de cualquier proyecto de redenci n humana
