**Socialist Practice** Victor Wallis, 2020-02-18 The level of popular discontent in the United States as elsewhere has shown a dramatic increase in recent years but has yet to crystallize into a cohesive anti capitalist political force Socialist Practice aims to contribute to a popular movement for socialism It does so by 1 revisiting under present conditions longstanding questions of Marxist theory and revolutionary history and 2 illustrating the range of issues activities and forms of expression that can both inform and be informed by a Marxist approach Essays spanning a range of national experiences address the crying need to generate a society wide awakening grounded in purposeful discussion among all those the vast majority whose interests are ill served by continuation of the status quo      **From Radical Marxism to Knowledge Socialism** Michael A.

Peters, Liz Jackson, 2021-12-22 This volume examines the place of Marxist theory in the history of the journal Educational Philosophy and Theory primarily through the selection and exploration of typical and significant articles exploring Marxist related themes in the journal over time The title From Radical Marxism to Knowledge Socialism reflects this historical approach In the 1960s and 1970s Marxism was considered to be a radical extreme political theory while western liberalism and a free market economy were largely taken for granted as natural phenomena in western philosophy of education and in the journal More recently educational theorists have begun to explore trends related to the neoliberal age Paradoxically such trends include the move toward knowledge socialism which decenters the normative presuppositions of knowledge capitalism as the latest iteration of western liberalism The volume begins with an introductory chapter that examines the history of Marxism in western philosophy and philosophy of education The rest of the book features works selected from the journal that further illustrate the evolution of Marxist theoretical perspectives in the field over time This collection thus gives a sense of the range and extent of Marxist inspired thinking in educational philosophy and theory This book will be of interest to students and scholars of educational philosophy and theory and others who are interested in exploring in depth the evolution of key themes in this field over time including liberalism ideology Marxism neoliberalism knowledge construction capitalist and socialist schooling and other aspects of economic analysis in education      **Against Global Apartheid** Patrick

Globalization and Patterns of Labour Resistance Jeremy Waddington, 2018-10-24 The implications of globalization for labour are more often asserted than analyzed This collection and its companion volume The Global Economy National States and the Regulation of Labour edited by Paul Edwards and Tony Elger seek to remedy this deficiency by presenting contemporary research on the relationship between the globalization of production and the regulation of labour It examines the relations between specific patterns of labour control production regimes and approaches to national labour regulatory regimes The contributors assess the nature and form of labour resistance and accommodation across a range of manufacturing industries in different national contexts

Class Struggle in Hollywood, 1930-1950 Gerald Horne, 2022-02-24 A taut narrative in elegant prose Horne has unearthed a vitally important and mostly forgotten aspect of Hollywood and labor history Publishers Weekly As World War II wound down in 1945 and the cold war heated up the skilled trades that made up the Conference of Studio Unions CSU began a tumultuous strike at the major Hollywood studios This turmoil escalated further when the studios retaliated by locking out CSU in 1946 This labor unrest unleashed a fury of Red baiting that allowed studio moguls to crush the union and seize control of the production process with far reaching consequences This engrossing book probes the motives and actions of all the players to reveal the full story of the CSU strike and the resulting lockout of 1946 Gerald Horne draws extensively on primary materials and oral histories to document how limited a threat the Communist party actually posed in Hollywood even as studio moguls successfully used the Red scare to undermine union clout prevent film stars from supporting labor and prove the moguls own patriotism Horne also discloses that unnoticed amid the turmoil organized crime entrenched itself in management and labor gaining considerable control over both the product and the profits of Hollywood This research demonstrates that the CSU strike and lockout were a pivotal moment in Hollywood history with consequences for everything from production values to the kinds of stories told in films to permanent shifts in the centers of power

**Is the East Still Red?** Gary Blank, 2015-02-27 Does China represent a non capitalist alternative to neoliberal development models Commentators on the left have offered sharply divergent assessments over the last two decades A few still cling the old dream of market socialism twinning efficiency with social justice For most however China is proof that market reforms invariably yield dispossession inequality and capitalist restoration Is the East Still Red argues that both interpretations are wrong and exhibit a common failure to distinguish between market mechanisms and capitalist imperatives Gary Blank situates the Chinese experience within broader Marxist debates on socio historical transitions and primitive accumulation highlighting the need to conceptualize capitalism as a unique system in which producers and appropriators depend on the market for their reproduction Despite years of marketization the mandarins in Beijing have not yet imposed full market dependence in industry and agriculture He shows

how the resistance of workers and peasants the imperatives of party state legitimacy and the reproductive strategies of individual Communist officials and managers all act to perpetuate central aspects of a bureaucratic collectivist system in which direct producers and bureaucrats are effectively merged with the means of production The People's Republic may be a non capitalist market alternative albeit one that is hardly edifying for socialists **The Socialist Register** Ralph

Miliband, John Saville, 2003 **Rethinking Revolution** Leo Panitch, Greg Albo, 2016-12-01 One hundred years ago October 1917 galvanized leftists and oppressed peoples around the globe and became the lodestar for 20th century politics Today the left needs to reckon with this legacy and transcend it Social change as it was understood in the 20th century appears now to be as impossible as revolution leaving the left to rethink the relationship between capitalist crises as well as the conceptual tension between revolution and reform Populated by an array of passionate thinkers and thoughtful activists Rethinking Revolution reappraises the historical effects of the Russian revolution positive and negative on political intellectual and cultural life and looks at consequent revolutions after 1917 Change needs to be understood in relation to the distinct trajectories of radical politics in different regions But the main purpose of this Socialist Register edition one century after Red October is to look forward to what might happen next Acclaimed authors interrogate and explore compelling issues including Greg Albo New socialist strategies or detours Jodi Dean Are the multitudes communing Revolutionary agency and political forms today Adolph Reed Are racial minorities revolutionary agents Zillah Eisenstein Revolutionary feminisms today Nina Power Accelerated technology decelerated revolution David Schwartzman Beyond global warming Is solar communism possible Andrea Malm Revolution and counter revolution in an era of climate change Governing Financial Globalization Andrew Baker, David Hudson, Richard Woodward, 2005-02 This volume provides a wide ranging discussion of both the potential and the problems arising from the application of multi level governance literature to the monetary and financial domain **World Financial Orders** Paul Langley, 2003-08-27 World Financial Orders challenges the predominance of neo liberalism as a mode of knowledge about contemporary world finance and claims that it neglects the social and political bases as well as the malign consequences of change He looks to the field of International Political Economy IPE to construct an alternative mode one that critically restores society and politics An historical approach to IPE is advanced that accounts for modern world finance since the seventeenth century as a succession of structurally distinct hierarchical social orders This book will be of interest to those working in the field of IPE and to those scholars researchers and students from across the social sciences who seek to challenge the common sense neo liberal explanation of contemporary world finance

**Accumulations, Crises, Struggles** Baris Karaagac, 2013 This book is about the most recent phase or stage of capitalist development neoliberal globalization Neoliberalism as much a political project as an economic one is still pervasive and it continues to provide the general framework for politics and political imagination across most of the globe The book brings together a group of scholars from different parts of the world looking at the impact of neoliberalism on societies And as such

it contributes as much to the critique and overcoming of this process as to its analysis With its extensive coverage both geographically and thematically the book will be of interest for students of the social sciences as well as for anyone making an effort to understand and change the world Series Politics Society and Community in a Globalizing World Vol 15

**Building Capitalism with China's Characteristics** Gregory T. Chin,2003      **Interrogating the New Economy**

Norene Pupo,Mark Preston Thomas,2010-01-01 This collection challenges outdated notions of a universal worker offering a glimpse of work organization management and worker militancy It will be of value to academics and activists alike Pam Sugiman Ryerson University      *Globalization* Robert Went,2000-08-20 Putting globalization into a historical perspective

Went convincingly demonstrates that it is not an unavoidable process but one that the Left can successfully mobilise against *History After the Three Worlds* Arif Dirlik,Vinay Bahl,Peter Gran,2000 History as a discipline faces a crisis of identity as Eurocentrism fades in a world where globalized visions compete to explain historical processes Facing the challenge squarely this volume\_comprising specialists on Asia Africa and Latin America\_explores the state of historical analysis in various world regions and appraises current views on what defines and challenges historical knowledge It is widely accepted that Eurocentrism no longer seem acceptable in a world where others are reasserting their own notions of past and future The postDWorld War II spatialities that guided both historical analysis and the division of labor in historical work are in the process of disappearing into more globalized visions Constituencies left out of history in the past are making demands for the recognition of their historical presence History as epistemology is under attack as a marker of Eurocentric modernity from non historical ways of thinking as well as from ideologies of postmodernism that deny to history its claims to truth Indeed the current situation in the field has been described by one distinguished historian as a Ocacophonous confusion O The challenge historians face is how to imagine new ways of writing history that overcome this confusion without falling back upon ideological and methodological prejudices that reproduce the problems of the past in new guises The contributors discuss how these challenges are voiced and met in their different areas of specialization Unsurprising in a volume that addresses a variety of regions and issues that are not only technically historiographical but also deeply cultural and political the authors differ in their appraisal of the challenges presented by globalization postmodernism or postcolonialism Yet they are united in their recognition of the validity of historical ways of knowing and their reaffirmation of the importance of history in grasping contemporary cultural and political problems It is because history is entangled in a Eurocentric modernity that in a postmodern world it provides the medium for articulating alternatives to Eurocentrism\_and to history itself

**Nation-States** Neil Davidson,2016-05-10 Davidson argues that a Marxist understanding of the meaning of contemporary

nation states must begin from the inseparable connections between them      **Land and Freedom** Leandro

Vergara-Camus,2014-09-11 The Zapatistas of Chiapas and the Landless Rural Workers Movement MST of Brazil are often celebrated as shining examples in the global struggle against neoliberalism But what have these movements achieved for

their members in more than two decades of resistance and can any of these achievements realistically contribute to the rise of a viable alternative Through a perfect balance of grassroots testimonies participative observation and consideration of key debates in development studies agrarian political economy historical sociology and critical political economy Land and Freedom compares for the first time the Zapatista and MST movements Casting a spotlight on their resistance to globalizing market forces Vergara Camus gets to the heart of how these movements organize themselves and how territorial control politicization and empowerment of their membership and the decommodification of social relations are key to understanding their radical development potential
