International Investment Law and the Right to Regulate Lone Wandahl Mouyal, 2016-03-10 The book considers the ways in which the international investment law regime intersects with the human rights regime and the potential for clashes between the two legal orders Within the human rights regime states may be obligated to regulate including a duty to adopt regulation aiming at improving social standards and conditions of living for their population Yet states are increasingly

confronted with the consequences of such regulation in investment disputes where investors seek to challenge regulatory interferences for example in expropriation claims Regulatory measures may for instance interfere with the investment by imposing conditions on investors or negatively affecting the value of the investment As a consequence investors increasingly seek to challenge regulatory measures in international investment arbitration on the basis of a bilateral investment treaty This book sets out the nature and the scope of the right to regulate in current international investment law The book examines bilateral investment treaties and ICSID arbitrations looking at the indicative parameters that are granted weight in practice in expropriation claims delimiting compensable from non compensable regulation The book places the potential clash between the right to regulate and international investment law within a theoretical framework which describes the stability flexibility dilemma currently inherent within international law Lone Wandahl Mouyal goes on to set out methods which could be employed by both BIT negotiators and adjudicators of investment disputes allowing states to exercise their right to regulate while at the same time providing investors with legal certainty The book serves as a valuable tool an added perspective for academics as well as for practitioners dealing with aspects of international investment law
