Society And Its Environment An Introduction:

Society and Its Environment Egbert Tellegen, Maarten Wolsink, 2014-01-02 First Published in 1998 People cannot live without changing nature They do so by breathing feeding and defecating by dressing and heating and by creating barriers against wind and water cold and heat These forms of human induced change of nature have been present since the dawn of mankind People are constantly confronted by a malignant nature against which they have to defend themselves and whose resources they have to use in order to survive However the relationship between man and nature has dramatically changed during the past centuries More than the word nature the term environment has become strongly associated with damage and decay caused by human beings Hence in practice environment is mostly associated with problems In this book the term environment does not describe different environments and the way they are changed by human activities in general but focuses on those human induced of it What are the causes of these changes when and where are these changes considered as environmental problems and how do people react to these changes are the main questions of this book One of the possible reactions to environmental problems is the efforts to solve them The ways in which individual citizens private enterprises public authorities environmental organizations and others try to solve environmental problems is a main topic of this book

Science, Society and the Environment Michael Dove, Daniel Kammen, 2015-04-24 In an era when pressing environmental problems make collaboration across the divide between sciences and arts and humanities essential this book presents the results of a collaborative analysis by an anthropologist and a physicist of four key junctures between science society and environment The first focuses on the systemic bias in science in favour of studying esoteric subjects as distinct from the mundane subjects of everyday life the second is a study of the fire climax grasslands of Southeast Asia especially those dominated by *Imperata cylindrica* sword grass the third reworks the idea of moral economy applying it to relations between environment and society and the fourth focuses on the evolution of the global discourse of the culpability and responsibility of climate change The volume concludes with the insights of an interdisciplinary perspective for the natural and social science of sustainability It argues that failures of conservation and development must be viewed systemically and that mundane topics are no less complex than the more esoteric subjects of science The book addresses a current blind spot within the academic research community to focusing attention on the seemingly common and mundane beliefs and practices that ultimately play the central role in the human interaction with the environment This book will benefit students and scholars from a number of different academic disciplines including conservation and environment studies development studies studies of global environmental change anthropology geography sociology politics and science and technology studies

Society and the Environment Michael Carolan, 2018-05-15 Society and the Environment examines today's environmental controversies within a socio organizational context After outlining the contours of pragmatic environmentalism Carolan considers the pressures that exist where ecology and society collide such as population growth and its associated increased

demands for food and energy He also investigates how various ecological issues such as climate change are affecting our very own personal health Finally he drills into the social structural dynamics including political economy and the international legal system that create ongoing momentum for environmental ills This interdisciplinary text features a three part structure in each chapter that covers fast facts about the issue at hand examines its wide ranging implications and offers balanced consideration of possible real world solutions New to this edition are Movement Matters boxes which showcase grassroots movements that have affected legislation Discussion questions and key terms enhance the text s usefulness making Society and the Environment the perfect learning tool for courses on environmental sociology **Society and the**

Environment Michael S Carolan,2020-03-10 Without focusing entirely on what is wrong with the world around us the third edition of Society and the Environment centers its discussion on realistic solutions to the problems that persist and examines current controversies within a socio organizational context After introducing pragmatic environmentalism Carolan discusses the complex pressures and variables that exist where ecology and society collide such as population growth and the concurrent increase in demands for food and energy and transportation and its outsized influence on urban and community patterns With further attention given to the social phenomena and structural dynamics driving today s environmental problems the book concludes with an important reflection on truly sustainable solutions and what constitutes meaningful social change Each chapter in this interdisciplinary text follows a three part structure beginning with an overview of what is wrong and why This leads into a discussion on each issue s wide ranging implications and finally a balanced consideration of realistic solutions Featuring updated and expanded examples discussion points and coverage of recent developments including the US withdrawing from the Paris Agreement booming national economies and wealth distribution growing global interest in environmental justice with particular focus on the links between injustice and race and inequality climate change and renewable energy this new edition remains an essential companion for courses on environmental sociology and sustainability *State, Society and the Environment in South Asia* Stig Toft Madsen,2013-12-16 Contemporary thinking

favours local participation and local stake holding under a decentralized democratic framework as the just and efficient solution to contemporary South Asian environmental dilemmas and crises In a series of case studies and more extensive audits a group of mainly Nordic and American authors seek to substantiate qualify or criticize this formula Covering both urban and rural environments the hills and the plains the book provides insights into the actual management and mismanagement of resources in India and Pakistan Contents Income Distribution and Environmental Degradation The State and Local Management in Colonial Irrigation Oral Histories of Environmental Change in Rajasthan The Van Gujjars and the Rajaji National Park Implementing International Regimes in India Forest Contractors as Intermediaries in Pakistan s Forestry Tragedy of Collective Action among farmers in South India International production of Pesticides Voluntary Organisations in Environmental Service Provision The Use of Metaphor in Himalayan Resource Management *Local Environmental Change*

and Society in Africa M.A. Salih, 2012-12-06 The Organization for Social Science Research in Eastern and Southern Africa OSSREA is a network of social scientists in the sub region established in 1980 Its main objectives are to encourage and promote interest to engage in collaborative research to facilitate scholarly exchange of ideas and publication between individuals and institutions engaged in the study and research in the social sciences OSSREA also aims to promote the training of social scientists from the sub region in the study of and research in the social sciences and to encourage establishment of institutions dedicated to this goal In pursuance of and consistent with its objectives OSSREA established a fund to provide research grants and training fellowships to social scientists from the sub region Every year OSSREA offers on a competitive basis two limited types of research grants the first on topics related to the social sciences in general and the second on gender issues in particular The grants assist the social scientists to conduct field research in an eastern or southern African country society institutions sector or problem area The objectives of the social science competition are intended to encourage and promote upcoming scholars from the sub region to conduct research in the social economic political or other problems Moreover it aims to strengthen and raise the capacity of faculty members and students in field research and promote the subsequent availability of research findings for teaching as well as to inform individuals and institutions

Environment and Society Paul Robbins, John G. Hintz, Sarah A. Moore, 2022-03-17 A comprehensive yet accessible introduction to the conceptual tools used to explore real world environmental problems *Environment and Society A Critical Introduction Third Edition* demonstrates how theoretical approaches such as environmental ethics political economy and social construction work as conceptual tools to identify and clarify contemporary environmental issues Assuming no background knowledge in the subject this reader friendly textbook uses clear language and engaging examples to first describe nine key conceptual tools and then apply them to a variety of familiar objects from bottled water and French fries to trees wolves and carbon dioxide Throughout the text highly accessible chapters provide insight into the relationship between the environment and present day society Divided into two parts the text begins by explaining major theoretical approaches for interpreting the environment society relationship and discussing different perspectives about environmental problems Part II examines a series of objects each viewed through a sample of the theoretical tools from Part I helping readers think critically about critical environmental topics such as deforestation climate change the global water supply and hazardous e waste This fully revised third edition stresses a wider range of competing ways of thinking about environmental issues and features additional cases studies up to date conceptual understandings and new chapters in Part I on racialized environments and feminist approaches *Environment and Society A Critical Introduction Third Edition* Covers theoretical lenses such as commodities environmental ethics and risks and hazards and applies them to touchstone environment society objects like wolves tuna trees and carbon dioxide Uses a conversational narrative to explain key historical events topical issues and policies and scientific concepts Features substantial revisions and updates including new chapters on feminism

and race and improved maps and illustrations Includes a wealth of in book and online resources including exercises and boxed discussions chapter summaries review questions references suggested readings an online test bank and internet links Provides additional instructor support such as suggested teaching models full color PowerPoint slides and supplementary teaching material Retaining the innovative approach of its predecessors *Environment and Society A Critical Introduction* Third Edition remains the ideal textbook for courses in environmental issues environmental science and nature and society theory

The Olympic Games and the Environment J. Karamichas, 2013-01-11 This book examines the environmental credentials of Olympic Host cities and the opportunities afforded by hosting the Games towards the ecological modernization of the host nation by using perspectives offered by environmental sociology It also sets out projections for the environmental legacy of London 2012

Business and Society Cynthia E. Clark, Kabrina K. Chang, Sean P. Melvin, 2020-08-11 Recipient of a 2021 Most Promising New Textbook Award from the Textbook Academic Authors Association TAA Business and Society Ethical Legal and Digital Environments prepares students for the modern workplace by exploring the opportunities and challenges they will face in today's interconnected global economy The author team discusses legal and ethical issues throughout and uses real world cases to provide students with a holistic understanding of stakeholder issues Chapters on social media and citizen movements big data and hacking and privacy in the digital age provide in depth coverage of how technology is transforming the relationship between organizations and consumers Included with this title The password protected Instructor Resource Site formally known as SAGE Edge offers access to all text specific resources including a test bank and editable chapter specific PowerPoint slides

Defending the Environment: Civil Society Strategies to Enforce International Environmental Law Linda Malone, Scott Pasternack, 2021-10-25 Defending the Environment promotes the use and awareness of several different international regional and domestic strategies designed to safeguard the environment and public health The text emphasizes practice as well as theory unlike works devoted exclusively to theoretical aspects of international environmental law and policy the authors provide the what how when where and why for resolving environmental and public health problems in front of international courts tribunals commissions committees secretariats and at times their domestic counterparts This is an indispensable handbook for anyone who needs to be aware of the important legal and political strategies made available to them by various instruments of international law Published under the Transnational Publishers imprint

Society and Its Environment Egbert Tellegen, Maarten Wolsink, 2013-10-28 First published in 1998 The concept of environment refers to the physical surrounds of human societies However the word environment is nearly always used in the context of problematic environmental problems and conditions This book looks at the different ways in which social scientists study environmental change and environmental problems It is the completely revised expanded and international edition of Tellegen and Wolsink's renowned Dutch textbook It will be recommended reading for students and teachers of Environmental Studies and Sociology courses as well as environmental managers and

policy makers and anyone seeking an understanding of how social attitudes shape our surroundings *An Introduction to Sociology* Karim Murji, Sarah Neal, John Solomos, 2021-11-03 *An Introduction to Sociology* is your essential guide to understanding the social forces that shape our lives and the world around us. This innovative textbook introduces you to the key theories, themes and concepts in the discipline of sociology and helps you to develop as a sociologist by providing comprehensive coverage of all the main areas of study. Presenting you with the history, current debates and recent research developments for each topic, this book covers everything from classical sociologies and traditional subjects such as class, families and religion through to more progressive areas like digital society, social media, migration and the interconnectedness of modern global society. The book's extensive coverage means it can be used throughout your studies from first year to final year.

Key features: Each chapter is written by an internationally renowned expert who uses specialist insight and the latest research to provide a reliable and up-to-date overview. Includes a selection of unique learning features such as 'Hear from the Expert' boxes and 'Key Cases' from around the world, as well as reflective activities and revision questions that will enhance your knowledge. Features a section titled 'What is sociology useful for?' which includes chapters on the public value of sociology and the role of sociology in contemporary society. The book is supported by a wide-ranging collection of online teaching and learning resources, including exclusive video content from SAGE Video, links to SAGE Journal Articles, sample essay questions and a selection of multiple choice questions. This definitive text is perfect for first-year sociology undergraduates and anyone studying sociology at university or college level.

Handbook on Innovation, Society and the Environment Fernando J. Díaz López, Massimiliano Mazzanti, Roberto Zoboli, 2023-10-06 Through careful investigation into the role of eco-innovation as a catalysing factor in the societal transition towards sustainability, this Handbook proposes more appropriate measures of innovation as a driver of change. It examines innovation from various perspectives, including labour, trade, the circular economy and energy, to illustrate a more comprehensive picture of its impacts.

Routledge Handbook of Environment and Society in Asia Paul G. Harris, Graeme Lang, 2014-09-19 Nowhere is the connection between society and the environment more evident and potentially more harmful for the future of the world than in Asia. In recent decades, rapid development of Asian countries with very large populations has led to an unprecedented increase in environmental problems such as air and water pollution, solid and hazardous wastes, deforestation, depletion of natural resources and extinction of native species. This handbook provides a comprehensive survey of the cultural, social and policy contexts of environmental change across East Asia. The team of international experts critically examine a wide range of environmental problems related to energy, climate change, air, land, water, fisheries, forests and wildlife. The editors conclude that with nearly half of the human population of the planet and several rapidly growing economies, most notably China, Asian societies will determine much of the future of human impacts on the regional and global environments. As climate change-related threats to society increase, the book strongly argues for increased environmental consciousness and action in Asian

societies This handbook is a very valuable companion for students scholars policy makers and researchers working on environmental issues in Asia Bulletin of the Wisconsin Natural History Society Wisconsin Natural History Society, 1905 List of members in v 2 9 11 13 *An Introduction to the Study of Society* Frank Hamilton Hankins, 1928 **The SAGE Handbook of Environment and Society** Jules Pretty, Andy Ball, Ted Benton, Julia Guivant, David R Lee, David Orr, Max Pfeffer, Professor Hugh Ward, 2007-10-30 A monumental and timely contribution to scholarship on society and environments The handbook makes it easy and compelling for anyone to learn about that scholarship in its full manifestations and as represented by some of the most highly respected researchers and thinkers in the English speaking world It is wide reaching in scope and far reaching in its implications for public and private action a definite must for serious researchers and their libraries Bonnie J McCay Rutgers University This is the desert island book for anyone interested in the relationship between society and the environment The editors have assembled a masterful collection of contributions on every conceivable dimension of environmental thinking in the social sciences and humanities No library should be without it Robyn Eckersley University of Melbourne The SAGE Handbook of Environment and Society focuses on the interactions between people societies and economies and the state of nature and the environment Editorially integrated but written from multi disciplinary perspectives it is organised in seven sections Environmental thought past and present Valuing the environment Knowledges and knowing Political economy of environmental change Environmental technologies Redesigning natures Institutions and policies for influencing the environment Key themes include locations where the environment society relation is most acute where for example there are few natural resources or where industrialization is unregulated the discussion of these issues at different scales local regional national and global the cost of damage to resources and the relation between principal actors in the environment society nexus Aimed at an international audience of academics research students researchers practitioners and policy makers The SAGE Handbook of Environment and Society presents readers in social science and natural science with a manual of the past present and future of environment society links *Environment and Society* Magnus Boström, Debra J. Davidson, 2018-06-13 This book offers a critical analysis of core concepts that have influenced contemporary conversations about environment society relations in academic political and civil circles Considering these conceptualizations are currently shaping responses to environmental crises in fundamental ways critical reflections on concepts such as the Anthropocene metabolism risk resilience environmental governance environmental justice and others are well warranted Contributors to this volume working across a multitude of areas within environmental social science scrutinize underlying worldviews and assumptions asking a common set of key questions What are the different concepts able to explain How do they take into account society environment relations What social cultural or geo political biases and blinders are inherent What actions or practices do the concepts inspire The transdisciplinary engagement and reflexivity regarding concepts of environment society relations represented in these chapters is needed in all spheres of

society in academia policy and practice not the least to confront current tendencies of anti reflexivity and denialism
