Society Action And Space An Alternative Human Geography:

Society Action and Space Benno Werlen,1993 The first English translation of a book which questions the relevance of space for the social world and in so doing offers exciting new directions for both geography and sociology **Society, Action and Space** Benno Werlen,1992 *Society, Action and Space* Benno Werlen,2003-09-02 This is the first English translation of a book which has been widely recognized in Europe as a major contribution to the interface between geography and social theory Ambitious crackling with original ideas and persuasively argued it raises exciting new implications for the study of space and social theory Global and European Polity? Henri Goverde,2017-11-01 This title was first published in 2000 The contents of this text are structured by three sub themes Firstly the internationalization of Europe This field studies threats and chances of re institutionalization of nation state societies and the role of the public sector therein acknowledging the dynamics of the ever changing international political and economic relations The second sub theme is the creative firm in a European context The object of this field is the conditions for innovative organization and management of firms in Europe taking into account the necessary adjustments to emerging European political and economic transformations The final sub theme is innovative environmental and spacial policy in a European context This section has its object in the far reaching transformations that European societies and particularly the Dutch societies are witnessing These transformations concern the functional relations and spatial and environmental conditions as well as the emerging changes in the way planning and policy institutions deal with their new targets **Transregional Europe** William Outhwaite,2020-04-13 Transregional Europe integrates work in human geography and planning with related scholarship in history and the other social sciences covering public perceptions of European macro regions and EU macro regional planning

Neolithic Landscapes Peter Topping,2002-12-01 Reprint of another classic Neolithic Studies Group volume It is a sign of the intellectual health of a specialist study group that its deliberations can generate collections of papers of general interest The topical issue of landscape is addressed although with the added complication of attempting to focus on the domestic as opposed to ceremonial aspects of Neolithic life **Narrating the City** Wladimir Fischer-Nebmaier,Matthew P. Berg,Anastasia Christou,2015-09-01 In recent decades the insight that narration shapes our perception of reality has inspired and influenced the most innovative historical accounts Focusing on new research this volume explores the history of non elite populations in cities from Caracas to Vienna and Paris to Belgrade Narration is central to the theme of each contribution whether as a means of description a methodological approach or basic story telling This book brings together research that both asks classical socio historical questions and takes narration seriously engaging with novels films local history accounts petitions to municipal authorities and interviews with alternative cinema activists Sustainable Housing Amjad Almusaed,Asaad Almssad,2022-02-23 Sustainable housing is generally used to describe housing that is environmentally friendly and resource efficient over the lifetime of the building Homes are designed to have the least possible negative

impact on the environment This means energy efficiency avoiding environmental toxins and responsibly using materials and resources while having positive physical and psychological effects on inhabitants This book presents a comprehensive overview of sustainable housing starting from legislation and ending with the design and configuration of homes *Theory in Economic Anthropology* Jean Enslinger, 2002 Comprising 13 contributions mostly based on papers presented at the annual conference of the Society for Economic Anthropology in 1998 at Northwestern University this volume focuses several themes the new institutionalism wealth exchange and the evolution of social institutions small producers interactions with the wider world commodity chains and the formal informal sector distinction and the role for big theory in economic anthropology Annotation copyrighted by Book News Inc Portland OR *Justice, Power and the Political Landscape* Kenneth Olwig, Donald Mitchell, 2019-07-09 Landscape is now on the agenda in a new way The increasing interest in justice power and the political landscape expresses a sea change occurring in the meaning of landscape itself from landscape as scenery to landscape as polity and place As Lionella Scazzosi argues The meaning of the term landscape has become broader than that of a view or panorama which characterized many national protection laws and policies until the middle of the 20th century and that of environment or nature to which it has often been limited during the recent years of environmentalist battles This is reflected in the new European Landscape Convention for which Landscape means an area as perceived by people The tide thus has turned towards J B Jackson's view of landscape as not a scenic or ecological entity but as a political or cultural entity changing in the course of history It is in this socio political context that it becomes necessary to consider the role of power and the importance of justice in the shaping of the landscape as an area of practice and performance with both cultural and environmental implications This book was previously published as two special issues of Landscape Research *The Archaeology and Anthropology of Landscape* Robert Layton, Peter Ucko, 2003-09-02 The Archaeology and Anthropology of Landscape contributes to the development of theory in archaeology and anthropology provides new and varied case studies of landscape and environment from five continents and raises important policy issues concerning development and the management of heritage **The Gospel of Luke** Joel B. Green, 1997-10-02 This highly original commentary part of the New International Commentary is unique for the way it combines concerns with first century culture in the Roman world with understanding the text of Luke as a wholistic historical narrative **The Estate Origins of Democracy in Russia** Tomila V. Lankina, 2021-12-16 A devastating challenge to the idea of communism as a great leveller this extraordinarily original rigorous and ambitious book debunks Marxism inspired accounts of its equalitarian consequences It is the first study systematically to link the genesis of the bourgeoisie cum middle class Imperial Soviet and post communist to Tzarist estate institutions which distinguished between nobility clergy the urban merchants and meshchane and peasants It demonstrates how the pre communist bourgeoisie particularly the merchant and urban commercial strata but also the high human capital aristocracy and clergy survived and adapted in Soviet Russia Under both Tzarism and communism the estate system

engendered an educated autonomous bourgeoisie and professional class along with an oppositional public sphere and persistent social cleavages that continue to plague democratic consensus This book also shows how the middle class conventionally bracketed under one generic umbrella is often two pronged in nature one originating among the educated estates of feudal orders and the other fabricated as part of state induced modernization **An Archaeology of Social**

Space James A. Delle, 2013-06-29 James Delle has solved a number of problems in Caribbean archaeology with An Archaeology of Social Space He deals with most of the problems by using historical archaeology and clearly implicates Americanist prehistorians Although this book is about coffee plantations in the Blue Mountains area of Jamaica it is actually about the whole Caribbean Just as it is about all archaeology not only historical archaeology it is also a book about colonialism and national independence and how these two enormous events happened in the context of eighteenth and nineteenth century capitalism The first issue raised appears to be an academic topic that has come to be known as landscape archaeology Landscape archaeology considers the planned spaces around living places The topic is big comprehensive and new within historical archaeology Its fundamental insight is that in the early modern and modern worlds everything within view could be made into money Seeing occurs in space and from 1450 or a little before everything that could be seen could potentially be measured The measuring and the accompanying culture of recording called a scriptural economy became a way of controlling people in space for a profit Dr Delle thus explores maps local philosophies of settlement town dwelling housing and the actual condition of plantations and their buildings now so as to describe coffee Jamaica from 1790 1860

Understanding Urban Tourism Martin Selby, 2003-12-18 Despite the formidable growth of urban tourism there has been little of the critical engagement that one would expect from the social sciences the rich potential of contemporary social science for urban tourism has yet to be realized Martin Selby's textbook makes available to practitioners and students seeking to understand the phenomenon of tourism in towns and cities the methods and concepts that are currently enhancing and transforming our understanding of society in other areas of the social sciences With an emphasis on image culture and experience the author draws upon the cultural turn to explain the human aspects of the urban tourism phenomenon The discussions emphasize the significance of urban tourism within debates upon the contemporary city postmodernity and the pursuit of social science Clearly written with case studies and further reading this book should be welcomed by students and lecturers in geography tourism planning and sociology **The Relational Economy** Harald Bathelt, Johannes

Glückler, 2011-06-23 How are firms networks of firms and production systems organized and how does this organization vary from place to place This book synthesizes theories from across the social sciences with empirical research and case studies in order to answer this question Social Science and Historical Perspectives Jack David Eller, 2016-10-04 This accessible book introduces the story of social science with coverage of history politics economics sociology psychology anthropology and geography Key questions include How and why did the social sciences originate and differentiate How are they related to

older traditions that have defined Western civilization What is the unique perspective or way of knowing of each social science What are the challenges and alternatives to the social sciences as they stand in the twenty first century Eller explains the origin evolution methods and the main figures literature concepts and theories in each discipline The chapters also feature a range of contemporary examples with consideration given to how the disciplines address present day issues

Geography Education for Global Understanding Ali Demirci,Rafael de Miguel González,Sarah Witham

Bednarz,2018-04-26 This book presents the core concepts of geographical education as a means of understanding global issues from a spatial perspective It treats education supported by high standards approaches methodologies and resources as essential in exploring the interactions of the world s human and environmental systems at local regional and global scales embedded in the nature of the discipline of geography It covers topics such as climate change sustainable development goals geopolitics in an uncertain world global crisis and population flows which are of great interest to geography researchers and social sciences educators who want to explore the complexity of contemporary societies Highly respected scholars in geography education answer questions on key topics and explain how global understanding is considered in K 12 education in significant countries around the globe The book discusses factors such as the Internet social media virtual globes and other technological developments that provide insights into and visualization in real time of the intensity of relationships between different countries and regions of the earth It also examines how this does not always lead to empathy with other political cultural social and religious values terrorism threats and armed conflicts are also essential features of the global world This book opens the dialogue for global understanding as a great opportunity for teachers educators scholars and policy makers to better equip students and future citizens to deal with global issues

Henri Lefebvre and the Theory of the Production of Space Christian Schmid,2022-11-29 Henri Lefebvre s was the major theorist of space and of the urban This is the definitive book on Lefebvre Shortlisted for the Deutscher Memorial Prize 2023 This book presents an encompassing detailed and thorough overview and reconstruction of Lefebvre s theory of space and of the urban Henri Lefebvre belongs to the generation of the great French intellectuals and philosophers together with his contemporaries Michel Foucault and Jean Paul Sartre His theory has experienced a remarkable revival over the last two decades and is discussed and applied today in many disciplines in humanities and social sciences particularly in urban studies geography urban sociology urban anthropology architecture and planning Lefebvre together with David Harvey is one of the leading and most read theoreticians in these fields This book explains in an accessible way the theoretical and epistemological context of this work in French philosophy and in the German dialectic Hegel Marx and Nietzsche and reconstructs in detail the historical development of its different elements It also gives an overview on the receptions of Lefebvre and discusses a wide range of applications of this theory in many research fields such as urban and regional development urbanization urbanity social space and everyday life

Direction and Socio-spatial Theory Matthew Hannah,2018-12-07 The embodied

directedness of human practice has long been neglected in critical socio spatial theory in favor of analyses focused upon distance and proximity This book illustrates the absence of a sense for direction in much theoretical discourse and lays important groundwork for redressing this lacuna in socio spatial theory Many accounts of the social world are incomplete or are increasingly out of step with recent developments of neoliberal capitalism Not least through new technological mediations of production and consumption the much discussed waning of the importance of physical distance has been matched by the increasing centrality of turning from one thing to another as a basic way in which lives are structured and occupied A sensibility for embodied processes of turning and for phenomena of direction more generally is urgently needed Chapters develop wide ranging and original engagements with the arguments of Sara Ahmed Jonathan Beller Edmund Husserl Martin Heidegger Virginia Held Bernard Stiegler Theodore Schatzki Rahel Jaeggi Hartmut Rosa and David Harvey This book reinterprets practice embodiment alienation reification social reproduction and ethical responsibility from a directional perspective It will be a new valuable resource and reference for political and social geography students as well as sociologists and anthropologists
