Hungary's Crisis of Democracy Peter Wilkin, 2016-08-26 This book examines the crisis of democracy that has arisen in Hungary since the election of the Fidesz government in 2010 After moving swiftly to transform the Hungarian constitution Fidesz created a new political system which has led its critics to argue that the era of democracy in Hungary is over US Senator John McCain has gone so far as to describe Hungary as an illiberal democracy on a path toward fascism The author argues that Fidesz has sought to challenge the capitalist and democratic transformation that shaped Hungary for 20 years after the fall of communism by increasing the power of the state over crucial aspects of the economy society and the political system In so doing Fidesz actions resemble those undertaken by many authoritarian states that have emerged since the end of the Second World War all aiming to build up a national capitalism and protect their economies whilst undertaking nation building To make sense of this the author draws upon two traditions of thought world systems analysis which situates Hungary in the context of its incorporation in the modern capitalist world system after the fall of communism and anarchist social thought which provides a unique way of seeing the actions of states and political elites In so doing the book argues that the events unfolding in Hungary cannot be explained on the basis of Hungarian exceptionalism but must be situated in the broader political and economic context that has shaped the development of Hungary since 1990 The form of capitalism introduced in Hungary and across the region of East and Central Europe has systematically undermined the strong state and social security that had existed under communism and when added to the failure of the left and liberals in the region it has paved the way for far right and neo fascist political movements to emerge claiming the mantle of defenders of society from the market This represents a fundamental threat to the enlightenment traditions that have shaped dominant modern political ideologies and raises profound problems for both the EU and NATO

*The Sovietization of Rural Hungary, 1945-1980* József Ö. Kovács, Gergely Krisztián Horváth, Gábor Csikós, 2023-06-05 In

this book the experiential history of the Soviet style social transformation projects between 1945 and 1980 is discussed through the example of rural Hungary The book interprets state socialism as a modernization project Existing socialism was a form of dictatorship in which authorities sought to transform the mentalities of their subjects from the individual level to the global scale This project depended on socio economic homogenization one important method of asserting state power was the transformation of property rights land redistribution collectivization Communist modernization discriminated against the inhabitants of rural areas who were the primary victims of collectivization and the discriminatory effects of the rules implemented by policymakers The resulting radical changes in peasant lifestyles would become a source of social pathologies However not the authorities but contemporary scholars considered the social costs of these actions The book aims at Weberian disenchantment and contributes to the deconstruction of the common image of Hungarian socialism the happiest barrack The intended audience includes readers at the graduate level in the fields of history political science and anthropology general readers interested in the history of communism It is hoped that the research questions inspire new research for exploring convergent and divergent elements in social transformation in former communist countries

indispensable reading for those on both sides of the Atlantic who care about the lives of the poor David Kirp author of *Gender Justice Inventing the Needy* is a theoretically engaged and methodologically innovative ethnography of Hungarian welfare regimes from 1948 to 1996 Studying the state from below her multi layered and multi sited analysis of the transformations in state policies and institutional practices and their effects on everyday life is an important contribution to comparative studies of welfare states the social construction of the materialization and materialization of need as well as to critical socialist postsocialist and feminist studies Well written lucidly argued thoughtful and thought provoking Gail Kligman author of *The Politics of Duplicity Controlling Reproduction in Ceausescu s Romania Inventing the Needy* stands at the forefront of a new generation of revisionist scholarship It dispenses with the sharp dichotomies of capitalism and communism and forsakes triumphal interpretations of the transition to the free market and liberal democracy Looking at Hungary through the eyes of women and their experiences with successive welfare regimes Lynne Haney offers a more balanced and variegated picture of the state socialist past and a more sober account of the capitalist present *Inventing the Needy* is a brilliant combination of ethnography history and theory Michael Burawoy co author of *Global Ethnography Forces Connections and Imaginations in a Postmodern World* Lynne Haney s provocative original and altogether brilliant study of welfare restructuring in Hungary in the wake of 1989 challenges us to rethink gender states and social policies in both east and west while providing essential conceptual tools for doing so Ann Shola Orloff coauthor of *States Markets Families Gender Liberalism and Social Policy in Australia Canada Great Britain and the United States* This important book engages the central issue sociology faces after the fall of communism *Inventing the Needy* is a careful empirically well documented and beautifully written analysis of the Hungarian welfare system during and after socialism Haney shows that a critical analysis of capitalism is possible from the perspective of a socialist alternative even today She challenges transitologists who often contrast an idealized capitalist present with a homogeneous and negative view of socialism This book is a must for those interested in theoretical debates about socialism and capitalism and in the welfare state and gender relations under and after socialism Ivan Szelenyi author of *Privatizing the Land Rural Political Economy in Post Communist and Socialist Societies* and co author of *Making Capitalism without Capitalists Class Formation and Elite Struggles in Post Communist Central Europe* **Tourists, Signs and the City** Michelle M. Metro-Roland, 2016-02-24 Drawing upon the literature of landscape geography tourism studies cultural studies visual studies and philosophy this book offers a multi disciplinary approach to understanding the interaction between urban environments and tourists This is a necessary prerequisite for cities as they make themselves into enticing destinations and compete for tourists attention It argues that tourists make sense of and draw meaningful conclusions about the places in which they tour based upon the interpretation of the signs or elements encountered within the built environment elements such as graffiti and lamp posts The writings of the American pragmatist Charles S Peirce on interpretation provide the theoretical model for explaining the way in which mind and world or thoughts and objects result in

tourists interacting with place This theoretical framework elucidates three applied studies undertaken with foreign visitors to the Hungarian capital of Budapest Based upon extensive ethnographic field work these studies focus on tourists interpretation of the urban landscape with particular attention paid to the encounters with national culture the role of architecture and the importance of the prosaic in urban tourism

### **Women's Access to Political Power in**

**Post-Communist Europe** Richard E. Matland, Kathleen A. Montgomery, 2003-05-01 This book considers women's access to formal positions of powers in the newly formed democracies of post communist Europe While acknowledging the relevance of recent history this book takes an important step away from the communist legacy and explicitly argues for a framework based on causal variables identified in the existing literatures from industrialized democracies on women and politics and legislative recruitment After a brief introduction the second chapter sets forth a general theoretical framework which posits that the level of female legislative representation in a given country is a function of the relative supply of and demand for female candidates After a chapter considering a broad overview of public opinion on women and politics in Eastern Europe thirteen country chapters spanning the spectrum of Eastern European democracies address and test hypotheses about the key variables affecting the supply and demand sides of the equation in individual countries Relevant aspects of the communist cultural and developmental legacy are addressed but authors give particular attention to political factors such as electoral rules and the characteristics of the emerging party systems that vary within the Eastern European countries The new democracies of Eastern Europe provide a novel context in which to test and extend our theories about the consequences of political institutions for the quality of democracy Since institutional arrangements are more malleable than developmental or cultural characteristics those variables also offer the greatest promise to scholars and practitioners wondering what can be done to improve women's access to formal arenas of political power How can we build democracies that are stable lasting and representative A careful analysis of the post communist context can help us to address issues concerning institutional design and development that has relevance well beyond the Eastern European context

every Central and East European society has been twice subject to transformation Initially Hungary was transformed by communist style modernization increasing industry expanding secondary education and improving health The second shock was the collapse of the communist regime and the introduction of democratic institutions and a market economy How much or how little impact has institutional change had on the lives of ordinary people Drawing on detailed surveys highlighted in tables and figures the authors identify long term changes in Hungary from the late 1940s to the late 1980s and provide an in depth analysis of the impact of the collapse of the communist system in the 1990s They also compare long term and short term change in Hungary with trends in other Central and Eastern European countries
