

SOCIOLOGY

Sociology is the scientific study of human society, social relationships, and the patterns of behavior that emerge within them.

OVERVIEW

Sociology explores how individuals are shaped by social structures, cultural norms, and institutions, and how they, in turn, shape society. Sociologists analyze various social phenomena such as inequality, social change, and group dynamics to understand how they impact individuals and communities.

EXAMPLES

- **Study of social institutions:** Sociology investigates how social institutions such as schools, courts, and government affect social mobility and inequality.
- **Study of gender:** Sociologists explore how gender affects people's life chances due to social stigmatization and social norms.

Sociological methodology David R. Heise, 1975 **Sociological Methodology, 1976** David R. Heise, *Mathematical Ideas and Sociological Theory* Thomas J. Fararo, 1984 First Published in 1984 Routledge is an imprint of Taylor Francis an informa company *On Durkheim's Rules of Sociological Method (Routledge Revivals)* Mike Gane, 2010-11 This radical appraisal of Durkheim's method first published in 1988 argues that fundamental errors have been made in interpreting Durkheim Mike Gane argues that to understand *The Rules* it is necessary also to understand the context of the French society in which the book was written He explores the cultural and philosophical debates which raged in France during the period when Durkheim prepared the book and establishes the real and unsuspected complexity of Durkheim's position its formal complexity its epistemological complexity and its historical complexity *Sociological Methods & Research* , 1987

Social Networks John Scott, 2002 This collection brings together the principal sources in the development of the techniques of social network analysis from early metaphorical statements in Simmel and Radcliffe Brown through the more systematic explorations in sociology and social anthropology to contemporary formalizations A new introduction explores the history of Social Networks and highlights the arguments of those who treat social network analysis as a loose qualitative approach as well as those who see its potential in technical mathematical uses The thematically organized coverage includes Part I Conceptualizing Social Networks Part II Topics and Developments in Graph Theory Part III Further Mathematical Models for Networks Part IV Applications Family and Community Part V Applications Corporate Power and Economic Structures Part VI Applications Political Protest and Policy Networks Part VII Applications Knowledge Reputation and Diffusion *Structure, Interaction and Social Theory (RLE Social Theory)* Derek Layder, 2014-08-21 A central problem in contemporary social theory is that of providing an account of social interaction that does justice both to the self-monitoring capacities of the individuals involved and to the society that frames the interaction This book attempts to resolve this problem arguing for an objectivist or structuralist account which does not undervalue the importance of the indexical and negotiated aspects of interaction and which takes seriously the Marxist rationalist critique of empiricism and humanism and the associated idea that society should be treated as a supra-individual preconstituted and constraining object of scientific analysis First Dr Layder pinpoints certain of the strengths and weaknesses of various schools of thought social psychology scrutinized in both its sociological and psychological forms sociology the Marxist rationalist approach Whilst rejecting the mechanistic or naively deterministic theories which are often associated with an objectivist stance he argues that the productive activities of situated actors must be understood as existing in an articulated relationship with and within sets of preconstituted contextual constraints This thesis is illustrated conceptually by the development of a framework which distinguishes two types and levels of social structure with different modes of production and reproduction and empirically by an analysis of aspects of interaction in the occupation of acting **Surveying Subjective Phenomena** Charles

Turner, Elizabeth Martin, 1985-03-28 In January 1980 a panel of distinguished social scientists and statisticians assembled at the National Academy of Sciences to begin a thorough review of the uses, reliability and validity of surveys purporting to measure such subjective phenomena as attitudes, opinions, beliefs and preferences. This review was prompted not only by the widespread use of survey results in both academic and non-academic settings but also by a proliferation of apparent discrepancies in allegedly equivalent measurements and by growing public concern over the value of such measurements. This two-volume report of the panel's findings is certain to become one of the standard works in the field of survey measurement. Volume I summarizes the state of the art of surveying subjective phenomena, evaluates contemporary measurement programs, examines the uses and abuses of such surveys and candidly assesses the problems affecting them. The panel also offers strategies for improving the quality and usefulness of subjective survey data. In volume II individual panel members and other experts explore in greater depth particular theoretical and empirical topics relevant to the panel's conclusions. For social scientists and policymakers who conduct, analyze and rely on surveys of the national state of mind, this comprehensive and current review will be an invaluable resource.

Measuring Underemployment Clifford C. Clogg, 2013-10-22 *Measuring Underemployment: Demographic Indicators for the United States* discusses the Labor Utilization Framework of Hauser and Sullivan which is a measurement scheme that posits the existence of three dimensions or forms of underemployment: time, income and skill utilization. This book describes the conceptual groundwork, operational measurement and implications of the Labor Utilization Framework on the way the labor force aggregates. The essential elements of the socio-demographic theory of the labor force with the logical unity provided by both the Labor Utilization Framework and the specific methodologies adopted for its analysis are also elaborated. This text likewise covers the methods for latent structure analysis and cohort analysis including the theory of frictional underemployment, class structure governing the distribution of labor market rewards, tempo of social change in the labor force, productive value of a population and true dependency on productive labor. This publication is a good source for students and researchers concerned with different labor force topics that can be plausibly studied from the viewpoint of the Hauser-Sullivan framework.

Theorising Modernity Martin O'Brien, Sue Penna, Colin Hay, 2014-07-10. What is modernity? Do we all experience modernity in the same way? How should we understand contemporary social change? This volume explores questions of modernity through critical engagements with the work of Anthony Giddens, focusing in particular on the relationships between his social theory and political sociology. Three substantive areas: reflexivity, environment and identity are examined theoretically through the relationships between reflexivity and rationality, life, politics and institutional power and universalism and difference. As well as specifically addressing Giddens' reconstruction of sociology, the contributors also explore a wide variety of critical issues currently occupying centre stage in social theory. These include questions about the character of contemporary societies, the periodisation of social change, the processes of change by which societies are constantly made and remade by people, the relationships between the social and the natural, the formation and maintenance of identities and matters of epistemology and methodology in social science. *Theorising Modernity* will be of interest to undergraduate and postgraduate students of sociology, modern political thought, social geography and social policy and to social scientists trying to make sense of the modernity debate. Martin O'Brien is Research at the University of Derby. Sue Penna is a Lecturer in Applied Social Science at Lancaster University. Colin Hay is a Lecturer in the Department of Political Science and International Studies at the University of Birmingham, UK, a Visiting Fellow of the Department of Political Science at the Massachusetts Institute of Technology, US and Research Affiliate of the Centre for European Studies at Harvard University, US.

A Piece of the Pie Stanley Lieberson, 2023-11-15. There is little question that the descendants of the new European immigrant groups from Southern Central and Eastern Europe have done very well in the United States, reaching levels of achievement far above blacks. Yet the new Europeans began to migrate to the United States in 1880, a time when blacks were no longer slaves. Why have the new immigrants fared better than the blacks? This volume focuses on the historical origins of the current differences between the groups. Professor Lieberson scoured early US censuses and used a variety of offbeat information sources to develop data that would throw light on this question as well as provide new information on occupations at the turn of the century, finding remarkable parallels between the black position in the urban South and the urban North. He examines and compares progress in education and in politics between the new Europeans and

the blacks What were the effects of segregation Why did labor unions discriminate more severely against blacks than against the new immigrant groups This book will generate a fresh interpretation of the origins of black new European differences one which explains why other nonwhite groups such as the Chinese and Japanese have done relatively well There is little question that the descendants of the new European immigrant groups from Southern Central and Eastern Europe have done very well in the United States reaching levels of achievement far above blacks Yet the new Europeans began to migrate
