Sociology After Postmodernism David Owen, 1997-03-25 Postmodernism is frequently described as dealing a death blow to sociology This book however argues that it is a mistake to conceive postmodernism in terms of a fatal attack upon what sociologists do The contributors locate the identity of sociology after postmodernism as a contested site which opens up the possibility of re imagining the enterprise of sociology They show how this re imagination might be conducted and trace some of the key potential consequences

After Postmodernism Richard Smith, Philip Wexler, 2005-09-27 This work presents a set of thematic essays aimed at clarifying the educational problems and paradoxes of postmodern educational conditions and theory The major concerns of the book are the possibility of achieving substantive political objectives and of theorising such possibilities These concerns arise from a dissatisfaction with the organisational and political conditions of postmodern educational practice The seeming inability of academics to intervene in the public sector especially in matters of equality provides a driving force to the book For individuals who care about the future of education and its role in social reconstruction the pessimistic nature of postmodern theories of society and education is an additional impetus for the book All the chapters exemplify the issues that confront lecturers in contemporary university teacher education contexts A notable feature of the book is a theme that current theorisation about education and society are historically outmoded and that the future lies in post postmodern theories

After Postmodernism Christopher K. Coffman, Theophilus Savvas, 2020-12-17 Several of American literature's most prominent authors and many of their most perceptive critics and reviewers argue that fiction of the last quarter century has turned away from the tendencies of postmodernist writing Yet the nature of that turn and the defining qualities of American fiction after postmodernism remain less than clear This volume identifies four prominent trends of the contemporary scene the recovery of the real a rethinking of historical engagement a preoccupation with materiality and a turn to the planetary Readings of works by various leading figures including Dave Eggers Jonathan Franzen A M Homes Lance Olsen Richard Powers William T Vollmann and David Foster Wallace support a variety of arguments about this recent revitalization of American literature The chapters in this book were originally published as a special issue of the journal Textual Practice

Roads to Dystopia, Sociological Essay on the Post Modern Condition (c) Stanford M. Lyman, 2001

More Than Black G. Reginald Daniel, 2010-06-25 In the United States anyone with even a trace of African American ancestry has been considered black Even as the twenty first century opens a racial hierarchy still prevents people of color including individuals of mixed race from enjoying the same privileges as Euro Americans In this book G Reginald Daniel argues that we are at a cross roads with members of a new multiracial movement pointing the way toward equality Tracing the centuries long evolution of Eurocentrism a concept geared to protecting white racial purity and social privilege Daniel shows how race has been constructed and regulated in the United States The so called one drop rule i e hypodescent obligated individuals to identify as black or white in effect erasing mixed race individuals from the social landscape For most of our history many mixed race individuals of African American descent have attempted to acquire the socioeconomic benefits of being white by forming separate enclaves or passing By the 1990s however interracial marriages became increasingly common and multiracial individuals became increasingly political demanding institutional changes that would recognize the reality of multiple racial backgrounds and challenging white racial privilege More Than Black regards the crumbling of the old racial order as an opportunity for substantially more than an improvement in U S race relations it offers no less than a radical transformation of the nation s racial consciousness and the practice of democracy

Crime, Genes, Neuroscience and Cyberspace Tim Owen, 2017-09-18

This book applies Owen's unique genetic social framework to the study of crime and criminal behaviour with an emphasis on cybercrime. Moving beyond challenges which confront contemporary criminological theorizing such as the stagnation of critical criminology, the relativistic nihilism of the cultural turn, posthumanism and virtual criminology, the author codifies and applies the latest version of the framework to the study of crime both in and out of cyberspace. Drawing upon evolutionary psychology, behavioural genetics and the philosophy of Heidegger, he introduces new terms such as Neuro Agency and notions of Embodied Cognition into criminological theorizing. Adopting a soft compatibilist approach to free will and Realist ontology, Owen's meta-theoretical focus provides a new direction for criminological theorizing in particular in the direction of the conceptualization and prediction of cyber violence. Exciting and timely, this book will appeal to scholars and advanced students of criminology, law, sociology, social policy, psychology, philosophy, policing and forensic investigation.

Improved Earth Rod Bantjes, 2005-01-01

Improved Earth is a history of the making of abstract spaces of modernity in the setting of the Canadian prairies, particularly rural Saskatchewan from 1869 to 1944. Rod Bantjes

demonstrates how three interrelated projects state formation agrarian class formation and the transformation of the environment were conceived in spatial terms and employed competing visions of spatial possibility Bantjes proposes that the prairies be thought of as a site of modernity and makes a case for viewing prairie farmers as modernists who not only embraced but took an active role in the making of modernity Indeed many of the questions that excited the imaginations of prairie politicians and reformers are alive today the ecological and social value of localization in agricultural production the potentials for community maintained and linked by transportation and communications technologies and the possibilities of democratic decentralization within large translocal networks The first systematic treatment of the spatial dimensions of the colonization of the prairie west Improved Earth is a unique and thorough study certain to provoke new debates about the way space and time are imagined
