

SYMBOLIC CRIMINOLOGIES

Symbolic interactionism is a social theory that has been applied to the study of crime and criminal justice. It is a theory that focuses on the meanings that individuals attach to symbols and how these meanings are shaped by social interaction. In the context of crime, symbolic interactionism suggests that individuals engage in criminal behavior based on the meanings they attach to the symbols of crime and the social interactions that shape these meanings. This theory has been used to explain a variety of criminal behaviors, including drug use, prostitution, and organized crime. Symbolic interactionism provides a unique perspective on crime by focusing on the subjective meanings that individuals attach to their actions and the social interactions that shape these meanings. This theory has been influential in the development of qualitative research methods in criminology, such as grounded theory and ethnography. Symbolic interactionism has also been used to inform criminal justice policy and practice, such as the development of community-based programs and the use of restorative justice. Overall, symbolic interactionism provides a valuable framework for understanding the complexities of crime and criminal justice.
