Symbolic Space French Enlightenment Architecture And Its Legacy:

Symbolic Space Richard A. Etlin, 1996-12-15 Richard A Etlin demonstrates how the conceptual basis of the modern house and the physical layout of the modern city emerged from debates among theoretically innovative French architects of the eighteenth century Examining a broad range of topics from architecture and urbanism to gardening and funerary monuments he reconsiders eighteenth century French architecture with regard to the ways in which it was informed by symbolic space This book provides an accessible introduction to a century of architecture that transformed the classical forms of the Renaissance and Baroque periods into building types still familiar today **Art, Culture, and Media Under**

the Third Reich Richard A. Etlin, 2002-10-15 This work explores the ways in which Nazi Germany used art and media to portray their country as a champion of Kultur and civilization Revealing how multiple domains of cultural activity served to conceptually dehumanize Jews this work shows how the seeds of the Holocaust were sown *The Material Cultures of*

Enlightenment Arts and Sciences Adriana Craciun, 2016-08-24 In this book the eighteenth century Enlightenment receives an important reassessment using an astonishing range of materials and objects drawn from Europe and beyond including artefacts from India and China West Africa and Polynesia A series of authoritative essays written by experts in the field explores the full range of material culture in the long eighteenth century raising crucial questions about notions of property and invention homely and commercial lives The book also includes a series of well illustrated exhibits a startling and provocative assemblage of objects from the Enlightenment world each accompanied by expert commentaries The collection of essays and exhibits is the result of collaborative debate by scholars from Europe and north America who have together worked on the cross disciplinary importance of material history in making sense of how past society was fundamentally transformed through the world of goods Geography and Enlightenment David N. Livingstone, Charles W. J.

Withers, 1999-12-15 Geography and Enlightenment explores both the Enlightenment as a geographical phenomenon and the place of geography in the Enlightenment From wide ranging disciplinary and topical perspectives contributors consider the many ways in which the world of the long eighteenth century was brought to view and shaped through map and text exploration and argument within and across spatial and intellectual borders The first set of chapters charts the intellectual and geographical contexts in which Enlightenment ideas began to form including both the sites in which knowledge was created and discussed and the different means used to investigate the globe Detailed explorations of maps created during this period show how these new ways of representing the world and its peoples influenced conceptions of the nature and progress of human societies while studies of the travels of people and ideas reveal the influence of far flung places on Enlightenment science and scientific credibility The final set of chapters emphasizes the role of particular local contexts in Enlightenment thought Contributors are Michael T Bravo Paul Carter Denis Cosgrove Stephen Daniels Matthew Edney Anne Marie Claire Godlewska Peter Gould Michael Heffernan David N Livingstone Dorinda Outram Chris Philo Roy Porter Nicolaas

of revolutionary France this book explores how Percier and Fontaine's desire to build structures of permanence and their inadvertent reliance upon temporary architectural forms shaped a new awareness of time memory and modern political identity in France

Modern Architecture and the Sacred Ross Anderson, Maximilian Sternberg, 2020-11-26 This edited volume *Modern Architecture and the Sacred* presents a timely reappraisal of the manifold engagements that modern architecture has had with the sacred It comprises fourteen individual chapters arranged in three thematic sections: Beginnings and Transformations of the Modern Sacred Buildings for Modern Worship and Semi-Sacred Settings in the Cultural Topography of Modernity The first interprets the intellectual and artistic roots of modern ideas of the sacred in the post-Enlightenment period and tracks the transformation of these in architecture over time The second studies the ways in which organized religion responded to the challenges of the new modern self-understanding and then the third investigates the ways that abstract modern notions of the sacred have been embodied in the ersatz sacred contexts of theatres galleries memorials and museums While centring on Western architecture during the decisive period of the first half of the 20th century a time that takes in the early musings on spirituality by some of the avant-garde in defiance of *Sachlichkeit* and the machine aesthetic the volume also considers the many varied appropriations of sacrality that architects have made up to the present day and also in social and cultural contexts beyond the West

The Spiritual Rococo Gauvin Alexander Bailey, 2017-07-05 A groundbreaking approach to Rococo religious art and spirituality in Europe and South America The *Spiritual Rococo* addresses three basic conundrums that impede our understanding of eighteenth-century aesthetics and culture Why did the Rococo ostensibly the least spiritual style in the pre-Modern canon transform into one of the world's most important modes for adorning sacred spaces And why is Rococo still treated as a decadent nemesis of the Enlightenment when the two had fundamental characteristics in common This book seeks to answer these questions by treating Rococo as a global phenomenon for the first time and by exploring its moral and spiritual dimensions through the lens of populist French religious literature of the day a body of work the author calls the *Spiritual Rococo* and which has never been applied directly to the arts The book traces Rococo's development from France through Central Europe Portugal Brazil and South America by following a chain of interlocking case studies whether artistic literary or ideological and it also considers the parallel diffusion of the literature of the *Spiritual Rococo* in these same regions placing particular emphasis on unpublished primary sources such as inventories One of the ultimate goals of this study is to move beyond the cliché of Rococo's frivolity and acknowledge its essential modernity Thoroughly interdisciplinary The *Spiritual Rococo* not only integrates different art-historical fields in novel ways but also interacts with church and social history literary and post-colonial studies and anthropology opening up new horizons in these fields

Cheap and Tasteful Dwellings Jan Jennings, 2005 In 1879 *Carpentry and Building* magazine launched its first house design competition for a cheap house Forty-two competitions eighty-six winning designs and a slew of near-winners and losers resulted in a body of work that offers an entire history of

anarchitectural culture The competitions represented a vital period of transition in delineating roles and responsibilities of architectural services and building trades The contests helped to define the training education and values of practical architects and to solidify house planning ideals The lives and work of ordinary architects who competed in Carpentry and Building contests offer a reinterpretation of architectural professionalization in this time period Cheap and Tasteful Dwellings thoroughly explores the results of these competitions conducted over a thirty year period from 1879 to 1909 The book outlines the philosophy behind and procedures developed for running the competitions looks at characteristics of the eighty six winners of the competitions examines the nature of architectural practices during the period analyzes the winning competition designs and provides biographical details of competition winners and losers A landmark book in architectural history Cheap and Tasteful Dwellings makes a compelling case for the theory of convenient arrangement its history its role its principles its relationship to contemporary interior design education and its meaning to American architecture More importantly the book explains the impact of Carpentry and Building s contests in furthering the tenets of convenient arrangement for house design By using extensive material from the magazine Jennings leaves little doubt as to how important this overlooked story is to the history of American architecture as a whole
