Symbolization And Desymbolization:

Symbolization and Desymbolization Norbert Freedman, Richard Lasky, 2002 Jacques Ellul and the Technological Society in the 21st Century Helena M. Jerónimo, José Luís García, Carl Mitcham, 2013-07-08 This volume rethinks the work of Jacques Ellul 1912 1994 on the centenary of his birth by presenting an overview of the current debates based on Ellul's insights As one of the most significant twentieth century thinkers about technology Ellul was among the first thinkers to realize the importance of topics such as globalization terrorism communication technologies and ecology and study them from a technological perspective The book is divided into three sections The first discusses Ellul's diagnosis of modern society and addresses the reception of his work on the technological society the notion of efficiency the process of symbolization de symbolization and ecology The second analyzes communicational and cultural problems as well as threats and trends in early twenty first century societies Many of the issues Ellul saw as crucial such as energy propaganda applied life sciences and communication continue to be so In fact they have grown exponentially on a global scale producing new forms of risk Essays in the final section examine the duality of reason and revelation They pursue an understanding of Ellul in terms of the depth of experience and the traditions of human knowledge which is to say on the one hand the experience of the human being as contained in the rationalist sociological and philosophical traditions On the other hand there are the transcendent roots of human existence as well as revealed knowledge in the mystical and religious traditions The meeting of these two traditions enables us to look at Ellul's work as a whole but above all it opens up a space for examining religious life in the technological society The Modern Freudians Carolyn S. Ellman, Stanley Grand, 1999-05-01 Explores the developments in technique in the practice of psychoanalysis today *Another Kind of Evidence* Norbert Freedman, Jesse D. Geller, Joan Hoffenberg, Marvin Hurvich, Rhonda Ward, 2018-05-08 In our current professional climate with calls for evidenced based treatment and in light of the prestige accorded to this emblem we can ask for what purpose do we seek evidence For our students For the public at large For an inner sense of feeling supported by science Most disciplines are concerned with cumulative knowledge aimed toward self affirmation and self definition that is establishing a sense of legitimacy The three parts of this volume are directed toward the goal of affirming a public and private sense of the legitimacy of psychoanalysis thereby shaping professional identity In each contribution we adhere to the precepts of scientific inquiry with a commitment to affirming or disconfirming clinical propositions utilizing consensually agreed upon methods of observation and arriving at inferences that are persuasive and have the potential to move the field forward Beyond this each part of this book describes distinct methodologies that generate evidence pertaining to public health policy the persuasiveness and integrity of our psychoanalytic concepts and phenomena encountered in daily clinical practice *Literary Aesthetics of Trauma* Reina Van der Wiel, 2014-04-08 Literary Aesthetics of Trauma Virginia Woolf and Jeanette Winterson investigates a fundamental shift from the 1920s to the present day in the way that trauma is aesthetically expressed Modernism's emphasis on impersonality

and narrative abstraction has been replaced by the contemporary trauma memoir and an ethical imperative to bear witness

Relatedness, Self-definition, and Mental Representation John Samuel Auerbach, Kenneth Neil Levy, Carrie Ellen Schaffer, 2005 This book presents chapters by Dr Blatt's many colleagues and students that explore questions of relatedness self definition and mental representation and shows us that psychoanalysis and empirical research can be combined

Redemption Nicholas Roumas, 2025-08-05 A bold trailblazing investigation into soteriology approached by way of Girardian mimetic theory and Eastern Orthodox theological reflection Redemption A Mimetic Soteriology brings French literary critic Ren Girard's mimetic theory of human behavior together with a breadth of Christian approaches to redemption through the Cross Girard's mimetic understanding of sacrifice is drawn upon to illuminate biblical narratives about redemption as well as the theologies of Anselm of Canterbury Peter Abelard and Gregory of Nyssa Nicholas Roumas shows by these readings that redemption can be understood as a reconfiguration of symbolic values with profound consequences for human relations and social organization Redemption thus serves theologians as a basis for a new practical dogmatics This exploration is a breath of fresh air in Orthodox theology utilizing patristic and scriptural sources outside the framework of the predominant neo Patristic synthesis and introducing an entirely new modern paradigm onto the Orthodox scene For theologians of other traditions Redemption contributes to the library of Girardian theologies its first Eastern Orthodox installment For Girardians it provides critique and refinement of many of Girard's most nuanced views and gives due attention to overlooked and controversial aspects of his thought For the lay reader the book provides an accessible entry into the spirituality of the Cross through a lens that is both modern and traditional Redemption provides a revitalizing infusion into contemporary Orthodox theological discourse Its ideas will impact theology in the Orthodox Church and beyond for decades to come and are the basis for a paradigm shift in our understanding of redemption and its practical consequences The lay reader and professional theologian alike will find novelty and utility in its ideas

Rescuing Humanity Willem H. Vanderburg, 2023-05-26 In Rescuing Humanity Willem H Vanderburg reminds us that we have relied on discipline based approaches for human knowing doing and organizing for less than a century During this brief period these approaches have become responsible for both our spectacular successes and most of our social and environmental crises At their roots is a cultural mutation that includes secular religious attitudes that veil the limits of these approaches leading to their overvaluation Because their use especially in science and technology is primarily built up with mathematics living entities and systems can be dealt with only as if their architecture or design is based on the principle of non contradiction which is true only for non living entities This distortion explains our many crises Vanderburg begins to explore the limits of discipline based approaches which guides the way toward developing complementary ones capable of transcending these limits It is no different from a carpenter going beyond the limits of his hammer by reaching for other tools As we grapple with everything from the impacts of social media the ongoing climate crisis and divisive political ideologies Rescuing Humanity reveals that

our civilization must learn to do the equivalent if humans and other living things are to continue making earth a home

Simulating the Mind II Dietmar Dietrich, Volker Hartmann Cardelle, 2024-10-04 The declared goal of this book an extended and revised translation of the German edition 2021 is to show how a unified model of the psyche and body can be developed via insights from psychoanalysis neurology and computer technology On the one hand such a model allows for the testing of psychological and social theories on a scientific basis with the help of simulation experiments On the other hand the model developed according to the functional structures of the human brain and psyche provides the basis for artificial intelligence systems These are systems with cognitive capabilities that can save human lives save energy ensure safety at airports provide support in old age care and in the medical field in other words and generally speaking systems that can simplify our lives in a relevant way and on a broad basis A great deal of time and money is invested in genetic engineering and neurology but research into the mental apparatus in the context of the neurological part i e modeling the brain in a holistic way is sparse in every respect However the results of the scientific project SiMA of which the first author has been a driving force show that the research of this organ which in the authors understanding includes the mental apparatus as a whole is quite feasible today This is also the main message of the book which addresses topics such as artificial intelligence the brain psychoanalysis behavioral models complexity bionics of the mental emotions and feelings consciousness and awareness preconscious and unconscious the functional and not only behavioral description and modeling of the brain and especially of the mental apparatus and some more In the world of technology there is generally little interest in psychoanalysis whereas in the world of psychoanalysis people usually refuse to deal with mathematics and technology especially computer technology Is there an information theory of the brain on the one hand and of computer technology on the other hand The authors attempt to answer this question from both sides With the goal to reach as many readers as possible and to provoke the authors break with traditions and give space to new forms of thinking and argue that it is crucial to take a new path in automation in artificial intelligence and in technical cognitive science but also in psychoanalysis and neurology in order to create a common basis for scientific and technical possibilities that have been previously inaccessible

Trauma and Traumatization in Individual and Collective Dimensions Eve-Marie Becker, Jan Dochhorn, 2014-10-01 The contributors of this volume demonstrate how a highly developed expertise in interpreting Biblical and cognate literature is a substantial part of the overall discourse on the historical literary social political and religious dimensions of trauma in past and present This idea is based on the assumption that trauma is not only a modern concept which derives from 20th century psychiatry It is an ancient phenomenon already which predates modern discourses Trauma studies will thus profit from how Theology specifically Biblical exegesis and the Humanities deal with trauma in terms of religion history sociology and politics
