recorded the physical world he saw around him These studies provided the background for a collection of paintings about landscapes with flora and fauna and ignited an artistic furor that inspired the imagery he used in his allegorical fantasy and dream cycles about forests winding paths and sweet briar roses This study focuses on two main ideas Burne Jones s concept of ideal and artificial or magical nature expressed and represented in his drawings and paintings and the way in which he fused his scientific knowledge about nature with some of the symbolism in his paintings
