-The Clean Water Act (CWA) is the surface water quality protection in the United States. The Act does not deal directly with ground water or with water quantity issues. A variety of tools are employed to greatly reduce pollutant discharges into waterways, finance municipal wastewater treatment facilities, and manage polluted runoff.

-This act protects humans from becoming sick by cleaning the water that they consume. A variety of tests (bacteria, pH, iron, copper...etc) are conducted to ensure the safety.
