Gombrich,1976 **Studies in the Art of the Renaissance** Ernst H. Gombrich,1976 **The Heritage of Apelles** Ernst Hans Gombrich,1976 *The Heritage of Apelles* Ernst Hans Gombrich (Historien d'art),1976 **Albrecht Dürer and the Venetian Renaissance** Katherine Crawford Luber,Albrecht Dürer,2005-05-30 Publisher Description *Renaissance Rivals* Rona Goffen,2002-01-01 For sixteenth century Italian masters the creation of art was a contest They knew each other s work and patrons were colleagues and rivals Survey of this artistic rivalry the emotional and professional circumstances of their creations

Cultural Exchange in Early Modern Europe Robert Muchembled,William Monter,2006 This 2007 volume reveals how a first European identity was forged from the fifteenth to the seventeenth centuries Cultural exchange played a central role in the elites fashioning of self The cultures they exchanged and often integrated with included palaces dresses and jewellery but also gestures and dances *Michelangelo and the Apocalypse* Thomas A. Walters,2024-09-17 Michelangelo and the Apocalypse The End Time Codes Revealed This book is written for an engaged general readership as well as academics Renaissance scholars students and those readers with a broad interest in art art history and religion As of late there has been a continuing interest in Renaissance art and the enduring popularity of the book of Revelation and end time events This work is an interdisciplinary and multidisciplinary approach to analysis of both the book of Revelation and Michelangelo s Sistine Chapel ceiling fresco This approach will involve analyzing the structural dynamics of both the Biblical Book of Revelation and the Sistine Chapel Ceiling exploring how their creative structures and themes may be similar in many ways or divergent Michelangelo and the Apocalypse offers a fresh and deeply influential approach to the art life and spiritual evolution of one of the Renaissance s greatest artists Michelangelo Buonarroti Could Michaelangelo and the Apocalypse and their structural codes reveal a language of an end time symphony *At the Dawn of a New Consciousness* Bernard Nesfield-Cookson,2010 The Italian Renaissance is considered by many to mark the beginning of the modern age The name itself literally rebirth accurately expresses the innovation that took place during that period Renaissance thinkers took a vital interest in history literature and the arts focusing on the human world as much as if not more than that of God The rapid development of the arts and sciences reflected their study of the visible physical world in all its three dimensional glory The source of these new impulses says the author can be found in what Rudolf Steiner calls the birth of the consciousness soul the faculty for objective self awareness Instead of a primarily inward looking consciousness people began looking outward with greater intensity observing the world around them in detail With greater conscious of their separate being people of the Renaissance

began to study the phenomena of the world of nature from an individual personal perspective In this enlightening book illustrated with sixteen pages of color plates the author illuminates the concept of the consciousness soul showing how it is reflected in fifteenth century Florentine painting sculpture and architecture as well as in the impulses issuing from Plato s Academy of Athens

Leonardo and the Last Supper Ross King,2012-10-30 Early in 1495 Leonardo da Vinci began work in Milan on what would become one of history s most influential and beloved works of art The Last Supper After a dozen years at the court of Lodovico Sforza the Duke of Milan Leonardo was at a low point personally and professionally at 43 in an era when he had almost reached the average life expectancy he had failed despite a number of prestigious commissions to complete anything that truly fulfilled his astonishing promise His latest failure was a giant bronze horse to honor Sforza s father his 75 tons of bronze had been expropriated to be turned into cannon to help repel a French invasion of Italy The commission to paint The Last Supper in the refectory of a Dominican convent was a small compensation and his odds of completing it were not promising Not only had he never worked on a painting of such a large size 15 high x 30 wide but he had no experience in the extremely difficult medium of fresco In his compelling new book Ross King explores how amidst war and the political and religious turmoil around him and beset by his own insecurities and frustrations Leonardo created the masterpiece that would forever define him King unveils dozens of stories that are embedded in the painting Examining who served as the models for the Apostles he makes a unique claim that Leonardo modeled two of them on himself Reviewing Leonardo s religious beliefs King paints a much more complex picture than the received wisdom that he was a heretic The food that Leonardo a famous vegetarian placed on the table reveals as much as do the numerous hand gestures of those at Christ s banquet As King explains many of the myths that have grown up around The Last Supper are wrong but its true story is ever more interesting Bringing to life a fascinating period in European history Ross King presents an original portrait of one of history s greatest geniuses through the lens of his most famous work

Capturing Imagination Carlo Severi,2018-11-01 We have all found ourselves involuntarily addressing inanimate objects as though they were human For a fleeting instant we act as though our cars and computers can hear us In situations like ritual or play objects acquire a range of human characteristics such as perception thought action or speech Puppets dolls and ritual statuettes cease to be merely addressees and begin to address us we see life in them How might we describe the kind of thought that gives life to the artifact making it memorable as well as effective in daily life play or ritual action Following The Chimera Principle in this collection of essays Carlo Severi explores the kind of shared imagination where inanimate artifacts from non Western masks and ritual statuettes to paintings and sculptures in our own tradition can be perceived as living beings This nuanced inquiry into the works of memory and shared imagination is a proposal for a new anthropology of thought

Painting the Heavens Eileen Reeves,1997 The remarkable astronomical discoveries made by Galileo with the new telescope in 1609 10 led to his famous disputes with philosophers and religious authorities most of whom found their doctrines threatened by his

evidence for Copernicus's heliocentric universe In this book Eileen Reeves brings an art historical perspective to this story as she explores the impact of Galileo's heavenly observations on painters of the early seventeenth century Many seventeenth century painters turned to astronomical pastimes and to the depiction of new discoveries in their work yet some of these findings imposed controversial changes in their use of religious iconography For example Galileo's discovery of the moon's rough topography and the reasons behind its secondary light meant rethinking the imagery surrounding the Virgin Mary's Immaculate Conception which had long been represented in paintings by the appearance of a smooth incandescent moon By examining a group of paintings by early modern artists all interested in Galileo's evidence for a Copernican system Reeves not only traces the influence of science on painting in terms of optics and content but also reveals the painters in a conflict between artistic depiction and dogmatic representation Reeves offers a close analysis of seven works by Lodovico Cigoli Peter Paul Rubens Francisco Pacheco and Diego Velázquez She places these artists at the center of the astronomical debate showing that both before and after the invention of the telescope the proper evaluation of phenomena such as moon spots and the aurora borealis was commonly considered the province of the painter Because these scientific hypotheses were complicated by their connection to Catholic doctrine Reeves examines how the relationship between science and art and their mutual production of knowledge and authority must themselves be seen in a broader context of theological and political struggle

Laughter, Jestbooks and Society in the Spanish Netherlands Johan Verberckmoes, 1999-03-15 Prior to the modern age laughter raised passions and activated the body to sweat and shake Derision was not distinguished from joy Deceiving the senses by tricks or funny stories made all people laugh loudly regardless of class Johan Verberckmoes describes in this innovating book the hotchpotch of comic images and stories in Flanders during the rule of the Spanish Habsburgs from 1500 to 1700 It challenges the Bakhtinian idea of a caesura in the history of laughter around 1600

Leonardo da Vinci Stephen J. Campbell, 2025-02-04 How our image of the Renaissance's most famous artist is a modern myth Leonardo da Vinci 1452-1519 never signed a painting and none of his supposed self-portraits can be securely ascribed to his hand He revealed next to nothing about his life in his extensive writings yet countless pages have been written about him that assign him an identity genius entrepreneur celebrity artist outsider Addressing the ethical stakes involved in studying past lives Stephen J. Campbell shows how this invented Leonardo has invited speculation from figures ranging from art dealers and curators to scholars scientists and biographers many of whom have filled in the gaps of what can be known of Leonardo's life with claims to decode secrets reveal mysteries of a vanished past or discover lost masterpieces of spectacular value In this original and provocative book Campbell examines the strangeness of Leonardo's words and works and the distinctive premodern world of artisans and thinkers from which he emerged Far from being a solitary genius living ahead of his time Leonardo inhabited a vibrant network of artistic technological and literary exchange By investigating the politics and cultural tensions of the era as well as the most recent scholarship on Leonardo's contemporaries workshop and writings

Campbell places Leonardo back into the milieu that shaped him and was shaped by him. He shows that it is in the gaps and contradictions of what we know of Leonardo's life that a less familiar and far more historically significant figure appears.
