Sipri Yearbook 1996 Armaments Disarmament And International Security:

Armaments, Disarmament and International Security 1996 Stockholm International Peace Research Institute, 1996 This yearbook continues SIPRI's annual analyses of developments in major armed conflicts in conflict prevention management and resolution and in peacekeeping developments in chemical and biological weapons new military technology world military expenditure nuclear explosions arms production the arms trade and nuclear chemical and biological arms control Special studies in this volume area studies of China and Korea the Middle East the former Yugoslavia and Europe the Nordic Rapid Reaction Forces military research and development in the OECD countries multilateral security related export control measures negotiations on a comprehensive nuclear test ban and a ban on the production of fissile material conventional arms control in Europe the nuclear non proliferation regime after the NPT Review and Extension Conference efforts to strengthen the constraints on inhumane conventional weapons The Yearbook has unique collections of official documents concluded during the year in the field of arms control disarmament and international security The annual accounts and analyses are heavily footnoted providing a comprehensive bibliography in each subject area

The Evolution of Biological Disarmament Nicholas Roger Alan Sims, 2001 The evolution of the disarmament regime of the 1972 Biological and Toxin Weapons Convention BTWC is described from 1980 when the first BTWC Review Conference was held until 1998 The author analyses the results of our first four review Conferences the meetings of the Ad Hoc Group of Governmental Experts to Identify and Examine Potential Verification Measures from a Scientific and Technical Standpoint the 1994 Special Conference the current negotiations of the Ad Hoc Group to produce an additional protocol the BTWC which may include verification measures handling of the 1997 Cuban allegation of US biological warfare and the implementation of Article X of the BTWC on international transfers and cooperation for peaceful purposes The strength of the BTWC regime is assessed in the light of its evolution through the review process and its changing contents including Russia's admission that it had inherited an offensive biological weapon programme The book applies an original sector by sector approach to its analysis of the BTWC studied in a long term perspective

Realism versus Global Arms Control and Disarmament Carmen Chas, 2025-07-15 This incisive book explores the limits of international law through arms control and disarmament treaties Carmen Chas critically engages with literature on disarmament and classical realist analysis bridging the divide between international law and international relations scholarship

Small Arms, Big Impact Michael Renner, 1998-07

International Arms Transfers and the Middle East Ian Anthony, Peter Jones, 1998-11-19 The end of the Cold War and the relentless pace of technological change are altering the patterns of international arms transfers For a number of economic and technological reasons the US is becoming increasingly dominant particularly with respect to the very highest military capabilities which these technologies promise though this will not be without dislocations for the Israeli military and society Other countries such as Iran Iraq and Saudi Arabia may acquire some additional conventional capabilities but they

are not likely to be decisive in relation to Israel though they could increase tensions associated with other disputes in the region. Finally, in the absence of progress towards a resolution of the Arab-Israeli and other regional disputes, Israel's increasing technological edge will likely have the effect of further encouraging the efforts of some countries to explore asymmetric responses such as acquiring non-conventional weapons or resorting to terrorism.

The Weapons Legacy of the Cold War Dietrich Schroeer, Alessandro Pascolini, 2019-01-15. First published in 1997, this volume builds its discussion on a technological base along with policy implications and constitutes a review of the current situation in international security created by the Cold War and how the end of the Cold War is likely to change the situation. As the close of the Cold War created a multitude of changes in international security, resulting in a broad range of topics tackled in this collection. It features specialists in military technology, physics, political science, public and international affairs.

Hard Choices Jonathan Moore, 1998-11-19. Since Somalia, the international community has found itself changing its view of humanitarian intervention. Operations designed to alleviate suffering and achieve peace sometimes produce damaging results. The United Nations, nongovernmental organizations, military and civilian agencies alike find themselves in the midst of confusion and weakness where what they seek are clarity and stability. Competing needs, rights and values can obscure even the best international efforts to quell violence and assuage crises of poverty. More attention must be paid to the complexity of issues and moral dilemmas involved. This volume of original essays by international policy leaders, practitioners and scholars brings together insights into the conflicting moral pressures present in different kinds of interventions ranging from Rwanda and Somalia to Haiti, Cambodia and Bosnia. From their various cultural and professional perspectives, the authors cover issues of human rights, sanctions, arms trade, refugees, HIV and the media. Together they make the case that although there are no easy answers, moral reflection and content can improve the quality of decisionmaking and intervention in internal conflicts. Published under the auspices of The International Committee of the Red Cross.

The Barcelona Process George Joffe, Alvaro Vasconcelos, 2014-04-08. The Euro-Mediterranean Partnership, the Barcelona Process, aims to create integration in the Mediterranean Basin so as to encourage economic development along the Southern rim. This volume takes a critical look at the problems faced by the Process and the likelihood of its success.

Nation States as Schizophrenics Roberta N. Haar, 2001-05-30. The demise of the Cold War continues to pose new challenges to the international system. Central to these challenges is the extent of German and Japanese security commitments within their regions and to the global maintenance of peace and stability. It is important to know whether two of the world's acknowledged economic powers will play significant stabilizing roles. If they choose not to, what are the reasons and what can be done to convince them that their military might and political leadership are critical. Certainly in the first decade since the end of the Cold War, Germany and Japan did not fulfill the roles that their allies and many realist scholars expected they would. Haar seeks to explain German and Japanese reticence to assume their anticipated roles. In order to undertake this task, she evaluates various models of foreign policy. In

the future Haar asserts Japanese and German foreign policy are likely to remain torn with both practicing a have it all ways policy If their allies the United States in particular continue to insist that they bear more of the burdens of world security then their foreign policy must be better understood This is a provocative analysis that will be of particular interest to scholars researchers and policy makers involved with German and Japanese foreign policy analysis **Fighting for Rights** Tal

Dingott Alkopher,2016-04-15 In the light of NATO s humanitarian war in Kosovo is it possible to understand or explain wars as an outcome of perceptions of rights How did rights be they divine rights in the Middle Ages territorial rights in the eighteenth century or human rights today become something that people are willing to fight and die for To answer these questions this book explores the linkage between concepts of rights and the practice of war in the international arena Alkopher describes how normative structures of rights have shaped different practices of war from medieval to modern times through the lens of social constructivism From the eleventh to the thirteenth century concepts of divine rights and institutionalized practices of the Crusades to the Holy Land fostered the prevailing ideas of international rights and war In the eighteenth century the institutionalization of states rights and territorial wars shaped international conflict This view held until the late twentieth century when the institutionalization of human rights coupled with the emerging practice of humanitarian war particularly NATO s war in Kosovo engendered new norms of international conduct The author concludes that rights have the power to constitute an international order that will be either cooperative or conflictual and the choice of outcome is very much in our hands This book will be essential reading for international relations and political science scholars and students but also philosophers legal and sociological historians and international lawyers **Russia and**

Europe: Conflict or Cooperation? M. Webber,2000-07-12 This volume focuses on how Russian policy toward Europe and sometimes by extension the West more broadly has developed since the end of the Cold War and the disintegration of the Soviet Union It argues that important aspects of cooperation have endured in the relationship despite all the vicissitudes of Russian domestic politics and at a time of flux in the international relations of the European continent This cooperation has at times been fragile and has not prevented some obvious and deep seated disagreements It has however survived Indeed Russia and Europe have increasingly routinized their relationship in a range of formal multilateral institutions **Weapons**

of Mass Destruction E. Spiers,2000-02-24 The proliferation of weapons of mass destruction has continued to give cause for concern even after the end of the Cold War This book analyses how the prospects for proliferation have changed since the 1990s particularly in light of the Gulf War and the UN inspections of Iraq It will examine the new pattern of incentives and disincentives for proliferation the utility of these weapons at state and sub state levels and their implications for arms control and international security **The Future of Non-lethal Weapons** Nick Lewer,2017-09-29 These essays explore the

increase in interest in non lethal weapons Such devices have meant that many armed forces and law enforcement agencies are able to act against undesirables without being accused of acting in an inhumane way Topics for discussion in this volume

include an overview of the future of non lethal weapons emerging non lethal technologies military and police operational deployment of non lethal weapons a scientific evaluation of the effectiveness of non lethal weapons changes in international law needed to take into account non lethal technologies developments in genomics leading to new chemical incapacitants implications for arms control and proliferation the role of non lethal weapons in human rights abuses conceptual theoretical and analytical perspectives on the nature of non lethal weapons development
