Marzec, 2015-12-21 As the seriousness of climate change becomes more and more obvious military institutions are responding by taking a prominent role in the governing of environmental concerns engaging in climate change war games and preparing for the effects of climate change from conflicts due to loss of food water and energy to the mass migration of millions of people displaced by rising sea levels This combat oriented stance stems from a self destructive pattern of thought

that Robert P Marzec names environmentalism an attitude that has been affecting human environmental relations since the seventeenth century *Militarizing the Environment* traces the rise of this influential mindset in America and other nations that threatens to supplant ideas of sustainability with demands for adaptation In this extensive historical study of scientific military political and economic formations across five centuries Marzec reveals how environmentalism has been instrumental in the development of today's security society informing the creation of the military industrial complex during World War II and the National Security Act that established the CIA during the Cold War Now embedded in contemporary Western thought environmentalism has even infiltrated scientific thinking transforming Darwinian insights into a quasi theology that makes security the biological basis of existence Marzec exposes the self destructive nature of this increasingly accepted worldview and offers alternatives that counter the blind alleys of national and global security

Realism versus Global Arms Control and Disarmament Carmen Chas, 2025-07-15 This incisive book explores the limits of international law through arms control and disarmament treaties Carmen Chas critically engages with literature on disarmament and classical realist analysis bridging the divide between international law and international relations scholarship

Denationalisation of Defence Janne Haaland Matlary, Øyvind Østerud, 2016-05-23 Denationalisation of Defence consists of two major parts first a generic and analytical section which presents the developmental trends in privatization and internationalization of armed force and second an empirical section analyzing the impact of these trends on the Nordic countries defence and security sectors The Nordic countries have a special relevance as objects of study given their traditionally strong public spheres and state orientated systems of governance This volume questions whether the process of denationalization has reached a point where countries are reacting to changes in their security environment by increasingly introducing elements of privatization and international integration

Arms Sales and Regional Stability The International Institute for Strategic Studies (IISS), 2023-04-28 The book considers the main arms exporting countries including China Russia and the US as well as several European states and the policies each employs in deciding advanced weapons sales to key regions of the world It examines whether such sales are inherently stabilising or de stabilising regarding regional security Regions reviewed in detail include the Middle East and the Indo Pacific Combat aircraft sales are a focus for the volume given both their practical and symbolic importance The volume focuses on the behaviour and policies of the main arms exporting nations since the end of the Cold War shifts in their arms export policies and the tensions that can emerge within or between countries over proposed arms sales It also considers the impact of countries that were previously only recipients of advanced weapons moving to develop their own defence industrial base

Disarmament Diplomacy and Human Security Denise Garcia, 2011-02-08 This book assesses how progress in disarmament diplomacy in the last decade has improved human security In doing so the book looks at three cases of the development of international norms in this arena First it traces how new international normative understandings have shaped the evolution of and support for an Arms Trade Treaty the supply

side of the arms trade and second it examines the small arms international regime and examines a multilateral initiative that aims to address the demand side by the Geneva Declaration and third it examines the evolution of two processes to ban and regulate cluster munitions The formation of international norms in these areas is a remarkable development as it means that a domain that was previously thought to be the exclusive purview of states i e how they procure and manage arms has been penetrated by multiple influences from worldwide civil society As a result norms and treaties are being established to address the domain of arms and states will have more multilateral restriction over their arms and less sovereignty in this domain This book will be of much interest to students of the arms trade international security international law human security and IR in general Denise Garcia is Assistant Professor in the Department of Political Science at Northeastern University Boston She is author of *Small Arms and Security* Routledge 2006 *Counterterrorism* Ronald

Toje,2010-06-30 The post Cold War period is coming to an end After a decade of foreign policy integration Europe faces multipolarity internally divided and externally weak Toje argues that due to the lack of a workable decision making mechanism the EU is destined to play the limited but distinct role of a small power in global politics *The Foreign Policies of Arab States* 'Alī al-Dīn Hilāl,2010 This is an indispensable aid for those studying or teaching the foreign policies of the

contemporary Middle East Not only are the elements of foreign policy discussed and presented as a whole region but the editors provide the established analytical framework by which each contributor in their individual chapters has analyzed and evaluated the foreign policies of nine Arab countries Their framework perceives foreign policy in the context of its environment domestic regional and global This edition has new material reflecting the earth shaking events at the end of the Cold War and the continuation of violence and terrorism U.S. Foreign Policy in Perspective David Sylvan, Stephen Majeski, 2009-02-05 What is the long term nature of American foreign policy This new book refutes the claim that it has varied considerably across time and space arguing that key policies have been remarkably stable over the last hundred years not in terms of ends but of means Closely examining US foreign policy past and present David Sylvan and Stephen Majeski draw on a wealth of historical and contemporary cases to show how the US has had a client state empire for at least a century They clearly illustrate how much of American policy revolves around acquiring clients maintaining clients and engaging in hostile policies against enemies deemed to threaten them representing a peculiarly American form of imperialism They also reveal how clientilism informs apparently disparate activities in different geographical regions and operates via a specific range of policy instruments showing predictable variation in the use of these instruments With a broad range of cases from US policy in the Caribbean and Central America after the Spanish American War to the origins of the Marshall Plan and NATO to economic bailouts and covert operations and to military interventions in South Vietnam Kosovo and Iraq this important book will be of great interest to students and researchers of US foreign policy security studies history and international relations This book has a dedicated website at www.usforeignpolicy.org featuring additional case studies and data sets **Understanding China and India** Rollie Lal, 2006-04-30 Key to developing national security strategy is figuring out what other countries want What are their national interests How do they perceive them How do they project them onto the world stage Understanding all of this helps us to predict their behavior In developing a national security strategy for Asia the United States must take into account the desires of two emerging giants of the 21st century China and India We would be mistaken Lal argues if we lumped China and India together in one Asian policy because these two countries differ greatly from one another Based on over 120 in depth interviews with government officials and scholars in Beijing and New Delhi the author s research yields some surprising news about the differences between China and India Chinese leaders define their national interest as preservation of the state and territorial unity whereas Indian decision makers define their national interests in relation to forces beyond India such as the forces of globalization and their geopolitical status One factor that accounts for these differences among the many explored in this book is the influence of one party rule in China and parliamentary democracy in India Another important finding is that China and India are unlikely to pursue hostility with each other The U S approach to Asia will need to take these differences into account The Modern Defense Industry Richard A. Security Strategy and Transatlantic Relations Roland Dannreuther, John

Peterson,2006-09-27 In this much needed study of current strategic thinking on both sides of the Atlantic a diverse collection of leading European and American analysts are assembled to tackle key questions that remain unanswered in the existing literature how much do new security strategies signal convergence or divergence in US and EU foreign and security policy doctrine what tangible political and policy impacts can be attributed to new security strategies what are the implications for US and EU policies towards specific regions what are the prospects for collective transatlantic action The legacy of 9 11 is scrutinized against the backdrop of the strategic thinking that preceded it In the 1990s the US struggled to develop a new doctrine for American foreign policy seeking at various times to promote a New World Order or democratic enlargement For its part the EU had tried to underpin its new Common Foreign and Security Policy with a coherent set of European values multilateralism human rights environmental protection and poverty reduction that were best defended via collective European action Key continuities and changes in these transatlantic efforts since 9 11 are clearly identified and closely examined
