John P. Lewis, 2007-07 **Designing a Place Called Home** James Wentling, 2012-12-06 are often lined with garages in front of houses that are clearly more internalized in design, some even taking on a fortress-like appearance. Today's new homes are technically superior in construction, i.e. they are more energy efficient, weather resistant, and maintenance free. However, they also seem to lack the warmth and charm of prewar homes for which more construction dollars were spent on quality veneers but in features and other human scale details. The postwar need for massive amounts of affordable housing for returning GIs helped to encourage building practices that could reduce on-site labor and material costs in houses. The accommodation of the automobile, cost-cutting movements, and a variety of other trends caused a gradual decline in the human social and emotional qualities of postwar residential architecture. This book will attempt to look at the issues and choices facing today's residential designers and home builders and ask: How can we make our new houses and neighborhoods more responsive to humanistic needs, particularly in light of constant pressures to keep housing costs down? This question will generally be addressed by comparing historical designs to those of today to see if we might be able to reconsider some old-fashioned ideas in new housing designs. *Site Planning and Design for the Elderly* Diane Y. Carstens, 1993-02-15 Design for the elderly is at the forefront of architectural topics today. Yet while much has been written about the design of indoor spaces, little work has been done on planning outdoor spaces to accommodate the needs of the elderly. *Site Planning and Design for the Elderly* specifically addresses this issue, drawing from a large body of original research, current knowledge, and theory to provide the background knowledge and specific information necessary for informed decision making throughout the site planning and design process. More than just a reference on accessibility standards, this volume offers key insights into the needs and concerns of older people in the built environment and presents guidelines and alternatives for responsive site planning and design. Organized in a clear step-by-step format for easy reference, issues and specific guidelines are provided for each stage of the planning and design process within the context of housing for older people. Moreover, architects, landscape architects, urban designers, developers, and students will find the topics covered applicable to other settings where older people are a part of the user profile, such as downtown renewal, hospital, and park planning projects. Numerous illustrations and case studies highlight major points throughout the text. The

first sections of this volume provide valuable background information on housing options available to seniors and outline design implications of the social and physiological changes associated with advancing age Critical design and management issues are discussed objectives are outlined and implementation strategies are developed including methods for promoting wayfinding enhancing personalization and maximizing opportunities for social interaction The body of this volume provides specific guidelines for each stage of development Site planning areas addressed include site selection the layout of housing units including relationships between facilities offering different levels of care recreational amenities and circulation systems Detailed guidelines for the location spatial configuration detailing and amenities of major site components and recreational facilities are also provided Entryways parking patios rooftop developments and gardening centers are among the specific areas covered A brief outline of the major issues affecting use of each site component is particularly useful for making decisions regarding facility provision and for prioritizing development alternatives Critical detailing and amenity specifications are pinpointed and thoroughly described Paving materials signage lighting site furniture and pedestrian street crossings are among those elements examined A concise overview in tabular form of the major guidelines presented throughout closes this practical volume It is possible to design a site that will not only enhance the lives of elderly residents but will be cost effective and highly marketable as well Site Planning and Design for the Elderly provides practical solutions to the problems of exterior design for one of the fastest growing segments of the U S population today *Zoning News*
