Gellings, 2020-12-17 The power system has often been cited as the greatest and most complex machine ever built yet it is predominantly a mechanical system Technologies and intelligent systems are now available that can significantly enhance the overall functionality of power distribution and make it ready to meet the needs of the 21st century This book explains how sensors communications technologies computational ability control and feedback mechanisms can be effectively combined to create this new continually adjusting smart grid system It provides an understanding of both IntelliGridSM architecture and EnergyPortSM as well as how to integrate intelligent systems to achieve the goals of reliability cost containment energy efficiency in power production and delivery and end use energy efficiency

The Economics of Conservation Programs Franz Wirl, 2012-12-06 Demand side management DSM is one of the most topical issues in regulating electric utilities both in the United States and internationally What is DSM It consists of various measures at the level of demand households commerce industry others which are at least partially financed by electric utilities and which should either conserve energy or reduce the peak load The practice of DSM originates from The Public Utility Regulatory Policy Act of 1978 PURPA that provided the political and legal framework to set energy conservation as a national goal which encouraged regulatory commissions to initiate utility conservation programs see e.g. Nowell Tschirhart 1990 and Fox Penner 1990 Moreover integrated resource planning which must account for DSM on a level playing field with supply is written into the 1992 Energy Policy Act as the U.S. Government's preferred method of electric power planning Although PURPA set energy conservation as a national priority its implementation was left to the states with

the consequence of considerable differences concerning efforts and rules By 1993 16 states had already implemented integrated resource planning 9 were in the process of doing so and further 9 considered implementation EPRI 1993b Due to the Clean Air Act of 1990 24 states are considering to include external costs in integrated resource planning
