Main Challenges for Christian Theology Today LIT

Verlag, 2020-01-10 In this volume on the basis of three consultations which took place in Seoul and Geneva 2016 2017 2018 theologians from Yonsei University's College of Theology in Seoul South Korea and from the Theological Faculty at the University of Geneva reflect together on three of the main challenges facing Christian theology today First questions related to religious pluralism and multiple religious belonging are addressed Second the promise of an enhanced human being through technology and other means is discussed Third the reality of the threat humanity represents to our ecosystem is considered Each of these themes is examined from a Korean as well as from a Western European perspective for Christian theology in our day can no longer afford to remain limited to its own geographical context Christophe Chalamet is Professor of Systematic Theology at the University of Geneva Switzerland Hyun Shik Jun is Professor of Systematic Theology at Yonsei University's College of Theology in Seoul Korea

The Uplift Project R. Robert Holson, 2016-03-04 In this book the author puts forward an agenda to enhance intelligence and longevity in humans select animal species including dogs dolphins and elephants and machines This effort would extend over 1 000 years or 40 human generations Enhancements of IQ and longevity in humans would involve both environmental and genetic improvements in membership IQ and longevity The goal would be a mean IQ of 145 and an average longevity of 100 years in human Uplift Project members by the end of these 1 000 years Given that Uplift Project members will probably at project outset have better than average IQ and life expectancy this could involve as little as a two standard deviations increase in IQ 30 points and one standard deviation increase in longevity 20 years over these 1 000 years The Uplift Project would also expand human animal and machine membership not only across the planet but to the moon Mars and space colonies

Organisational Buying Daniel D Prior, 2021-04-15 Organisational buying is the purchase of goods and or services by one or more individuals acting on behalf of the buyer firm after a formal or informal consideration of purchase alternatives and the integration or use of those goods and or services to address one or more buyer firm problems or issues Organisational buying accounts for about two thirds of economic transactions globally However organisational buying has traditionally been taught in discipline specific silos Organisational buying concepts appear in courses on marketing and sales management procurement contract management supply chain management operations management finance as well as accounting Moreover most organisations treat organisational buying activities in a similarly disjointed way This book provides a comprehensive overview of organisational buying that integrates perspectives from across a range of disciplines and organisational functions The primary goal of the book is to develop a holistic interpretation of organisational buying It covers topics such as Purchase situations The organisational buying process The purchase decision and the value proposition Communications in organisational buying Buyer supplier relationships Organisational buying capabilities Organisational buying culture Organisational buying approach design Channels of supply Networks and organisational buying Written in a practical

approachable way the book includes a range of exercises case examples learning objectives and discussion questions to support a broad spectrum of organisational buying related courses

AI and IA Ted Peters, 2019-09-01 Will advances in AI Artificial Intelligence or IA Intelligence Amplification lead to the extinction of the human race as we know it Or will superintelligence lead to utopia In this collection of thoughtful essays we must first get clear on the question is artificial intelligence actually intelligent or not Only with an affirmative answer could our techies proceed toward their goal the creation of a superintelligence that leads through transhumanism to a posthuman entity that would replace today's human Should today's moderately intelligent human species voluntarily go extinct to make way for a more intelligent species to succeed us in evolutionary history These scientific questions are addressed in this volume in light of their theological ethical and social implications

More Everything Forever Adam Becker, 2025-04-22 This wild and utterly engaging narrative Melanie Mitchell shows why Silicon Valley's heartless baseless and foolish obsessions with escaping death building AI tyrants and creating limitless growth are about oligarchic power not preparing for the future Tech billionaires have decided that they should determine our futures for us According to Elon Musk Jeff Bezos Sam Altman and more the only good future for humanity is one powered by technology trillions of humans living in space functionally immortal served by superintelligent AIs In *More Everything Forever* science journalist Adam Becker investigates these wildly implausible and often profoundly immoral visions of tomorrow and shows why in reality there is no good evidence that they will or should come to pass Nevertheless these obsessions fuel fears that overwhelm reason for example that a rogue AI will exterminate humanity at the expense of essential work on solving crucial problems like climate change What's more these futuristic visions cloak a hunger for power under dreams of space colonies and digital immortality The giants of Silicon Valley claim that their ideas are based on science but the reality is darker they come from a jumbled mix of shallow futurism and racist pseudoscience *More Everything Forever* exposes the powerful and sinister ideas that dominate Silicon Valley challenging us to see how foolish and dangerous these visions of the future are
