Existential Health Psychology Patrick M. Whitehead,2019-06-24 This volume critiques the increasingly reductive objectifying and technologized orientation in mainstream biomedicine Drawing on the methods of hermeneutic phenomenology and existential analysis in the work of Martin Heidegger Kurt Goldstein Medard Boss and Hans Georg Gadamer the author seeks to expose this lacuna and explore the ways in which it misrepresents or misunderstands the human condition Whitehead begins by examining the core distinction in the sociology of medicine between disease and illness and how this distinction maps onto a more fundamental distinction between the corporeal objective body and the experiential lived body Ultimately the book exposes the tendency in modern medicine to medicalize the human condition and forwards a reorientation framed by what the author terms existential health psychology
