The New Western Scott F. Stoddart, 2016-03-01 American moviegoers have long turned to the Hollywood Western for reassurance in times of crisis During the genre's heyday the films of John Ford Howard Hawks and Henry Hathaway reflected a grand patriotism that resonated with audiences at the end of World War II The tried and true Western was questioned by Ford and George Stevens during the Cold War and in the 1960s directors like Sam Peckinpah and George Roy Hill retooled the genre as a commentary on American ethics during the Vietnam War Between the mid 1970s and early 1990s the Western faded from view until the Gulf War when Kevin Costner's Dances with Wolves 1990 and Clint Eastwood's Unforgiven 1992 brought it back with moral complexities Since 9 11 the Western has seen a resurgence blending its patriotic narrative with criticism of America's place in the global community Exploring such films as True Grit 2010 and Brokeback Mountain 2005 along with television series like Deadwood and Firefly this collection of new essays explores how the Western today captures the dichotomy of our times and remains important to the American psyche

Boom or Bust Sheena B. Stief, Kristen L. Figgins, Rebecca Day Babcock, 2021-04-01 A vast number of studies have documented the economic and geological effects of oil production but the impact of boom and bust cycles on individuals and communities has received less attention Boom or Bust remedies this gap by highlighting the personal experiences of those directly affected in an economy dominated by oil and natural gas production The Permian Basin is one of the largest oil producing regions in the United States People who live there have benefited from explosive growth only to see opportunities vanish with sudden industry downturns In 2016 the National Endowment for the Humanities funded a grant for the study and collection of energy narratives in this economically volatile region Boom or Bust derives from that community initiative and offers a unique

contribution to the developing field of energy humanities The oil field industry may seem to be all about numbers but as Boom or Bust demonstrates residents of oil and gas country whether they work in the oil field or not are at the mercy of an ever shifting economy When the price of oil rises companies move in and newcomers flood the area expanding the employment force And as the population booms so does the infrastructure of cities When prices drop though families must make difficult choices whether to stay put or follow the oil to another location With the ensuing declines in population small businesses close their doors and unemployment levels rise Despite the inevitable declines and despite the increase in alternative energy resources many West Texans feel a sense of pride that borders on patriotism Boom or Bust reveals the full complexity of boomtown culture

Re-Entering Old Spaces Aleksandra Nikcevic-Batricevic, 2016-05-11 This book is a product of the XI International Conference on English Language and Literary Studies held in Montenegro in 2014 The old spaces were taken as a metaphorical tool for reintroducing a wide range of established topics with new approaches Space was thus understood as physical mechanical continuous linear as measurable and symbolic as subjective and relational and as aesthetic It was found on maps in architecture on theatre stages in books in hearts in one's identity in time and in theses and theories from the Aristotelian topos to Einstein's construct of space time Therefore the means of travel to these spaces and the forms the journeys take are also multifarious However so are the discursive strategies and their limitations when it comes to presenting the journeys and their destinations The contributors to this volume represent a range of nationalities and present research that either follows in the footsteps of other authors in a literal or secondary literary journey to real geographical places or observes the universal literary and old theoretical issues through new critical lenses Indeed they are often on both roads witnessing how inextricable human efforts are to finding identifying and aestheticising oneself in relation to a particular space Their contributions to this book expose how spaces were created and recreated through writing and symbolical representations in general They also show how the images of these spaces have been changing in consent to the intentions of their visitors and reveal that persistent and obstinate moment in a space that despite or in spite of changing perspectives itself refuses to be changed The book will encourage further contributions to this expanding field in the humanities In their numerous and distinct ways the contributions to this particular book maintain that understanding how spaces are conceived and conceptualised is of pronounced importance in the globalized world in which cultures are gradually losing authenticities while their spaces geographical tourist spiritual literary aesthetic are as reflective of the visitors as they are of the hosts

Captivating Westerns Susan Kollin, 2019-05-01 Tracing the transnational influences of what has been known as a uniquely American genre the Western Susan Kollin's *Captivating Westerns* analyzes key moments in the history of

multicultural encounters between the Middle East and the American West In particular the book examines how experiences of contact and conflict have played a role in defining the western United States as a crucial American landscape Kollin interprets the popular Western as a powerful national narrative and presents the cowboy hero as a captivating figure who upholds traditional American notions of freedom and promise not just in the region but across the globe Captivating Westerns revisits popular uses of the Western plot and cowboy hero in understanding American global power in the post 9 11 period Although various attempts to build a case for the war on terror have referenced this quintessential American region genre and hero they have largely overlooked the ways in which these celebrated spaces icons and forms rather than being uniquely American are instead the result of numerous encounters with and influences from the Middle East By tracing this history of contact encounter and borrowing this study expands the scope of transnational studies of the cowboy and the Western and in so doing discloses the powerful and productive influence the Middle East has had on the American West
