Skill Measure:

A Web-Based Approach to Measure Skill Mismatches and Skills Profiles for a Developing Country: Jeisson Arley Cárdenas Rubio,2020-12-30 Several interdisciplinary studies highlight imperfect information as a possible explanation of skill mismatches which in turn has implications for unemployment and informality rates Despite information failures and their consequences countries like Colombia where informality and unemployment rates are high lack a proper labour market information system to identify skill mismatches and employer skill requirements One reason for this absence is the cost of collecting labour market data Recently the potential use of online job portals as a source of labour market information has gained the attention of researchers and policymakers since these portals can provide quick and relatively low cost data collection As such these portals could be of use for Colombia However debates continue about the efficacy of this use particularly concerning the robustness of the collected data This book implements a novel mixed methods approach such as web scraping text mining machine learning etc to investigate to what extent a web based model of skill mismatches can be developed for Colombia The main contribution of this book is demonstrating that with the proper techniques job portals can be a robust source of labour market information In doing so it also contributes to current knowledge by developing a conceptual and methodological approach to identify skills occupations and skill mismatches using online job advertisements which would otherwise be too complex to be collected and analysed via other means By applying this novel methodology this study provides new empirical data on the extent and nature of skill mismatches in Colombia for a considerable set of non agricultural occupations in the urban and formal economy Moreover this information can be used as a complement to household surveys to monitor potential skill shortages Thus the findings are useful for policymakers statisticians and education and training providers among others   Basic Hand Tool Skills United States. Hulten,Valerie A. Ramey,2019-01-11 Over the past few decades US business and industry have been transformed by the advances and redundancies produced by the knowledge economy The workplace has changed and much of the work differs from that performed by previous generations Can human capital accumulation in the United States keep pace with the evolving demands placed on it and how can the workforce of

tomorrow acquire the skills and competencies that are most in demand Education Skills and Technical Change explores various facets of these questions and provides an overview of educational attainment in the United States and the channels through which labor force skills and education affect GDP growth Contributors to this volume focus on a range of educational and training institutions and bring new data to bear on how we understand the role of college and vocational education and the size and nature of the skills gap This work links a range of research areas such as growth accounting skill development higher education and immigration and also examines how well students are being prepared for the current and future world of work   **Monthly Weather Review** ,1974   Globalization and Egalitarian Redistribution Pranab Bardhan,Samuel Bowles,Michael Wallerstein,2020-10-06 Can the welfare state survive in an economically integrated world Many have argued that globalization has undermined national policies to raise the living standards and enhance the economic opportunities of the poor This book by sixteen of the world s leading authorities in international economics and the welfare state suggests a surprisingly different set of consequences Globalization does not preclude social insurance and egalitarian redistribution but it does change the mix of policies that can accomplish these ends Globalization and Egalitarian Redistribution demonstrates that the free flow of goods capital and labor has increased the inequality or volatility of labor earnings in advanced industrial societies while constraining governments ability to tax the winners from globalization to compensate workers for their loss This flow has meanwhile created opportunities for enhancing the welfare of the less well off in poor and middle income countries Comprising eleven essays framed by the editors introduction and conclusion this book represents the first systematic look at how globalization affects policies aimed at reducing inequalities The contributors are Keith Banting Pranab Bardhan Carles Boix Samuel Bowles Minsik Choi Richard Johnston Covadonga Meseguer Yebra Karl Ove Moene Layna Mosley Claus Offe Ugo Pagano Adam Przeworski Kenneth Scheve Matthew J Slaughter Stuart Soroka and Michael Wallerstein   Theory and Empirical Practice in Research on Social and Emotional Skills Miloš Kankaraš,Filip De Fruyt,Ricardo Primi,2022-09-22   **AMS.** ,1957   **Economics and Utopia** Geoffrey M Hodgson,2002-01-04 Since the fall of the Berlin Wall we have been told that no alternative to Western capitalism is possible or desirable This book challenges this view with two arguments First the above premise ignores the enormous variety within capitalism itself Second there are enormous forces of transformation within contemporary capitalisms associated with moves towards a more knowledge intensive economy These forces challenge the traditional bases of contract and employment and could lead to a quite different socio economic system Without proposing a static blueprint this book explores this possible scenario   **Do Skills Predict Profits** Lanny Herron,2020-10-07 Originally published in 1994 Do Skills Predict Profits A Study of Successful Entrepreneurship is a study into the progress made by academic researchers in management over the last 15 years in determining the causes of new venture performance The author notes that most of this research has concentrated on the effects of strategy and industry structure on new venture performance This research looks to answer two major questions 1

Do characteristics of the entrepreneur have a significant impact upon new venture performance in addition to strategy and industry structure If so what characteristics are important and what is their relationship with new venture performance
