Skin Signs In Clinical Medicine:

Skin Signs in Clinical Medicine John Savin, J. A. A. Hunter, N. C. Hepburn, 1997 A concise well written text that teaches the reader how to diagnose invisible systemic disorders from the highly visible signs that show up on the patient's skin. The book splits skin diseases into two basic categories: primary skin disorders such as eczema and psoriasis and skin manifestations of disorders of other systems such as the characteristic skin of chronic renal failure. **Chamberlain's Symptoms and Signs in Clinical Medicine 13th Edition, An Introduction to Medical Diagnosis** Andrew R Houghton, David Gray, 2010-05-28 A classic text. Chamberlain's Symptoms and Signs in Clinical Medicine has been providing students and professionals with a detailed and well illustrated account of the symptoms and signs of diseases affecting all the body systems since the first edition published in 1936. Now completely rewritten by a new team of authors selected for their experience and reputation in writing quality publications in their specialist fields, the 13th edition brings the title into line with current teaching and practice. One of the key challenges of writing a textbook of diagnostic medicine is to balance the bottom up approach of constructing a differential diagnosis from individual clinical findings and the top down approach of learning the key features pertaining to a particular diagnosis. The 13th edition of Chamberlain's Symptoms and Signs in Clinical Medicine integrates both approaches into a coherent working framework that will assist the reader in preparing for academic and professional examinations and in everyday practice. Presented in full colour and illustrated with relevant images, this book provides a thorough lesson in diagnostic medicine ensuring the reader is fully prepared to deal with the challenging process of differential diagnosis through a thorough knowledge of the central features of the conditions that they are likely to encounter. Key features: Teaches the reader how to diagnose correctly through assessment of symptoms and signs while simultaneously recalling all key features of a given condition. Full colour and generously illustrated. Conforms with the core competencies required for the foundation years. Includes bullet point lists and tip boxes. Chapters conclude with a summary of key points for easy revision. Written and edited by a highly experienced team of specialists. Companion website.
