A Leap from the Clouds Jerry Kuntz, 2022-07-26 In the late nineteenth century circus aerialists collaborated with show balloonists to perform death defying stunts initially by suspending themselves from trapeze bars beneath a balloon later by

jumping from the balloons using fabric parachutes. By the 1890s these performances became a worldwide craze remaining in rural fairs and fetes for decades. Many of the original balloon parachute pioneers went on to play key roles in the creation of airships, test flying the first gliders and airplanes. Based on extensive historical research, this unusual account explores how a nineteenth-century daredevil act united with the desire to achieve human flight. These performers' contributions did not come without a price: dozens if not hundreds of people died in horrifying events witnessed by thousands of spectators. This book chronicles the act that had no practical purpose other than entertainment, which eventually evolved into the development of the free fall parachute, a key aviation need and the foundation of a new activity known as skydiving.

Birdmen, Batmen, and Skyflyers Michael Abrams, 2007-05-22

The Wright Brothers were wimps. Or so you might think after reading this account of their unsung but even more daring rivals: the men and women who strapped wings to their backs and took to the sky. If only for a few seconds. People have been dying to fly quite literally since the dawn of history. They've made wings of feather and bone, leather and wood, canvas and taffeta, and thrown themselves off the highest places they could find. There's the world's first and still most dangerous extreme sport, and its full history has never been told. *Birdmen, Batmen, and Skyflyers* is a thrilling, hilarious, and often touching chronicle of these obsessive inventors and eccentric daredevils. It traces the story of winged flight from its doomed early pioneers to their glorious high-tech descendants who've at last conquered gravity, sometimes anyway. Michael Abrams gives us a brilliant bird's-eye view of what it's like to fly with wings. And then inevitably to fall. In the immortal words of Great Birdmen: Someday I think that everyone will have wings and be able to soar from the housetops. But there must be a lot more experimenting before that can happen. Clem Sohn, the world's first batman, who plummeted to his death at the Paris Air Show in 1937. The trouble was that he went only halfway up the radio tower. If he had gone clear to the top, it would have been different. Amadeo Catao Lopes in 1946 explaining the broken legs of the man who tried his wings. One day a jump will be the last. The jump of death. But that idea does not hold me back. Rudolf Richard Boehlen, who died of jump-related injuries in 1953. It turned out that almost everyone from the thirties and forties had died. That just made me want to do it more. Garth Taggart, stunt jumper for *The Gypsy Moths*, filmed in 1968. You have to be the first one. The second one is the first loser. Felix Baumgartner, who in 2003 became the first birdman to cross the English Channel.

The Man Who Tested Parachutes Andrew Colley, John Neil, 2025-05-30

Charles Agate's daring parachute testing at RAF Ringway transformed airborne warfare, while his post-war struggles reveal a complex legacy. By 1940 the Allies had fallen behind the Axis powers in parachute design and research. Other than as a means of escape from a doomed aircraft, the British regarded parachuting as of little military value. All that changed when the Germans used paratroops, the Fallschirmjäger, to devastating

effect in the invasion of the Low Countries and Churchill demanded immediate action The call went out for men who would be prepared to risk their lives testing parachutes jumping and landing techniques Charles Agate was a 34 year old schoolteacher with a taste for adventure when he joined a pioneering group of mavericks at RAF Ringway in Manchester The breath taking risks they took alongside the essential work of the women of the WAAF changed the course of the war and the face of airborne warfare Their work though often came at a terrible cost Between 1941 and 1945 Agate and his fellow Parachute Jump Instructors PJIs completed thousands of jumps often from low altitude or using prototype parachutes They jumped carrying heavy kit bags had sandbags strapped to their legs and landed in deep freezing water They also trained thousands of raw recruits for the key airborne operations of the war as well as over 600 Special Operation Executive agents for dropping into enemy territory frequently accompanying them as dispatchers on these hazardous flights They were proud of the knowledge they were acquiring and imparting at Ringway but as the authors reveal this led to disputes with the Americans over tactics and equipment as they prepared for the Allied invasion of France Agate amassed a record 1 601 jumps and was awarded the Air Force Cross He and his fellow PJIs at Ringway were also personally thanked by Churchill for their unique contribution to the war effort His last jump in 1946 with his flying suit stuffed with winnings won on a horse called Airborne at the Epsom Derby was reported in the press worldwide He acknowledged after the war that he had seen 21 good soldiers hit the deck during training at RAF Ringway and these tragedies as well as the effects of risking his life on a daily basis took a heavy emotional toll on him and many of the other PJIs The Man Who Tested Parachutes explores Agate's lost post war years his struggles with his mental health and the impact on his family It charts his journey to becoming the unconventional head teacher of a village school and his clashes with local authorities Finally it describes unflinchingly the last dark twist in the life of this complex man alone in his flat overlooking the sea just before Christmas 1986 This book tells the story of an ordinary man who took extraordinary risks and the men and women who served alongside him It also remembers the young recruits who died before they were able to take part in the key battles for which they were being trained

International Sport: A Bibliography, 1995-1999 Richard William Cox, 2004-04-22 There has been an explosion in the quantity of sports history literature published in recent years making it increasingly difficult to keep abreast of developments The annual number of publications has increased from around 250 to 1 000 a year over the last decade This is due in part to the fact that during the late 1980s and 90s many clubs leagues and governing bodies of sport have celebrated their centenaries and produced histories to mark this occasion and commemorate their achievements It is also the result of the growing popularity and realisation of the importance of sport history research within academe This international bibliography of books articles conference proceedings and essays in the English language is a one stop for the sports historian to know what is new
