Hazen, 1992 Why do smokers claim that the first cigarette of the day is the best What is the biological basis behind some heavy drinkers belief that the hair of the dog method alleviates the effects of a hangover Why does marijuana seem to affect ones problem solving capacity Intoxicating Minds is in the author's words a grand excavation of drug myth Neither extolling nor condemning drug use it is a story of scientific and artistic achievement war and greed empires and religions and lessons for the future Ciaran Regan looks at each class of drugs describing the historical evolution of their use explaining

how they work within the brain s neurophysiology and outlining the basic pharmacology of those substances From a consideration of the effect of stimulants such as caffeine and nicotine and the reasons and consequences of their sudden popularity in the seventeenth century the book moves to a discussion of more modern stimulants such as cocaine and ecstasy In addition Regan explains how we process memory the nature of thought disorders and therapies for treating depression and schizophrenia Regan then considers psychedelic drugs and their perceived mystical properties and traces the history of placebos to ancient civilizations Finally Intoxicating Minds considers the physical consequences of our co evolution with drugs how they have altered our very being and offers a glimpse of the brave new world of drug therapies Manuscripts at Harvard John Keats, Helen Vendler, 1990 After more than a century of study we know more about John Keats than we do about most writers of the past but we still cannot fully grasp the magical processes by which he created some of the most celebrated poems in all of English literature This volume containing 140 photographs of Keats s own manuscripts offers the most concrete evidence we have of the way in which his thoughts and feelings were transmuted into art The rough first drafts in particular are full of information about what occurred if not in Keats's mind at least on paper when he had pen in hand the headlong rush of ideas coming so fast that he had no time to punctuate or even form the letters of his words the stumbling places where he had to begin again several times before the words resumed their flow the efforts to integrate story character and theme with the formal requirements of rhyme and meter Each revision teaches the inquiring reader something about Keats's poetic practice Several of the manuscripts are unique authoritative sources while others constitute our best texts among multiple existing versions They reveal much about the maturation of the poet's creativity during four years of his brief life between On Receiving a Curious Shell 1815 and To Autumn 1819 Above all they show us what is lost when penmanship yields to the printed page what Helen Vendler in her insightful essay on the manuscripts calls the living hand of Keats These sharply reproduced facsimiles provide compelling visual evidence of a mortal author in the act of composing immortal works
