Symboles De La Science Sacree:

Symboles de la science sacrée René Guénon, 1962 Le présent recueil réunit tous les articles concernant le symbolisme que René Guénon n'avait pas lui-même inclus dans l'un de ses ouvrages Il constitue la partie la plus importante de ses travaux dans ce domaine et vient illustrer en quelque sorte la doctrine qu'il a exposée dans toute son œuvre tout en offrant ce qu'on pourrait appeler les moyens d'une universelle vérification dans la multitude innombrable mais concordante de données sacrées provenant des traditions les plus diverses Malgré tout ce que l'auteur avait déjà traité en cette matière dans ses autres livres ce volume constitue un trésor unique de science symbolique et restera comme un véritable monument de l'intellectualité sacrée

Sacred Thresholds: The Door to the Sanctuary in Late Antiquity
Emilie M. van Opstall,2018-07-10 Sacred Thresholds The Door to the Sanctuary in Late Antiquity offers a far reaching account of boundaries within pagan and Christian sanctuaries gateways in a precinct outer doors of a temple or church inner doors of a cella The study of these liminal spaces within Late Antiquity itself a key period of transition during the spread of Christianity when cultural paradigms were redefined demands an approach that is both interdisciplinary and diachronic Emilie van Opstall brings together both upcoming and noted scholars of Greek and Latin literature and epigraphy archaeology art history philosophy and religion to discuss the experience of those who crossed from the worldly to the divine both physically and symbolically What did this passage from the profane to the sacred mean to them on a sensory emotive and intellectual level Who was excluded and who was admitted The articles each offer a unique perspective on pagan and Christian sanctuary doors in the Late Antique Mediterranean

The Idea of a Town Joseph Rykwert,2013-07-04 Roman towns and their history are generally regarded as being the preserve of the archaeologist or the economic historian In this famous unusual and radical book which touches on such disparate themes as psychology and urban architecture Joseph Rykwert has considered them as works of art His starting point is the mythical historical and ritual texts in which their foundation is recounted rather than the excavated remains such texts having parallels not merely in ancient Greece but also further afield Mesopotamia India and China To achieve his reading of the Roman town he has invoked the comparative method of the anthropologists and he examines first of all the Etruscan rite a group of ceremonies by which all or practically all Roman towns were founded The basic institutions of the town its walls and gates its central shrines and its forum are all of them part of a pattern to which the rituals and the myths that accompanied them provide clues Like in other closed societies these rituals and myths served to create a secure home for the citizen of Rome and to make him feel part of his city and place it firmly in a knowable universe It is refreshing to look at standard themes of the history of urban design from a nonrational point of view to see surveyors as quasi priests and orthogonal planning as a sophisticated technique touched by divine mystery Rykwert s lasting worth will be to wrench us away from rationalist simplicities and to make us face the fundamental disquietof the human spirit in its claim to a permanent place on the land Spiro Kostoff Journal of the Society Architectural Historians
