Erdos, 2025-07-23 This book adopting a systemic transdisciplinary perspective explores the sociopsychological and the psychosocial interfaces shaping people's lived experiences of liminality It is about life's outstandingly chaotic and confusing moments regularly recurring in or under calamitous circumstances pervading our lives in the 21st century Prospects for constructive change have traditionally been present in transformative liminal settings The broad context of permanent liminality however is conducive to impasses in the process of change The resulting liminal hotspots are characterized by a turmoil of negative feelings and increased suggestibility In the book discursive analyses underpin and illustrate the key points Part I of the book serves as an introduction exploring the mixed potential inherent in languaging and symbol use in the social construction of transitions and liminal phenomena Part II comprises sociopsychological analyses of the contexts as labyrinths of meaning of today's globalized and mazed societies where economy politics and information communication technologies are closely intertwined to maintain trickster liminality This part includes explorations on two distinct forms of manipulative discourse characteristic of authoritarian regimes highlighting the role of double bind relations that permeate a despotic system to perpetuate unpredictability chaos and repeated entrapments in liminal hotspots The author explores the discursive practices altering the traditional patterns of transformative liminality into the absurdity of permanent liminality with its self-destructive power Part III is about the psychosocial interface focusing on the intersubjective domain of the individual's lived experiences specifically on the phenomenological connections between rites of transition and psychosocial crises Further it comprises explorations on the prospects for transformative liminality inherent in dialogue As a conclusion humans' constructive potential must be coupled with care to benefit from transformations Transitioning from one form of process into the subsequent one remains an intrinsic and mercurial event in human development Let us embrace these moments but embrace them with care *Transitions Liminality as Lived Experience* is primarily intended for scholars as well as students master's level or PhD in the broad area of social sciences especially in social communication discourse studies counselling semiotic cultural psychology social psychology and clinical social work *The New Handbook of the Christian Year* Hoyt L.
