

same quantity, they are correlated in time, and therefore can be used to validate the accuracy of the time alignment, as shown in Figure 14.

5. CONCLUSIONS

This article developed the use of different techniques for time alignment of experimental sensor data. The presented approaches were based on practical experience obtained while working with flight data from an experimental UAV. The techniques presented in this article were developed in an instructive manner in order to provide a practical resource for working with multiple measurement systems.
