The Nation Builders Frank N. Schubert, United States. Corps of Topographical Engineers, 1988
Frank N. Schubert, 2004-12-01 This book marks an important anniversary in the history of our development as a nation In 1838 Congress established the Corps of Topographical Engineers an organization whose main purpose was the peacetime fostering of economic growth and national cohesion This small dedicated group of officers contributed to the development of many aspects of the national transportation network railroads highways and inland waterways They provided maps for overland travelers and charts for navigators on our Great Lakes By the time that the organization was abolished during the Civil War it had played a major part in a period of dramatic development aptly characterized by one historian as a transportation revolution ROBERT W PAGE Assistant Secretary of the Army Civil Works
The United States Army and the Making of America Robert Wooster, 2021-04-01 The United States Army and the Making of America From Confederation to Empire 1775 1903 is the story of how the American military and more particularly the regular army has played a vital role in the late eighteenth and nineteenth century United States that extended beyond the battlefield Repeatedly Americans used the army not only to secure their expanding empire and fight their enemies but to shape their nation and their vision of who they were often in ways not directly associated with shooting wars or combat That the regular army served as nation builders is ironic given the officer corps obsession with a warrior ethic and the deep seated disdain for a standing army that includes Thomas Jefferson s Declaration of Independence the writings of Henry David Thoreau and debates regarding congressional appropriations Whether the issue concerned Indian policy the appropriate division of power between state and federal authorities technology transportation communications or business innovations the public demanded that the military remain small even as it expected those forces to promote civilian development Robert Wooster s exhaustive research in manuscript collections government documents and newspapers builds upon previous scholarship to provide a coherent and comprehensive history of the U S Army from its inception during the American Revolution to the Philippine American War Wooster integrates its institutional history with larger trends in American history during that period with a special focus on state building and civil military relations The United States Army and the Making of America will be the definitive book on the army s relationship with the nation from its founding to the dawn of the twentieth century and will be a valuable resource for a generation of undergraduates graduate students and virtually any scholar with an interest in the U S Army American frontiers and borderlands the American West or eighteenth and nineteenth century nation building

Designing the Bayous Martin Reuss, 2004-06-02 Louisiana s Atchafalaya River Basin is one of the most dynamic and critical environments in the country It sustains the nation s last cypress tupelo wetland and provides a habitat for many species of animals Endowed with natural gas and oil fields the basin also supports a large commercial fisheries industry Perhaps most crucial it remains a primary component of the plan to control the Mississippi River and relieve flooding in New

Orleans Baton Rouge and other communities in the lower river valley The continuing health of the basin is a reflection not of nature but of the work of the U S Army Corps of Engineers With levee building and clearing in the nineteenth century and damming dredging and floodway construction in the twentieth the basin was converted from a vast forested swamp into a designer wetland where human aspirations and nature maintained a precarious equilibrium Originally published by the U S Army Corps of Engineers primarily for internal distribution this environmental and political history of the Atchafalaya Basin is an unflinching account of the transformation of an area that has endured perhaps more human manipulation than any other natural environment in the nation Martin Reuss provides a new preface to bring us up to date on the state of the basin which remains both an engineering contrivance and natural wonder *Index of Publications, Forms, Reports* United States. Army. Corps of Engineers,1995 *Index of Publications* United States. Army. Corps of Engineers,1993 *Up the Winds and Over the Tetons* William F. Raynolds,2012-06-15 In the late 1850s many of the most striking places in Wyoming Idaho and Montana had not yet been surveyed by any government expedition This book brings to life the expedition that first explored these regions As the last major government survey of the American West before the Civil War the Raynolds Expedition began in 1859 This highly readable daily journal of Captain William F Raynolds previously unpublished covers the most challenging period of that expedition from May 7 to July 4 1860 It describes what the Raynolds party did and saw while traveling from its winter quarters near today s Glenrock Wyoming up to the head of the Wind River through Jackson Hole and on to the Three Forks of the Missouri in southwestern Montana The party included legendary mountain man Jim Bridger geologist Ferdinand Hayden and artists Anton Sch nborn and James Hutton among the first to depict the Teton Range Historians travelers and outdoor enthusiasts will welcome this important addition to the literature of western exploration
