**Health and the National Health Service** John Carrier, Ian Kendall, 2015-09-16 The NHS came into existence in an atmosphere of conflict centred on the strong ideological commitment of the Post war Labour Government and the opposition of the Conservative Party of that time to the idea of a universally available and centrally planned medical care service There was also opposition from some sections of the medical establishment who feared the loss of professional autonomy Setting health policy in both an historical and modern context post 1997 Carrier and Kendall weigh up the successes and failures of the National Health Service and examine the conflicts which have continued for over sixty years in spite of efforts to solve financial problems in the NHS through increases in funding as well as structural and organisational change After looking at recent responses to supposed failures of the NHS they conclude that the NHS has successfully faced the challenges before it and is likely to continue to meet the changing health needs of the population Financial stresses concerns about the quality of care and demographic change with consequent issues for the elderly and the chronically ill continue to be urgent and politically contentious issues This book is appropriate for a wide range of undergraduate and postgraduate students studying health policy and the NHS

**Bibliography of the History of Medicine**, *The Fourth Revolution* John Micklethwait, Adrian Wooldridge, 2014-05-15 From the bestselling authors of *The Right Nation* a visionary argument that our current crisis in government is nothing less than the fourth radical transition in the history of the nation state Dysfunctional government It s become a cliché and most of us are resigned to the fact that nothing is ever going to change As John Micklethwait and Adrian Wooldridge show us that is a seriously limited view of things In fact there have been three great revolutions in government in the history of the modern world The West has led these revolutions but now we are in the midst of a fourth revolution and it is Western government that is in danger of being left behind Now things really are different The West s debt load is unsustainable The developing world has harvested the low hanging fruits Industrialization has transformed all the peasant economies it had left to transform and the toxic side effects of rapid developing world growth are adding to the bill From Washington to Detroit from Brasilia to New Delhi there is a dual crisis of political legitimacy and political effectiveness The Fourth Revolution crystallizes the scope of the crisis and points forward to our future The authors enjoy extraordinary access to influential figures and forces the world over and the book is a global tour of the innovators in how power is to be wielded The age of big government is over the age of smart government has begun Many of the ideas the authors discuss seem outlandish now but the center of gravity is moving quickly This tour drives home a powerful argument that countries success depends overwhelmingly on their ability to reinvent the state And that much of the West and particularly the United States is failing badly in its task China is making rapid progress with government reform at the same time as America is falling badly behind Washington is gridlocked and America is in danger of squandering its huge advantages from its powerful economy because of failing government And flailing democracies like India look enviously at China s state of the art airports and expanding universities The race to get government right is not just a race of efficiency It is a race to see which political values will triumph in the twenty first century the liberal values of democracy and liberty or the authoritarian values of

command and control The stakes could not be higher      *Modern England, 1901-1984* Alfred F. Havighurst, 2004-07-08 The most comprehensive bibliography of printed books articles and standard texts on twentieth century England
