## The Nature Of Animals:

*Aelian's On the Nature of Animals* Gregory McNamee, 2012-08-31 Not much can be said with certainty about the life of Claudius Aelianus known to us as Aelian. He was born sometime between A.D. 165 and 170 in the hill town of Praeneste, what is now Palestrina, about twenty-five miles from Rome, Italy. He grew up speaking that town's version of Latin, a dialect that other speakers of the language seem to have found curious but somewhat unusually for his generation, though not for Romans of earlier times, he preferred to communicate in Greek. Trained by a sophist named Pausanias of Caesarea, Aelian was known in his time for a work called *Indictment of the Effeminate*, an attack on the recently deceased emperor Marcus Aurelius Antoninus, who was nasty even by the standards of Imperial Rome. He was also fond of making almanac-like collections, only fragments of which survive, devoted to odd topics such as manifestations of the divine and the workings of the supernatural. His *De Natura Animalium*, *On the Nature of Animals*, has a similar patchwork quality, but it was esteemed enough in his time to survive more or less whole, and it is about all that we know of Aelian's work today. A mostly randomly ordered collection of stories that he found interesting enough to relate about animals, whether or not he believed them, Aelian's book constitutes an early encyclopedia of animal behavior, affording unparalleled insight into what ancient Romans knew about and thought about animals, and of particular interest to modern scholars about animal minds. If the science is sometimes sketchy, the facts often fanciful, and the history sometimes suspect, it is clear enough that Aelian had a fine time assembling the material, which can be said in the most general terms to support the notion of a kind of intelligence in nature, and that extends human qualities, for good and bad, to animals. His stories, which extend across the known world of Aelian's time, tend to be brief and to the point, and many return to a trenchant question: If animals can respect their elders and live honorably within their own tribes, why must humans be so appallingly awful? Aelian is as brisk as entertaining and as scholarly a writer as Pliny, the much better known Roman natural historian. That he is not better known is simply an accident; he has not been widely translated into English or indeed any European language. This selection from his work will introduce readers to a lively mind and a witty writer who has much to tell us. *Tracts on the Nature of Animals and Vegetables* Lazzaro

**Animals and Nature** Rod Preece,2011-11-01 No one tradition alone offers a sufficient respect for other species Taken together they may offer a prospect for saner human animal relations From the book Western conceptions of objectivity and individuality have resulted in a readier appreciation of the worth of the animals and nature than has been recognized This provocative book takes issue with the popular view that the Western cultural tradition in contrast to Eastern and Aboriginal traditions has encouraged attitudes of domination and exploitation towards nature particularly animals Preece argues that the Western tradition has much to commend it and that descriptions of Aboriginal and Oriental orientations have often been misleadingly rosy simplified and codified according to current fashionable concepts Animals and Nature is the result of six years intensive study into comparative religion literature philosophy anthropology mythology and animal welfare science
