The Necessity Of Metaphysics:

Avicenna on the Necessity of the Actual Celia Kathryn Hatherly, 2022-09-28 According to Avicenna whatever exists while it exists exists of necessity Not all beings however exist with the same kind of necessity Instead they exist either necessarily per se or necessarily per aliud Avicenna on the Necessity of the Actual His Interpretation of Four Aristotelian Arguments explains how Avicenna uses these modal claims to show that God is the efficient as well as the final cause of an eternally existing cosmos In particular Celia Kathryn Hatherly shows how Avicenna uses four Aristotelian arguments to prove this very un Aristotelian conclusion These arguments include Aristotle s argument for the finitude of efficient causes in *Metaphysics* 2 his proof for the prime mover in the *Physics* and *Metaphysics* 12 his argument against the Megarians in *Metaphysics* 9 and his argument for the mutual entailment between the necessary and the eternal in *De Caelo* 1 12 Moreover Hatherly contends when Avicenna s versions of these arguments are correctly interpreted using his distinctive understanding of necessity and possibility the objections raised against them by his contemporaries and modern scholars fail

The Sources of Necessity Tobias Wilsch, 2025-03-23 It is a currently popular view that essences laws and logic are among the grounds of necessity and possibility Another such idea relates essences laws and logic closely to causal explanations and to non causal grounding explanations The Sources of Necessity combines those tenets within the view that certain phenomena establish explanations because they exert necessity a modal force on the facts In form of a slogan the explanatory phenomena are the sources of necessity The book investigates this idea and it argues that essences laws and logic are the sources of necessity The investigation contains two different strands one pertaining to explanation and one to necessity In the first strand The Sources of Necessity uses different ways of exerting necessity to analyse the explanatory behaviour of essences laws and logic It investigates the governance of natural laws the interplay of essences and logic in the generation of absolute necessity and the existence and nature of metaphysical laws The second strand concerns the nature of necessity It is argued that necessity is primitive and that there are several equally fundamental species of necessity Two particularly thorny questions about necessity that arise from these insights are Why are the sources of necessity themselves necessary and Why are different kinds of necessity ordered by strength The book develops a rationalist view to answer those questions It says that contingent reality is the result of a cosmogenic sequence that unfolds from essences and logic through the other sources all the way to the contingent facts
