Developing the Global South Paulos Milkias, 2010 For four decades the UN has attempted to foster development in the countries of the Southern hemisphere The book provides a synopsis of these efforts from the Brandt Commission Report to Boutros Boutros Ghali s Agenda for Development It presents opposing arguments in parceling responsibility for the growing gap between the North and the South and details the Millennium Development Goals and assesses their successes and failures so far Prof Milkias provides suggestions for closing the gap for removing the debt burden that is currently crushing the nations of the South and for relieving the poverty ignorance and disease that plague so much of humanity

Science And Technology In A Changing International Order Volker Rittberger, 2019-06-21 As part of its contribution to the 1979 United Nations Conference on Science and Technology for Development IUNCSTD the

United Nations Institute for Training and Research jUNITAR organized an informal research group to assess various aspects of applying science and technology to development through the United Nations system This research group was constituted in early 1978 at the initiative of Dr Robert S Jordan former Director of Research at UNITAR and was headed by Professor Volker Rittberger a UNITAR Special Fellow One of the activities of this group has been the production of a series of working papers on science and technology These papers seek to provide preliminary analyses rather than definitive conclusions Their purpose is to facilitate the access of others to the ongoing work of the group and to stimulate critical comments and reactions leading to further improvement of this work

Governments And Mining Companies In Developing Countries James H. Cobbe,2019-03-13 This book examines the relationship between the governments of less developed countries LDCs and foreign owned firms engaged in the extraction of minerals for export With an approach that synthesizes economic theory technical considerations and political factors Cobbe provides a fresh look at the policy aspects of the resource bargaining pro

From Dependency To Development Heraldo Munoz,2019-04-09 Although much has been written on the concept nature and implications of dependency in underdeveloped countries there is a noticeable lack of comprehensive material on dependency reversal the ways and circumstances under which dependency and underdevelopment can be overcome Dr Munoz brings together in a coherent volume the alternative strategies for dependency reversal that have been posed by leading social scientists the emphasis is on commonalities differences and theoretical and practical derivations The book outlines the basic features of the dependency literature and clarifies the emergence and development of the dependency paradigm its meaning and its differences from other theoretical perspectives on underdevelopment New aspects of dependency situations are also introduced Significant alternatives to dependency are offered taking into account varying geographical ideological and functional factors Though no claim is made that all existing answers to development are included this is clearly the most complete work available to date

Appropriate Technology For Development Donald D. Evans,2019-03-13 This analysis of appropriate technology first explores the concept of development in terms of needs characteristics and theories and then examines the pivotal role of technology in the developmental process The twenty contemporary case histories illustrate specific instances of applied technology not necessarily as examples of successful applic

The Third World And U.s. Foreign Policy Robert L. Rothstein,2019-06-25 The quest for a viable policy toward the Third World will be a dominant theme in U S foreign policy throughout this decade But before any judgments can be made about the range of choices for U S policymakers it is necessary to understand the pressures that are likely to confront developing nations during the 1980s as well as the efforts of these nations as a group to extract greater resources and attention from the international system This book considers policy responses that have been and are likely to be implemented by developing nations as they face increasing pressures in the areas of food energy trade and debt the main areas of interaction within the international system The author also presents an analysis of how the North South Dialogue functions and why it has produced so few genuine

settlements providing an additional perspective on whether the pressures on the developing countries might be diminished by successful global negotiations. The conclusions reached by examining policy responses and the Dialogue itself provide the basis for a number of specific policy prescriptions. They also help to establish a framework within which U S policy initiatives toward the Third World must be formed. The two concluding chapters discuss these policy choices in detail carefully analyzing the advantages and disadvantages of persisting in present policies attempting a genuine global restructuring choosing to concentrate attention on a few new influentials in the Third World and trying to construct a new approach out of selected elements of the other policy approaches.

Protein, Calories, And Development Bernard Schmitt, 2019-07-11

Production of world food supplies is related to more complicated socioeconomic variables than have previously been analyzed. Besides traditional inputs of land, labor, and fertilizer, the technological capabilities and a variety of nutritional and other human capital components are significant independent variables in explaining agricultural production in the developing world. The integration of economic analyses with the concepts of nutritional science offers an expanded and effective means for analyzing the complex problems of agricultural production in nutritionally deficient countries. Bernard Schmitt traces the circular relationship between nutrition and human capital, labor productivity, food production, and per capita consumption of calories and protein. He defines the basic nutritional terms that are most useful to economists in analyzing agricultural and food-related questions and provides examples that stress the importance of concentrating on nutritional quality as well as gross quantity. Transformations are used to convert quantities into basic nutritional components, allowing more meaningful quantitative analyses in an econometric framework. Dr. Schmitt presents a flexible methodology for forecasting commodity production, using it to make projections for the developing countries for each major commodity group and to test various policy alternatives such as extensive trade, expanded food assistance programs, substantial resource or input expansion, further expansion of Green Revolution technology, and development of alternatives to agriculture. Although he is certain that gains can be accomplished through population control and agricultural advances supplemented by alternative nutritional sources, he concludes that conditions in nutritionally deficient countries are unlikely to improve on average through the mid 1980s.
