The New England Mill Village 1790 186:

The New England Mill Village, 1790-1860 Gary Kulik, Roger N. Parks, Theodore Z. Penn, 1982 This book documents the growth of industrial technology in these little hamlets covering the social labor economic and technical aspects of this fascinating chapter in the development of American enterprise

The New England Mill Village, 1790-1860 Gary Kulik, Roger N. Parks, Theodore Z. Penn, 1982

The Company Town Hardy Green, 2010-09-07 Company town The very phrase sounds un American Yet company towns are the essence of America Hershey bars Corning glassware Kohler bathroom fixtures Maytag washers Spam each is the signature product of a company town in which one business for better or worse exercises a grip over the population In *The Company Town* Hardy Green who has covered American business for over a decade offers a compelling analysis of the emergence of these communities and their role in shaping the American economy beginning in the country s earliest years From the textile mills of Lowell Massachusetts to the R from the coal mines of Ludlow Colorado to corporate campuses of today s major tech companies America has been uniquely open to the development of the single company community But rather than adhering to a uniform blueprint American company towns represent two very different strands of capitalism One is socially benign a paternalistic utopian ideal that fosters the development of schools hospitals parks and desirable housing for its workers The other Exploitationville focuses only on profits at the expense of employees well being Adeptly distinguishing between these two models Green offers rich stories about town builders and workers He vividly describes the origins of America s company towns the living and working conditions that characterize them and the violent sometimes fatal labor confrontations that have punctuated their existence And he chronicles the surprising transformation underway in many such communities today With fascinating profiles of American moguls from candyman Milton Hershey and steel man Elbert H Gary to oil tycoon Frank Phillips and Manhattan Project czar General Leslie B Groves *The Company Town* is a sweeping tale of how the American economy has grown and changed and how these urban centers have reflected the best and worst of American capitalism

The Archaeology of Class in Urban America Stephen A. Mrozowski, 2006-03-23 An engaging study which looks at archaeological documentary and environmental evidence to explore the factors determining class identity

Ingenious Machinists Anthony J. Connors, 2014-10-20 Uses the stories of two inventors who took different paths to examine the early industrial revolution in New York and New England *Ingenious Machinists* recounts the early development of industrialization in New England and New York through the lives of two prominent innovators whose work advanced the transformation to factory work and corporations the rise of the middle class and other momentous changes in nineteenth century America Paul Moody chose a secure path as a corporate engineer in the Waltham Lowell system that both rewarded and constrained his career David Wilkinson was a risk taking entrepreneur from Rhode Island who went bankrupt and relocated to Cohoes New York where he was instrumental in that city s early industrial development Anthony J Connors writes not just a history of technological

innovation and business development but also two interwoven stories about these inventors He shows the textile industry not in its decline but in its days of great social and economic promise It is a story of the social consequences of new technology and the risks and rewards of the exhilarating but unsettling early years of industrial capitalism David Wilkinson and Paul Moody have long deserved full biographies By comparing the careers of two notable figures and including a wealth of material about the people around them Connors gives us a much more detailed varied and realistic image of life in industrial America than we have seen before This is social technological business and economic history at its best all tied together in a compelling dual biography The book will fascinate general readers with an interest in history or biography but it will also appeal strongly to specialists in many fields Patrick M Malone author of *Waterpower in Lowell Engineering and Industry in Nineteenth Century America* **America, History and Life** ,1985 **History of Manufactures in the United States ...: 1607-1860** Victor Selden Clark,1929 **Wastewater Collection and Return Flow in New England, 1990** Laura Medalie,1996 Presents information on the location and volume of return flows from municipal wastewater treatment facilities in New England in 1990 site specific data including facility name US EPA discharge permit number latitude longitude receiving water body name drainage basin 1990 mean daily return flow towns served serviced population and per capita use are grouped by state and drainage basin to enable water resources managers to analyze and model water use processes according to the most appropriate compiling unit **Who Built America?** Bruce C.
