The Natural History Of Man Prentice Hall Biological Science Series:

National Library of Medicine Current Catalog National Library of Medicine (U.S.),1974 First multi year cumulation covers six years 1965 70 *Catalog of Copyright Entries. Third Series* Library of Congress. Copyright Office,1975 **The Natural History of Man** Carl P. Swanson,1973 **The natural history of man** ,1973 **A Series Catalog** Richard Abel & Company,1973 *Is Science Sexist?* M. Ruse,2012-12-06 Philosophy of biology has a long and honourable history Indeed like most of the great intellectual achievements of the Western World it goes back to the Greeks However until recently in this century it was sadly neglected With a few noteworthy exceptions someone wishing to delve into the subject had to choose between extremes of insipid vitalism on the one hand and sterile formalizations of the most elementary biological principles on the other Whilst philosophy of physics pushed confidently ahead the philosophy of biology languished In the past decade however things have changed dramatically A number of energetic and thoughtful young philosophers have made real efforts to master the outlines and details of contemporary biology They have shown that many stimulating problems emerge when analytic skills are turned towards the life sciences particularly if one does not feel constrained to stay only with theoretical parts of biology but can range over to more medical parts of the spectrum At the same time biology itself has had one of the most fruitful yet turbulent periods in its whole history and more and more biologists have grown to see that many of the problems they face take them beyond the narrow confines of empirical science a broader perspective is needed

Eugenics and the Nature-Nurture Debate in the Twentieth Century A. Gillette,2007-10-29 Gillette shows that the sciences of sociobiology and evolutionary psychology were undergoing rapid development in the early Twentieth century However many of the early researchers in these sciences were also eugenicists With the rise of behaviourism and the reaction against eugenics in the 1930s any scientific claims that behaviour might be influenced by heredity were suppressed for ideological reasons **Evolution From Molecules to Men** D. S. Bendall,1983 Giving a broad view of biological evolution the topics discussed here range from the history of the development of evolutionary thought through current problems in molecular evolution and the evolution of whole organisms to evolution of behaviour sociobiology and man's place in evolution

Investigating the Life Sciences G. M. N. Verschuuren,2016-07-29 A unique introduction to the philosophy of science with special emphasis on the life sciences Part I presents elementary but fundamental concepts and problems in epistemology and their relation to questions of scientific methodology Part II deals with case studies from the history of biology which illustrate particular philosophical points while Part III progresses to more complex ideas as on the nature and methodology of science Part IV discusses the limitations of scientific enquiry and its relations to other systems of knowledge and interpretation **Dragon Bone Hill** Noel T. Boaz,Russell L. Ciochon,2004-02-16 Peking Man a cave man once thought a great hunter who had first tamed fire actually was a composite of the gnawed remains of some fifty women children and men unfortunate enough to have been the prey of the giant cave hyena Researching the famous fossil site of Dragon Bone

Hill in China scientists Noel T Boaz and Russell L Ciochon retell the story of the cave's unique species of early human *Homo erectus* Boaz and Ciochon take readers on a gripping scientific odyssey New evidence shows that *Homo erectus* was an opportunist who rode a tide of environmental change out Africa and into Eurasia puddle jumping from one gene pool to the next Armed with a shaky hold on fire and some sharp rocks *Homo erectus* incredibly survived for over 1.5 million years much longer than our own species *Homo sapiens* has been on Earth Tell tale marks on fossil bones show that the lives of these early humans were brutal ruled by hunger and who could strike the hardest blow yet there are fleeting glimpses of human compassion as well The small brain of *Homo erectus* and its strangely unchanging culture indicate that the species could not talk Part of that primitive culture included ritualized aggression to which the extremely thick skulls of *Homo erectus* bear mute witness Both a vivid recreation of the unimagined way of life of a prehistoric species so similar yet so unlike us and a fascinating exposition of how modern multidisciplinary research can test hypotheses in human evolution *Dragon Bone Hill* is science writing at its best
