The Needs Of Strangers:

The Needs of Strangers Michael Ignatieff, 2001-06-02 This thought provoking book uncovers a crisis in the political imagination a wide spread failure to provide the passionate sense of community in which our need for belonging can be met Seeking the answers to fundamental questions Michael Ignatieff writes vividly both about ideas and about the people who tried to live by them from Augustine to Bosch from Rousseau to Simone Weil Incisive and moving The Needs of Strangers returns philosophy to its proper place as a guide to the art of being human

The Needs of Strangers Michael Ignatieff, 1986-06-03 What do we need in order to survive Whose needs do we have a right to speak for Which needs can be satisfied through political actions and which cannot To answer these vital questions Michael Ignatieff returns to the ancient languages of religion art and tragedy and to important texts by Shakespeare St Augustine and the great writers of the Enlightenment Drawing on these sources he has written an incisive moving interpretation of community and democracy in a work that not only examines the breakdown of human solidarity but shows how it might be re created The Needs of Strangers restores philosophy to its proper place as a guide to the art of being human

Necessary Goods Gillian Brock, 1998 As the distinguished contributors to this volume evaluate the moral force of needs they approach questions of obligation and moral interest from a variety of different theoretical perspectives including contractarian rights based and Kantian

Poverty and Morality William A. Galston, Peter H. Hoffenberg, 2010-09-20 This multi authored book explores the ways that many influential ethical traditions secular and religious Western and non Western wrestle with the moral dimensions of poverty and the needs of the poor These traditions include Buddhism Christianity Confucianism Hinduism Islam and Judaism among the religious perspectives classical liberalism feminism liberal egalitarianism and Marxism among the secular and natural law which might be claimed by both The basic questions addressed by each of these traditions are linked to several overarching themes what poverty is the particular vulnerabilities of high risk groups responsibility for the occurrence of poverty preferred remedies how responsibility for its alleviation is distributed and priorities in the delivery of assistance This volume features an introduction to the types scope and causes of poverty in the modern world and concludes with Michael Walzer s broadly conceived commentary which provides a direct comparison of the presented views and makes suggestions for further study and policy

Asylum Seekers and the State Claudia Tazreiter, 2017-03-02 Highly topical in subject matter Asylum Seekers and the State reveals immigration policy as a political process which has social consequences not only for the newcomer group but also for the wider receiver society This work considers the obligations which receiver societies have for considering refugee claims but at the same time assesses contemporary security concerns it also provides an introduction to the roles of non government organizations as stake holders in the political process The book also offers a study of the historical and cultural context of immigration in Germany and Australia which demonstrates the practical impact of these issues Taking a fresh approach to the issue of asylum seekers and refugees this book offers unique perspectives from

non state actors as significant brokers and advocates of social and political processes **Ecologism** Mark J. Smith,1998 Ecological thinking has gained increasing prevalence in recent decades affecting political social and everyday life sparking great conflicts of interest in public policy areas In this accessible text Mark Smith considers these conflicts and proposes a new approach to environmental responsibility Ecologism addresses how we understand nature and the environment and applies this understanding to current sociological approaches Smith examines how the core questions raised by a green perspective transform the frame of reference for modern thinking He then outlines the distinctive features of ecological thought discussing two areas of contention the present generation s obligation to future generations and the relationship existing between humans and animals He then explores the difficulties in applying conventional ideas such as rights or justice to issues of the environment as well as the possibility that green thinking could lead to a new politics of obligation one grounded firmly in ecological citizenship Designed as an essential text for students of environmental studies politics and sociology this book is necessary reading for anyone with an interest in ecology and its social environment *Global Capital, Human Needs and Social Policies* I. Gough,2000-10-10 Can the needs of capital ever be reconciled with the needs of people To what extent can social policies bridge the gap between social rights and human welfare and economic competitiveness in a global world Building on his previous writings on political economy and human need Ian Gough throws new light on these perennial questions in a series of penetrating and original essays The conclusion is upbeat social policy still has the potential to narrow though never close the gap between the drive of capital and the universal needs of people *A Philosophy of Need* Soran Reader,2024-05-02 Appeals to need abound in everyday discussion People make claims about their own needs all the time and they do so in a way that suggests these should have a certain moral force Needs also play an important role in contemporary popular discourse about social justice climate change obligations to future generations dealing fairly with refugees treating animals humanely and critiques of consumerist lifestyles to name just a few of the many examples The idea of need is present in an increasing number of debates and domains There is interest in need from several disciplines not just philosophy which also include psychology economics political science social work and sociology This volume then offers a fine introduction to an increasingly important concept in day to day life In a new Foreword Gillian Brock discusses the continuing significance of several innovative chapters in the book indicating how they presaged new directions in philosophical conversation *Humanity in Healthcare* Peter Barritt,2005 Suitable as a text for medical humanities courses and for a much wider readership Peter Barritt has brought together a collection of ideas thoughts and references to illustrate how considering the arts develops a more human approach to medicine **The Philosophy of Need** Soran Reader,2005 Until recently philosophers tended to be suspicious of the concept of need Contributors to this volume build on recent work establishing its philosophical importance David Wiggins Gillian Brock and John O'Neill propose remedies for some mistakes made in ignoring or marginalising need for example in need free theories of rationality or justice Christopher Rowe Soran

Reader and Sarah Miller highlight insights that emerge when the concept of need is explored through Plato Aristotle and Kant and others that emerge when historical work is seen through the lens of need Jonathan Lowe and Garrett Thomson consider the role need plays in the philosophies of action and mind Bill Wringe David Braybrooke and Sabina Alkire debate how our obligations relating to need are best understood and articulated and how we can best ensure they are fulfilled exploring for example how talk of need is related to talk of rights well being or capability
